**The Name of this Book Is Secret** Pseudonymous Bosch 2008-09-01 Read the series that's sold more than 2 million copies--if you dare! Warning: this description has not been authorized by Pseudonymous Bosch. As much as he'd love to sing the praises of his book (he is very vain), he wouldn't want you to hear about his brave 11-year old heroes, Cass and Max-Ernest. Or about how a mysterious box of vials, the Symphony of Smells, sends them on the trail of a magician who has vanished under strange (and stinky) circumstances. And he certainly wouldn't want you to know about the hair-raising adventures that follow and the nefarious villains they face. You see, not only is the name of this book secret, the story inside is, too. For it concerns a secret. A Big Secret.

The Protection of Trade Secrets in China Shan Hailing 2012-11-01 For business investors in China, the legal handling of trade secrets is often crucial. However, initiatives are often complicated by a patchwork trade secrets protection system - pieced together haphazardly over the last two decades and drawing on disparate elements of competition law, contract law, employment law, and criminal law - that diverges in significant ways from global standards and corresponding regimes in other countries. Now at last interested parties can benefit richly from a thorough and practical approach to the subject. This detailed analysis of China's trade secrets law provides in-depth information and guidance on such important factors as the following: the current framework of China's trade secrets law, its past development and its ongoing trends; legal comparison of China's trade secrets law with various international, regional, and national schemes; what constitutes trade secrets infringement in China and what remedies are available; and the legal interaction in China between employment relations and trade secrets protection. The author pays close attention to judicial practice and precedent in the areas of civil remedies, criminal punishment, and administrative penalties. She also offers insightful proposals formulated to align China's trade secrets law more efficiently with prevailing global standards and generally improve the mechanisms for its implementation. Corporate counsel and international lawyers concerned with intellectual property rights or labour law in China will greatly appreciate the knowledgeable guidance this book affords. They will gain a deeply informed perspective that allows them to avoid infringement, to battle it effectively if occasion arises, and to plan dispute resolution strategies for contingencies involving trade secrets protection in China.

*Wonder with Secret Insert for Bankers* Valentino Zubiri 2014-04-24 This is a Special Edition that includes a SPECIAL SECRET 2-PAGE PROPOSAL which the authors hopes for financial institutions including investment banks, hedge funds and investors to read. ART IS UNREGULATED and it may be the solution to your creative financing problem due to the economic downturn. It focuses on investing in art, based on Mr. Zubiri's idea that his several memoirs of his artistic life and views would make his art known and desired by art collectors and investors in the long run, enough for financial institutions to find ways to make his art profitable for them. His idea explains that if pricing doubles exponentially, then everyone can report a gain in their assets in their financial statements, but this will work and will work faster if all companies concentrate on one artist. While the idea might be novel, it is his memoirs that will ultimately justify the pricing in the long run. A nostalgic, imperfect past. Lessons learned. Misadventures. Traumatic events. Eccentric thoughts. I keep my ideas secret by converting them into "Mind Games." This is how my ideas last for years. Nobody nips them in the bud. "Creative Procrastination" is the way I take my time reaching long term goals. Despite my delays, I still end up better and more productive. I remember my beloved relatives and old friends whom I now miss, who had helped me become a better person. I show how immensely valuable even little, everyday elements can be and how they have continued to greatly impact and subtly influence me over decades.
