From Goethe to Gundolf Roger Paulin 2021-08-24 From Goethe to Gundolf: Essays on German Literature and Culture is a collection of Roger Paulin's groundbreaking essays, spanning the last forty years. The work represents his major research interests of Romanticism and the reception of Shakespeare in Germany, but also explores a broader range of themes, from poetry and the public memorialization of poets to fairy stories - all meticulously researched, yet highly accessible. As a comprehensive examination of German literary history in the period 1700-1900, the collection not only includes accounts of the lives and work of Goethe, Schiller, the Schlegels, and Gundolf (amongst others), serving to nuance our understanding of these figures in history, but also considers diverse (and often underexplored) topics, from academic freedom to the rise of travel literature. The essays have been reformulated, corrected, and updated to add references to recent works. However, the core foundations of the originals remain, and just as when they were first published, the value of these essays - to researchers, students, and

all those who are interested in German literary history - cannot be overstated.

Forbidden Knowledge Roger Shattuck 1997 A riveting account of the ways in which man's darkest impulses conflict with common sense. From the lessons learned in "Paradise Lost" and the events which transpired in the tales of "Dr. Jekyll and Mr. Hyde" and "Frankenstein" to unlocking the secrets of the atom, Shattuck's brilliant synthesis of history and literature is utterly relevant to our times and addictively readable.

The Philobiblon Richard De Bury 2019-06-12

"Will always hold an honorable place for bibliophiles." — The University of Chicago Press One of the earliest treatises on the value of preserving neglected manuscripts, building a library, and book collecting, Richard De Bury's *The Philobiblon* was written in 1345 and circulated widely in manuscript form for over a century. The first printed edition appeared in Cologne in 1473, and several others soon followed as the invention of the printing press spread throughout the late Medieval world. The chapter titles of this legendary work reflect its nature, combining the author's love for and commitment to the importance of books and the knowledge they contain with thoughts on collecting them, lending them, teaching with them, and simply enjoying them: "That the Treasure of Wisdom is chiefly contained in books," "What we are to think of the price in the buying of books," "Who ought to be special lovers of books," and "Of the manner of lending all our books to students." The Prologue ends with the following thought: "And this treatise (divided into twenty chapters) will clear the love we have had for books from the charge of excess, will expound the purpose of our intense devotion, and will narrate more clearly than light all the circumstances of our undertaking. And because it principally treats of the love of books, we have chose after the fashion of the ancient Romans fondly to name it by a Greek word, *Philobiblon*." This volume offers modern bibliophiles a splendid edition of one of the first books ever to study, define, and, above all, praise their passion: the all-encompassing love of books.

From Clerks to Corpora Philip Shaw 2015-01-19 Why is the Isle of Dogs in the Thames called Isle of Dogs? Did King Canute's men bring English usage back to Jutland? How can we find out where English speakers suck their breath in to give a short response? And what did the Brontes do about dialect and think about foreign languages? The answers are in this collection of empirical work on English past and present in

honour of Nils-Lennart Johannesson, Professor of English Language at Stockholm University. The first five chapters report individual studies forming an overview of current issues in the study of Old and Middle English phonology, lexis and syntax. The next six look at Early Modern and Modern English from a historical point of view, using data from corpora, manuscript archives, and fiction. Two more look at the Old English scholar JRR Tolkien and his work. The remaining chapters discuss aspects of Modern English. Several use corpora to look at English usage in itself or in relation to Swedish, French, or Norwegian. The last three look at grammatical models, the pragmatics of second language use, and modern English semantics.

The Force of Poetry Christopher Ricks 1995 Christopher Ricks is one of the best-known living critics of English, and was described by W. H. Auden as 'the kind of critic every poet dreams of finding'. Though published independently over many years, each of the essays in this collection of his writings asks how a poet's words reveal the 'force of poetry', that force - in Dr Johnson's words - 'which calls new power into being, which embodies sentiment, and animates matter'. The poets covered range from John Gower, Marvell, and Milton to Wordsworth, Empson, Stevie Smith, Lowell, and Larkin, and the book contains four wider essays on clichés, lies, misquotations, and American English.

Literary Coteries and the Making of Modern

Print Culture Betty A. Schellenberg 2016-06-06
Literary Coteries and the Making of Modern
Print Culture offers the first study of manuscript-producing coteries as an integral element of eighteenth-century Britain's literary culture. As a corrective to literary histories assuming that the dominance of print meant the demise of a vital scribal culture, the book profiles four interrelated and influential coteries, focusing on each group's deployment of traditional scribal practices, on key individuals who served as bridges between networks, and on the aesthetic and cultural work performed by the group. The book also explores points of intersection between coteries and the print trade, whether in the form of individuals who straddled the two cultures; publishing events in which the two media regimes collaborated or came into conflict; literary conventions adapted from manuscript practice to serve the ends of print; or simply poetry hand-copied from magazines. Together, these instances demonstrate how scribal modes shaped modern literary production. This title is also available as Open Access.

The Information James Gleick 2011-03-01 From the bestselling author of the acclaimed *Chaos and Genius* comes a thoughtful and provocative exploration of the big ideas of the modern era: Information, communication, and information theory. Acclaimed science writer James Gleick presents an eye-opening vision of how our relationship to information has transformed the very nature of human consciousness. A fascinating intellectual journey through the history of communication and information, from the language of Africa's talking drums to the invention of written alphabets; from the electronic transmission of code to the origins of information theory, into the new information age and the current deluge of news, tweets, images, and blogs. Along the way, Gleick profiles key innovators, including Charles Babbage, Ada Lovelace, Samuel Morse, and Claude Shannon, and reveals how our understanding of information is transforming not only how we look at the world, but how we live. Boxing Kasia Boddy 2013-06-01 Boxing is one of the oldest and most exciting of sports: its bruising and bloody confrontations have permeated Western culture since 3000 BC. During that period, there has hardly been a time in which young men, and sometimes women, did not raise their gloved or naked fists to one other. Throughout this history, potters, sculptors, painters, poets, novelists, cartoonists, song-writers, photographers and film-makers have been there to record and make sense of it all. In her encyclopaedic investigation, Kasia Boddy sheds new light on an elemental sports and struggle for dominance whose weapons are nothing more than fists. Boddy examines the shifting social, political and cultural resonances

of this most visceral of sports, and shows how from Daniel Mendoza to Mike Tyson, boxers have embodied and enacted our anxieties about race, ethnicity, gender and sexuality. Looking afresh at everything from neoclassical sculpture to hip-hop lyrics, *Boxing* explores the way in which the history of boxing has intersected with the history of mass media, from cinema to radio to pay-per-view. The book also offers an intriguing new perspective on the work of such diverse figures as Henry Fielding, Spike Lee, Charlie Chaplin, Philip Roth, James Joyce, Mae West, Bertolt Brecht, and Charles Dickens. An all-encompassing study, *Boxing* ultimately reveals to us just how and why boxing has mattered so much to so many.

Trading Places Nicholas Kitto 2020-12 China's treaty port era extended from the 1840s to 1943, during which time foreigners had a significant presence. This book contains more than 700 photographs of many buildings from this period, most of them commissioned by non-Chinese people and companies. Many argue that they should never have been built, let alone still be standing. But this book is not concerned with the rights and wrongs of how these buildings came to be. It simply celebrates their existence. A significant number are innately beautiful and all of them embody a history that has clear and present links to our own time and thus remain relevant. This book was driven by the author's interest in the history of China's treaty port era, in which several generations of his family played a part. It is a tribute to the buildings that remain as a reminder of the past, and a guide to where to find them.

Modern Manuscripts Dirk Van Hulle 2015-06-18 The twentieth century has been called 'the golden age of the modern manuscript,' a time when the historical value of early manuscripts as a record of a writer's thought processes came to be fully recognized. Drawing on the critical tools of French genetic criticism, *Modern Manuscripts* explores the development of early 20th century literary texts, from source texts and early notes, through successive draft manuscripts to publication and

successive editions. Historicizing these modernist processes of writing, Dirk Van Hulle contrasts these twentieth century manuscripts with the development of Charles Darwin's text for *On the Origin of Species*, itself a formative intellectual influence on modern writing. Exploring the writings of such writers as Joyce, Woolf and Beckett, this is an important study that will open up new avenues of thought for scholars of Modernist literature, material culture and book history.

Marx's Ecology John Bellamy Foster 2000-03-01 Progress requires the conquest of nature. Or does it? This startling new account overturns conventional interpretations of Marx and in the process outlines a more rational approach to the current environmental crisis. Marx, it is often assumed, cared only about industrial growth and the development of economic forces. John Bellamy Foster examines Marx's neglected writings on capitalist agriculture and soil ecology, philosophical naturalism, and evolutionary theory. He shows that Marx, known as a powerful critic of capitalist society, was also deeply concerned with the changing human relationship to nature. *Marx's Ecology* covers many other thinkers, including Epicurus, Charles Darwin, Thomas Malthus, Ludwig Feuerbach, P. J. Proudhon, and William Paley. By reconstructing a materialist conception of nature and society, *Marx's Ecology* challenges the spiritualism prevalent in the modern Green movement, pointing toward a method that offers more lasting and sustainable solutions to the ecological crisis.

Battle for the Mind William Sargant 1997 How can an evangelist convert a hardboiled sophisticate? Why does a prisoner of war sign a "confession" that he knows is false? How is a criminal pressured into admitting his guilt? Do the evangelist, the POW's captor, and the policeman use similar methods to gain their ends? These and other compelling questions are discussed in this definitive work by William Sargant, who for many years until his death in 1988 was a leading physician in psychological medicine. Sargant spells out and illustrates the basic technique used by evangelists, psychiatrists, and brainwashers to disperse the patterns of belief and behavior already established in the minds of their hearers, and to substitute new patterns for them.
