*The Power of Boldness* A Joseph Henry Press book 1996-11-11 "Whatever you dream, begin it, for boldness has genius, power and magic in it." - Goethe What qualities brought America to its dominance of world industry? How will American technology fare in the new global marketplace? What upbringing, education, and personal traits are required to produce leaders who can succeed in this new world? Scan the bookstore shelves and you'll see dozens of attempts by authors to capture the essence of leadership and entrepreneurial success. In *The Power of Boldness*, the answers come from original sources: ten of the country's most successful business leaders, who share their experiences and insights in individual essays that are remarkable for their directness and personal detail. Six of the writers are inventors who created the enterprises to commercialize their ideas—four assumed management of their fathers' companies and moved into new industrial and geographic markets. Born between 1897 and 1962, these outstanding figures collectively chronicle America's industrial rise since World War II—and share their perspectives on what lies ahead in the age of technology. In engaging and often humorous terms, these men describe how they managed to make the most of the economic and social ups and downs of the past decades—how boldness, clear thinking, and a willingness to learn saw them through the bad times and paved the way to their

success. No other book gathers so distinguished a group of business figures: Stephen D. Bechtel, Jr., of Bechtel Group describes the rise, decline, and rise again of the world's largest heavy construction company. William M. Haney, III, of Molten Metal Technology—a strong believer in Goethe's maxim—overviews the opportunities in ecotechnology. Edward C. Johnson 3d, of Fidelity writes on the adventures of a "contrarian" in the financial arena. Gordon E. Moore of Intel explains how his firm became one of the world's largest producers of microprocessor chips and forecasts the future of the electronics industry. John F. Taplin, master inventor and founder of a number of companies, writes on the education of an inventor/entrepreneur. Thomas D. Cabot of Cabot Corporation, Robert Galvin of Motorola, George N. Hatsopoulos of Thermo Electron Corporation, and Ralph Landau of Halcon International, round out this group of master builders of America's industrial power. In an introduction and summing-up, Alfred Chandler, Jr., Pulitzer Prize-winning business historian, explores some of the themes that emerge from the personal essays. Capturing the spirit of innovation as well as the practicalities of business decision making, *The Power of Boldness* will be required reading for business executives, students of business, and anyone interested in the individual success stories behind America's technological leadership.

*History Decoded* Brad Meltzer 2013-10-22 It's an irresistible combination: Brad Meltzer, a born storyteller, counting down the world's most intriguing unsolved mysteries. And to make this richly illustrated book even richer, each chapter invites the reader along for an interactive experience through the addition of removable facsimile documents—the evidence! It's a treasure trove for conspiracy buffs, a Griffin and Sabine for history lovers. Adapted from *Decoded*, Meltzer's hit show on the HISTORY network, *History Decoded* explores fascinating, unexplained questions. Is Fort Knox empty? Why was Hitler so intent on capturing the Roman "Spear of Destiny"? What's the government hiding in Area 51? Where did the Confederacy's \$19 million in gold and silver go at the end of the Civil War? And did Lee Harvey Oswald really act alone? Meltzer sifts through the evidence; weighs competing theories; separates what we know to be true with what's still—and perhaps forever—unproved or unprovable; and in the end, decodes the mystery, arriving at the most likely solution. Along the way we meet Freemasons, Rosicrucians, Nazi propagandists, and the real DB Cooper. Bound in at the beginning of each story is a custom-designed envelope—a faux 19th-century leather satchel, a U.S. government classified file—containing facsimiles of relevant evidence: John Wilkes Booth's alleged unsigned will, a map of the Vatican, Kennedy's death certificate. The whole is a riveting, interactive adventure through the compelling world of mysteries and conspiracies.

The history of human civilization took a new turn when the Sikh Gurus appeared on the scene of Medieval India. The Sikh movement served as a light-house for the people groping in the dark. **Eric Hobsbawm: a Life in History** Richard J. Evans 2020-09-08 At the time of his death at the age of 95, Eric Hobsbawm (1917-2012) was the most famous historian in the world. His books were translated into more than fifty languages and he was as well known in Brazil and Italy as he was in Britain and the United States. His writings have had a huge and lasting effect on the practice of history. More than half a century after it appeared, his books remain a staple of university reading lists. He had an extraordinarily long life, with interests covering many countries and many cultures, ranging from poetry to jazz, literature to politics. He experienced life not only as a university teacher but also as a young Communist in the Weimar Republic, a radical student at Cambridge, a political activist, an army conscript, a Soho 'man about town', a Hampstead intellectual, a Cambridge don, an influential journalist, a world traveller, and finally a Grand Old Man of Letters. In *A Life in History*, Richard Evans tells the story of Hobsbawm as an academic, but also as witness to history itself, and of the twentieth century's major political and intellectual currents. Eric not only wrote and spoke about many of the great issues of his time, but participated in many of them too, from Communist resistance to Hitler to revolution in Cuba, where he acted as an interpreter for Che Guevara. He was a prominent part of the Jazz scene in Soho in the late 1950s and his writings played a pivotal role in the emergence of New Labour in the late 1980s and early 1990s. This, the first biography of Eric Hobsbawm, is far more than a study of a professional historian. It is a study of an era.

**George Bancroft** George Athan Billias 2004-03-01 Bancrofts ten-volume History of the United States from the Discovery of the Continent contains an inherent contradiction. This essay explores Bancrofts attempts to reconcile two contradictory points of view--the universality of human nature and his belief that nations developed their own distinctive values or ethos. Bancroft seemed to want it both ways: Americans shared a common human nature with all others, and yet they became something quite different historically. How could this be?

The Historian Elizabeth Kostova 2005-06-01 The record-breaking phenomenon from Elizabeth Kostova is a celebrated masterpiece that "refashioned the vampire myth into a compelling contemporary novel, a late-night page-turner" (San Francisco Chronicle). Breathtakingly suspenseful and beautifully written, The Historian is the story of a young woman plunged into a labyrinth where the secrets of her family's past connect to an inconceivable evil: the dark fifteenth-century reign of Vlad the Impaler and a time-defying pact that may have kept his awful work alive through the ages. The search for the truth becomes an adventure of monumental proportions, taking us from monasteries and dusty libraries to the capitals of Eastern Europe—in a feat of storytelling so rich, so hypnotic, so exciting that it has enthralled readers around the world.

"Part thriller, part history, part romance...Kostova has a keen sense of storytelling and she has a marvelous tale to tell." —Baltimore Sun
