The Sighting Raúl Sánchez Leal 2020-11-27 In the nineties, I witnessed something that marked me forever. I observed some mysterious lights in the sky that were doing some strange maneuvers. Thirty years later, while I was documenting myself for the writing of my first novel, I discovered that more witnesses had seen very similar phenomena in different parts of our planet. This discovery led me to begin my first UFO investigation. An investigation characterized by a series of inquiries that ended up taking me to the 1940s, the decade in which the manufacture of prototype airplanes with a technology of unknown origin began...

Bigfoot meets the Loch Ness monster in this creepy and terrifying short horror psychological thriller with a twisted ending that will shock you. You will never look at the ocean the same way again. Every fourteen months it appears on a secluded beach in a small town just before dawn. One morning during his daily run to the beach, Danny Lynch witnesses the strangest and most incredible thing he's ever seen. A dark, man-like figure emerges from the ocean, stands for just a few moments on the beach, and then retreats back to the surf.

Danny's perspective on the world changes in an instant, and as the only eyewitness to this event, his mission now is to convince anyone who will listen that what he saw was real. But with only a vague photo and a dubious story, that task is proving almost impossible, and his only hope may be in finding a mysterious woman who was at the beach earlier that morning, and who may hold the terrifying secret that could cost Danny his life. Caesarean Moon Births: Calculations, Moon Sighting, and the Prophetic Way Hamza Yusuf 2014-01-10

Prior to the advent of electricity, every night held the possibility of a celestial light show. People in even the most urban environments were exposed to the awe and majesty of the heavens, which clearly "proclaim the glory of God." The contemplation of the celestial orbs and their movements provided early man with the most direct connection to his Lord. In the Qur'anic story of Abraham, it is his observance of heavenly phenomena that leads him to his certainty of God's unity and transcendence. Since the time of the Seljuq Turks, the crescent moon has been a sign of Islam. For Muslims in North America, there has been much confusion regarding when Ramadan begins, when to fast, and when to break the fast. Hamza Yusuf provides clarity through this detailed and scholarly work that decisively makes the case for sighting the crescent moon with the naked eye, as has been the Islamic tradition for 1400 years. This is essential reading for anyone seeking guidance on this important and sacred matter.
