Strategic Narratives Alister Miskimmon 2014-02-18
Communication is central to how we understand international affairs. Political leaders, diplomats, and citizens recognize that communication shapes global politics. This has only been amplified in a new media environment characterized by Internet

access to information, social media, and the transformation of who can communicate and how. Soft power, public diplomacy 2.0, network power – scholars and policymakers are concerned with understanding what is happening. This book is the first to develop a systematic framework to understand how political actors seek to shape

order through narrative projection in this new environment. To explain the changing world order - the rise of the BRICS, the dilemmas of climate change, poverty and terrorism, the intractability of conflict - the authors explore how actors form and project narratives and how third parties interpret and interact with these narratives. The concept of strategic narrative draws together the most salient of international relations concepts, including the links between power and ideas; international and domestic; and state and non-state actors. The book is anchored around four themes: order, actors, uncertainty, and contestation. Through these, Strategic Narratives shows both the possibilities and the limits of communication and power, and makes an important contribution to theorizing and studying empirically contemporary international relations. The Primer of Humor Research Victor Raskin 2008-11-06 The book is intended to provide a definitive view of the field of humor research for both beginning and established scholars in a variety of fields who are developing an interest in humor and need to familiarize themselves with the available body of knowledge. Each chapter of the book is devoted to an important aspect of humor research or to a

disciplinary approach to the field, and each is written by the leading expert or emerging scholar in that area. There are two primary motivations for the book. The positive one is to collect and summarize the impressive body of knowledge accumulated in humor research in and around Humor: The International Journal of Humor Research. The negative motivation is to prevent the embarrassment to and from the "first-timers," often established experts in their own field, who venture into humor research without any notion that there already exists a body of knowledge they need to acquire before publishing anything on the subject-unless they are in the business of reinventing the wheel and have serious doubts about its being round! The organization of the book reflects the main groups of scholars participating in the increasingly popular and high-powered humor research movement throughout the world, an 800 to 1,000-strong contingent, and growing. The chapters are organized along

the same lines: History, Research Issues, Main Directions, Current Situation, Possible Future, Bibliography- and use the authors' definitive credentials not to promote an individual view, but rather to give the reader a good comprehensive and condensed view of the area.

Integrating Emerging Technologies Into Chemical Safety Assessment Council of Canadian Academies. Expert Panel on the Integrated Testing of Pesticides 2012 "In May 2009, the Government of Canada, through the Pest Management Regulatory Agency (PMRA) of Health Canada, asked the Council of Canadian Academies to appoint an expert panel to answer the question, "What is the scientific status of the use of integrated testing strategies in the human and environmental regulatory risk assessment of pesticides?" The charge to the Panel was further specified in a series of sub-questions: [1] What is the state of the science of the tools and data sources associated with integrated testing strategies? [2] What is the current status of the use of integrated testing strategies for the risk assessment of pesticides, pharmaceuticals, industrial chemicals, and other

chemical substances by regulatory agencies around the world? [3] Could there be potential impacts on the public's perception and confidence in regulatory risk assessment and risk management decisions for pesticides if integrated testing strategies were implemented?"-P. xiii-xiv.

History of Nordic Computing 2 John

Impagliazzo 2009-09-21 The First Conference on the History of Nordic Computing (HiNC1) was organized in Trondheim, in June 2003. The HiNC1 event focused on the early years of computing, that is the years from the 1940s through the 1960s, although it formally extended to year 1985. In the preface of the proceedings of HiNC1, Janis Bubenko, Jr. , John Impagliazzo, and Arne Sølvsberg describe well the peculiarities of early Nordic computing [1]. While developing hardware was a necessity for the first professionals, quite soon the computer became an

industrial product. Computer scientists, among others, grew increasingly interested in programming and application software. Progress in these areas from the 1960s to the 1980s was experienced as astonishing. The developments during these decades were taken as the focus of HiNC2. During those decades computers arrived to every branch of large and medium-sized businesses and the users of the computer systems were no longer only computer specialists but also people with other main duties. Compared to the early years of computing before 1960, where the number of computer projects and applications was small, capturing a holistic view of the history between the 1960s and the 1980s is considerably more difficult. The HiNC2 conference attempted to help in this endeavor.

The Trump Paradox Raul

Hinojosa-Ojeda 2021-03-23 The Trump Paradox: Migration, Trade, and Racial Politics in US-Mexico Integration explores one of the most complex and unequal cross-border relations in the world, in light of both a twenty-first-century political economy and the rise of Donald Trump. Despite the trillion-plus dollar contribution of Latinos to the US GDP, political leaders have paradoxically stirred racial resentment around immigrants just as immigration

from Mexico has reached net zero. With a roster of state-of-the-art scholars from both Mexico and the US, *The Trump Paradox* explores a dilemma for a divided nation such as the US: in order for its economy to continue flourishing, it needs immigrants and trade.

Reviews, Refinements and New Ideas in Face

Recognition Peter Corcoran 2011-07-27 As a baby one of our earliest stimuli is that of human faces. We rapidly learn to identify, characterize and eventually distinguish those who are near and dear to us. We accept face recognition later as an everyday ability. We realize the complexity of the underlying problem only when we attempt to duplicate this skill in a computer vision system. This book is arranged around a number of clustered themes covering different aspects of face recognition. The first section on Statistical Face Models and Classifiers presents reviews and refinements of some well-known statistical models. The next section presents two

articles exploring the use of Infrared imaging techniques and is followed by few articles devoted to refinements of classical methods. New approaches to improve the robustness of face analysis techniques are followed by two articles dealing with real-time challenges in video sequences. A final article explores human perceptual issues of face recognition.

Intra-Asian Trade and the World Market

A.J.H. Latham 2006-04-18 Intra-Asian trade is a major theme of recent writing on Asian economic history. From the second half of the nineteenth century, intra-Asian trade flows linked Asia into an integrated economic system, with reciprocal benefits for all participants. But although this

was a network from which all gained, there was also considerable inter-Asian competition between Asian producers for these Asian markets, and those of the wider world. This collection presents captivating snap-shots of trade in specific commodities, alongside chapters comprehensively covering the region. The book covers: China's relative backwardness, Japanese copper exports, Japan's fur trade, Siam's luxury rice trade, Korea, Japanese shipbuilding, the silk trade, the refined sugar trade, competition in the rice trade, the Japanese cotton textile trade to Africa, multilateral settlements in Asia, the cotton textile trade to Britain, and the growth of the palm oil industry in Malaysia and Indonesia. The opening of Asia, especially in Japan and China, liberated the creative forces of the market within the new intra-Asian economy. Filling a particular gap in the literature on intra-Asian trade prior to the twentieth century, this is an insightful study that makes a

considerable contribution to our knowledge of the Asian trade both prior to, and after, the arrival of colonial states. It will be of great interest to historians and economists focusing on Asia.

Beyond Racism Charles V. Hamilton 2001 This study explores issues of race, racism, and strategies to improve the status of people of African descent in Brazil, South Africa and the USA. The authors provide in-depth information about each country, together with analyses of cross-cutting themes and trends.

Between the Cracks of History Francis Edward Abernethy 1997 Six essays discuss definitions and explanations of folklore, and methods of teaching it. Then 15 additional essays explore Texas folklore related to such topics as police burials, gang graffiti, fiddling, ghosts, dance halls, oil fields, spring rituals, and the dialect spoken along the border between Texas and Mexico. Introductory Grammar of

Amharic Wolf Leslau 2000

This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and

in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

Creating Livable Asian Cities

Bambang Susantono

2021-04-01 This book explores

how Asia's fast-growing cities can fulfil their potential as engines of economic prosperity and provide a livable environment for all citizens.

But for this to happen, major challenges that reduce urban communities' quality of life and economic opportunities must be addressed. These include poor planning, a lack of affordable housing, inequalities, pollution, climate vulnerabilities, and urban infrastructure deficits. The book's 19 articles unwrap these challenges and present solutions focused on smart and inclusive planning, sustainable transport and energy, innovative financing, and resilience and rejuvenation.

Bitcoin and Beyond Malcolm Campbell-Verduyn 2017-11-28
Since the launch of Bitcoin in 2009 several hundred different 'cryptocurrencies' have been developed and become accepted for a wide variety of transactions in leading online commercial marketplaces and the 'sharing economy', as well as by more traditional retailers, manufacturers, and even by charities and political parties. Bitcoin and its competitors have also garnered attention for their wildly fluctuating values as well as implication in international money laundering, Ponzi schemes and

online trade in illicit goods and services across borders. These and other controversies surrounding cryptocurrencies have induced varying governance responses by central banks, government ministries, international organizations, and industry regulators worldwide. Besides formal attempts to ban Bitcoin, there have been multifaceted efforts to incorporate elements of blockchains, the peer-to-peer technology underlying cryptocurrencies, in the wider exchange, recording, and broadcasting of digital transactions. Blockchains are being mobilized to support and extend an array of governance activities. The novelty and breadth of growing blockchain-based activities have fuelled both utopian promises and dystopian fears regarding applications of the emergent technology to Bitcoin and beyond. This volume brings scholars of anthropology, economics, Science and Technology Studies, and sociology together with GPE scholars in assessing the actual

implications posed by Bitcoin and blockchains for contemporary global governance. Its interdisciplinary contributions provide academics, policymakers, industry practitioners and the general public with more nuanced understandings of technological change in the changing character of governance within and across the borders of nation-states.
