Arms Control Jozef Goldblat 2002-09-24 `A unique and indispensable work that serves both as a basic introduction to the disarmament scene and a reference book for experts' - Disarmament Times `This compendium of the history and achievements of arms control and disarmament efforts is unique in its kind and is likely to remain so. This for three reasons: first, because of its unparalleled comprehensiveness; second, because of the outstanding quality of its presentation, and, third, because of its author, Jozef Goldblat, one of the world's leading experts in the field. This triad makes the updated Second Edition of Arms Control: The New Guide to Negotiations and Agreements a must for all concerned with international security in general and arms control in particular' - Curt Gasteyer, Graduate Institute of International Studies, Geneva `The thesaurus of arms regulation and disarmament...a precious tool for negotiators and treaty makers' - Ambassador V Petrovsky, Former Secretary-General of the Conference on Disarmament `Being the most comprehensive and authoritative compilation and analysis of arms control agreements available, this is an indispensable reference volume for students and practitioners of arms control and international security. The author has spent a lifetime in the study and practice of international security affairs: where international law and arms control agreements are concerned, there is no one

better qualified than him' - Sverre Lodgaard, Norwegian Institute of International Affairs, Oslo The revised and updated edition of Arms Control: The New Guide to Negotiations and Agreements contains the most authoritative and comprehensive survey ever published of the documents related to arms control. All major agreements reached since the second half of the nineteenth century through to mid-2002 are critically analysed and assessed. The assessment is made in the light of the international security environment, the developments in the field of weapon technology, the threat of nuclear, chemical and biological weapons proliferation, and the efforts to strengthen the humanitarian law of armed conflict. The accompanying CD-ROM reproduces full text and carefully selected excerpts of treaties, conventions, common understandings, statutes, charters, binding decisions of international bodies, final acts of international conferences, exchanges of letters and diplomatic notes. Multilateral agreements are followed by a list of parties. Enriched with new maps, tables and figures, as well as an expanded glossary and bibliography, the book will remain the definitive resource for students of international relations, journalists, diplomats and military strategists. Jozef Goldblat, the author, is Vice-President of the Geneva International Peace Research Institute (GIPRI), Resident Senior Fellow of the UN Institute for Disarmament Research (UNIDIR) and Associate

Editor of Security Dialogue, published by SAGE for the International Peace Research Institute, Oslo (PRIO). He has studied the problems of arms control since the 1950s and has been involved in arms control negotiations. From 1969 to 1989 he directed the arms control and disarmament programme of studies at the Stockholm International Peace Research Institute (SIPRI). He has lectured at various universities and has written reports, articles and books on the arms race and disarmament. His latest publications include *The Nuclear Non-Proliferation Regime: Assessment and Prospects*, The Hague Academy of International Law, 1997, and *Nuclear Disarmament: Obstacles to Banishing the Bomb*, I. B. Tauris, 2000. Striving for Peace, Security, and Development of the World Joseph Rotblat 1993 The momentous events of the past year have changed the political face of the globe: the ideological struggle that dominated the world for most of this century is over; erstwhile mortal enemies have become friends and partners. But old attitudes have survived and modern weapons are in abundance. New foci of conflict have emerged; military confrontations are taking place; the world is still in turmoil. The welcome deep cuts in nuclear weapons have still left thousands of warheads in the arsenals, and the spread of these weapons to new states would further increase the danger of a nuclear confrontation. The release of the pressure pent-up under oppressive regimes created a powerful drive for independence, often achieved only after bloody wars. Many of the new states are economically non-viable: poverty and famine are frequent adjuncts of independence. If military conflicts are to be avoided, a comprehensive strategy must be formulated to improve the standards of living in the developing countries and enhance their security. A strategy is also needed to protect the environment from the effects of further industrialization and greater use of energy. What is needed is a concept of a sustainable, equitable and liveable world for all its inhabitants. All these problems were analysed by scientists and scholars who met at a Pugwash Conference. The arguments used by them and the proposed solutions are presented in this book under six themes: World Peace; Nuclear Disarmament Issues; Arms Control; Security in

the Asia-Pacific Region; Development Strategies and World Economic Order; Energy and the Environment.

Jonathan Dean Hans Günter Brauch 2014-05-20 Jonathan Dean (1924-2014) was a distinguished U.S. diplomat (1950-1980) and from 1984 to 2007 global security adviser to the Union of Concerned Scientists, Washington, D.C. During the 1980s and 1990s he was a pioneering conceptual thinker, writer and speaker on détente in Europe, global cooperative security, arms control and disarmament. He authored: *Watershed in Europe* (1987), *Meeting Gorbachev's Challenge* (1989) and *Ending Europe's Wars* (1994). This volume contains his biography and bibliography, six texts on détente and arms control in Europe in the 1980s: *Beyond First Use*; *MBFR*; *Alternative Defence*; *Berlin*; *A Crisis Management Center*; *Conventional Arms Control in Europe* and six texts on the new security order in Europe since the 1990s: *Components of a Post-Cold War Security System for Europe*; *Constraining Technological Weapons Innovation*; *NATO Enlargement: Act II*; *Ten Years after the Wall*; *Future Security in Space*; *Rethinking Security: Return to the Grotean Pattern*.

Disarmament under International Law John Kierulf 2017-01-01 Russia's annexation of Crimea and involvement in the conflict in eastern Ukraine has in many respects set back post-Cold War improved relations between Russia, the United States, and Europe. The continued war in Syria threatens the security and stability of many countries in the Middle East and attacks by ISIS and other terrorist organizations are causing increased fear and instability in Iraq and in neighbouring countries. In many areas negotiations on disarmament and arms control are at a standstill. In *Disarmament under International Law*, John Kierulf examines and discusses how disarmament, arms control, and non-proliferation of both conventional weapons and weapons of mass destruction are regulated in existing treaties and conventions. From his perspective as a former disarmament negotiator, Kierulf explains the United Nations' disarmament machinery and procedures, and describes the UN's essential role in promoting disarmament. Underlining the continued and serious threat posed by nuclear weapons, Kierulf

appeals for increased and effective international efforts to reduce their number and ultimately eliminate them. Presenting information and analysis on a comprehensive range of issues, *Disarmament under International Law* is an essential guide for anyone interested in gaining knowledge about the current state of international security.

Cooperating for Peace and Security Bruce D. Jones 2010 *Cooperating for Peace and Security* attempts to understand - more than fifteen years after the end of the Cold War, seven years after 9/11, and in the aftermath of the failure of the United Nations (UN) reform initiative - the relationship between US security interests and the factors that drove the evolution of multilateral security arrangements from 1989 to the present. Chapters cover a range of topics - including the UN, US multilateral cooperation, the North Atlantic Treaty Organization (NATO), nuclear nonproliferation, European and African security institutions, conflict mediation, counterterrorism initiatives, international justice and humanitarian cooperation - examining why certain changes have taken place and the factors that have driven them and evaluating whether they have led to a more effective international system and what this means for facing future challenges.

Security and Strategy in the New Europe Colin McInnes 2002-09-11 The thawing of the Cold War has brought new concerns over the nature of European security to the fore and uncovered major differences in the approaches of individual states to changed circumstances. This book clarifies the options for a new European security order and contribute to the growing debate. It adopts a medium-term analytical approach and uses a three-tier format, covering the nature and structure of security and the security implications of Europe's resurgent nationalism; security strategy, with particular reference to the NATO perspective and to the European Community; and the distinctive security concerns of individual states. It looks at both Eastern and Western Europe and at the Soviet Union and it analyses the role of the United States in European security. The thawing of the Cold War has brought new concerns over the nature of European security to the fore and uncovered major differences in the approaches

of individual states to changed circumstances. *Making a Killing: The Scourge of the Global Arms Trade* Saghir Iqbal 2018-07-28 Each year billions of dollars' worth of arms are procured between various nations, despite the fact that many millions of people live in desperate poverty, many will die from hunger and hunger related diseases. Weapons of increasing firepower and the missiles to deliver them accurately are becoming acquired, mainly through the Global Arms Trade. This means that we must expect wars in the world to become increasingly violent and destructive. This book focuses on what the arms trade is and its impact on the world, the wars which have resulted or were sustained by this trade. It is necessary to know which countries sell arms and which ones buy. Also it is important to have some idea of how large the trade is. The international trade in arms has considerably increased since World War 2. Major weapons (aircraft, missiles, tanks and ships) probably account for about one-half of the total trade in weapons and equipment. Many countries and their respective Military-Industrial Complex are 'making a killing' in the world's largest trade in the buying and selling of military technology (weapons).

Security Without War Michael Shuman 2019-06-21 The Cold War may be over, but the United States is still practicing Cold War foreign policies. From the Persian Gulf to El Salvador, from Bosnia to Somalia, U.S. policymakers continue to rely on force, threats, arms, and military aid. A fundamental redefinition of national security-beyond war and militarization, beyond bilateralism, beyond sovereign states-is long overdue. In *Security Without War*, a dynamic author team lays out new principles and policies for the United States to adopt in a post-Cold War world. Shuman and Harvey encourage Americans to take account of all threats (not just military ones), to emphasize preventing conflicts over winning wars, to enhance every nation's security (including that of its enemies), to favour multilateral approaches over bilateral ones, and to promote greater citizen participation in foreign policy. Throughout, they show how military, political, economic, and environmental security interests are all linked-and how emphasizing one over the others can undermine the nation's safety. *Security Without War* brings

together for the first time the major elements of post-Cold War security thought. The authors show how a new framework for U.S. international relations can enhance U.S.-and indeed, global-security at a substantially lower cost.

International Conflict Resolution After the Cold War National Research Council 2000-11-07 The end of the Cold War has changed the shape of organized violence in the world and the ways in which governments and others try to set its limits. Even the concept of international conflict is broadening to include ethnic conflicts and other kinds of violence within national borders that may affect international peace and security. What is not yet clear is whether or how these changes alter the way actors on the world scene should deal with conflict: Do the old methods still work? Are there new tools that could work better? How do old and new methods relate to each other? *International Conflict Resolution After the Cold War* critically examines evidence on the effectiveness of a dozen approaches to managing or resolving conflict in the world to develop insights for conflict resolution practitioners. It considers recent applications of familiar conflict management strategies, such as the use of threats of force, economic sanctions, and negotiation. It presents the first systematic assessments of the usefulness of some less familiar approaches to conflict resolution, including truth commissions, "engineered" electoral systems, autonomy arrangements, and regional organizations. It also opens up analysis of emerging issues, such as the dilemmas facing humanitarian organizations in complex emergencies. This book offers numerous practical insights and raises key questions for research on conflict resolution in a transforming world system.

Rethinking the Unthinkable Ivo H. Daalder 2014-02-04 *Rethinking the Unthinkable* examines the future direction of nuclear arms control in the post-Cold War security environment. Believing that the new environment requires a radical rethinking of the purpose and role of nuclear weapons in international politics, the contributors address many fundamental issues influencing further US, Russian and European nuclear arms reductions. This volume is a product of the Project on

Rethinking Arms Control, sponsored by the Center for International and Security Studies in Maryland.

Global and Regional Approaches to Arms Control in the Middle East Gamal M. Selim 2013-07-11 Since the end of the Cold War, the Middle East has been the focus of various projects for the establishment of arms control (including CBMs) regimes. Whereas some of these projects were initiated at the global level, others were discussed and debated at the regional level. This book analyses the global and regional dynamics of arms control in the Middle East in the post-Cold War era. It examines American and European arms control projects, the contexts in which they were presented, the reactions of major regional actors, and their impacts on arms control efforts in the region. It assesses Arab perceptions of the motivations for and constraints on establishing arms control regimes. It also explores the prospects of regional arms control in the context of the ongoing Arab Spring with its ramifications for Arab regional politics, and provides a new perspective on arms control in the Middle East. This volume enriches the ongoing discourse, which to date has been dominated by mainly Western perspectives.

Peace, Security and Conflict Prevention Stockholm International Peace Research Institute 1998 *Peace, Security, and Conflict Prevention: SIPRI-UNESCO Handbook* is a comprehensive, concise volume on security and conflict prevention in the post-cold war period 1992-96. It is drawn from the results of SIPRI's research and includes chapters on major armed conflicts; armed conflict prevention, management and resolution; world military expenditure, arms production and the arms trade; nuclear, chemical, and biological weapons; the arms control and agreements currently in force and under negotiation; the United Nations Organization; and special studies of regional and subregionalsecurity in Europe and Asia. A detailed chronology lists the major events of 1992-96 related to peace, security, and conflict prevention. The book also includes a useful glossary of terms and acronyms used in the security literature and gives the membership of international organizations concerned with security issues.

SIPRI Yearbook 2019 Stockholm International Peace Research Institute 2019-10-29 The SIPRI Yearbook is as an authoritative and independent source of data and analysis on armaments, disarmament and international security. It provides an overview of developments in international security, weapons and technology, military expenditure, arms production and the arms trade, and armed conflicts and conflict management, along with efforts to control conventional, nuclear, chemical and biological weapons. This 50th edition of the SIPRI Yearbook covers developments during 2018, including - Armed conflicts and conflict management, with an overview of armed conflicts and peace processes as well as a focus on global and regional trends in peace operations - Military expenditure, international arms transfers and developments in arms production, - World nuclear forces, with an overview of each of the nine nuclear-armed states and their nuclear modernization programmes - Nuclear arms control, featuring North Korean-US nuclear diplomacy, developments in the INF Treaty and Russian-US nuclear arms control and disarmament, and implementation of Iran's nuclear deal - Chemical and biological security threats, including the investigation of allegations of chemical weapon use in the Middle East and the attempted assassination in the United Kingdom - Conventional arms control, with a focus on global instruments, including efforts to regulate lethal autonomous weapon systems and explosive weapons in populated areas, and dialogue on international cyber security - Dual-use and arms trade controls, including developments in the Arms Trade Treaty, multilateral arms embargoes and export control regimes, including the challenges of seeking to control transfers of technology as well as annexes listing arms control and disarmament agreements, international security cooperation bodies, and key events in 2018.

Conflict After the Cold War Richard K. Betts 2008 In the Nevada desert, an experiment has gone horribly wrong. A cloud of nanoparticles—micro-robots—has escaped from the laboratory. This cloud is self-sustaining and self-reproducing. It is intelligent and learns from experience. For all practical purposes, it is alive.

It has been programmed as a predator. It is evolving swiftly, becoming more deadly with each passing hour. Every attempt to destroy it has failed. And we are the prey.

The Handbook of European Defence Policies and Armed Forces Hugo Meijer 2018-06-20 The armed forces of Europe have undergone a dramatic transformation since the collapse of the Soviet Union. The Handbook of European Defence Policies and Armed Forces provides the first comprehensive analysis of national security and defence policies, strategies, doctrines, capabilities, and military operations, as well as the alliances and partnerships of European armed forces in response to the security challenges Europe has faced since the end of the cold war. A truly cross-European comparison of the evolution of national defence policies and armed forces remains a notable blind spot in the existing literature. The Handbook of European Defence Policies and Armed Forces aims to fill this gap with fifty-one contributions on European defence and international security from around the world. The six parts focus on: country-based assessments of the evolution of the national defence policies of Europe's major, medium, and lesser powers since the end of the cold war; the alliances and security partnerships developed by European states to cooperate in the provision of national security; the security challenges faced by European states and their armed forces, ranging from interstate through intra-state and transnational; the national security strategies and doctrines developed in response to these challenges; the military capabilities, and the underlying defence and technological industrial base, brought to bear to support national strategies and doctrines; and, finally, the national or multilateral military operations by European armed forces. The contributions to The Handbook collectively demonstrate the fruitfulness of giving analytical precedence back to the comparative study of national defence policies and armed forces across Europe.

The United States, Russia and Nuclear Peace Stephen J. Cimbala 2020-02-03 This book analyzes the United States and Russia's nuclear arms control and deterrence relationships and how these countries must lead current and prospective efforts to support future nuclear arms control and nonproliferation. The second

nuclear age, following the end of the Cold War and the demise of the Soviet Union, poses new challenges with respect to nuclear-strategic stability, deterrence and nonproliferation. The spread of nuclear weapons in Asia, and the potential for new nuclear weapons states in the Middle East, create new possible axes of conflict potentially stressful to the existing world order. Other uncertainties include the interest of major powers in developing a wider spectrum of nuclear weapons and delivery systems, possibly for use in limited nuclear wars, and the competitive technologies for antimissile defenses being developed and deployed by the United States and Russia. Other technology challenges, including the implications of cyberwar for nuclear deterrence and crisis management, are also considered. Political changes also matter. The early post-Cold War hopes for the emergence of a global pacific security community, excluding the possibility of major war, have been dashed by political conflict between Russia and NATO, by the roiled nature of American domestic politics with respect to international security, and by a more assertive and militarily competent China. Additionally, the study includes suggestions for both analysis and policy in order to prevent the renewed U.S.-Russian nuclear arms race and competition in new technologies. This volume would be ideal for graduate students, researchers, scholars and anyone who is interested in nuclear policy, international studies, and Russian politics.

Critical Reflections on Security and Change
Stuart Croft 2013-02-01 The contributors reflect critically on security studies since the 1980s. They conclude that analysts and policy-makers have not been able to respond well to the changes that have occurred and that they must revise their approach if they are to meet the challenges of the future.

Nuclear Weapons and Arms Control in South Asia After the Test Ban Stockholm International Peace Research Institute 1998 As the nuclear weapon states continue to reduce their nuclear arsenals and international efforts to prevent the proliferation of nuclear weapons are reinvigorated, South Asia remains a unique region almost entirely unencumbered by nuclear arms control. Despite the recent popularity of the notion that nuclear deterrence is stabilizing

the Indo-Pakistani conflict, there is good reason to believe that the risks of war and the use of nuclear weapons are not fully appreciated. Nevertheless, the prospects for negotiated measures to improve the situation are not good because of the domestic politics on both sides. Nuclear Weapons and Arms Control in South Asia after the Test Ban sheds new light on the risks of the current stand-off, the hidden costs of the nuclear options, and the domestic sources of the region's inertia, bringing together Indian, Pakistani and Chinese perspectives.

Post-conflict Disarmament, Demobilization and Reintegration Antonio Giustozzi 2016-04-08 This book revisits post-Cold War Disarmament Disintegration and Reintegration (DDR) programmes in the light of previous experiences of disarmament, demobilisation and reintegration. In the history of North America and Europe, in particular, such programmes had a major impact on state-building, contributing to the development of the welfare state, shaping political settlements and directing government policy to maintain social peace. The authors in this important book ask what is left of these state-building dimensions in contemporary DDR programmes and whether the constraints imposed by international organisations on DDR programmes have more negative effects than positive ones. The role of political leadership in DDR processes is highlighted: can bureaucratically-driven processes deliver success? Only if political elites take full control and manage DDR programmes can there be a lasting impact on state-building. Even then, most political elites avoid deep changes in their relationship with the veterans. Is there a chance of reshaping international intervention in such a way as to favour the development of a 'social contract' between political elites and veterans? In taking a historical perspective, this book is unique in the existing literature on DDR and will be essential reading for policy makers, students and scholars of conflict studies, and those working in NGOs, particularly donor agencies. This volume was produced with the contribution of the Crisis States Research Centre (LSE).

Taking Aim at the Arms Trade Doctor Anna Stavrianakis 2013-07-18 Taking Aim at The Arms Trade: NGOs, Global Civil Society and the World Military Order takes a critical look at the ways in

which NGOs portray the arms trade as a problem of international politics and the strategies they use to effect change. NGOs have been pivotal in bringing the suffering caused by the arms trade to public attention, documenting its negative impact on human rights, conflict, security and development around the world, and pushing for measures to control or eradicate the trade. Overall, however, their activity has helped sideline debate on Northern military predominance while facilitating intervention in the South based on liberal understandings of the arms trade, conflict, development and human rights. They thus contribute to the perpetuation of a hierarchical world military order and the construction of the South as a site of Northern benevolence and intervention. Stavrianakis exposes the tensions inherent in NGOs' engagement with the arms trade and argues for a re-examination of dominant assumptions about NGOs as global civil society actors.

Alternative Conventional Defense Postures in the European Theater: The impact of political change on strategy, technology, and arms control Hans Günter Brauch 1990

This volume examines NATO strategy and force posture alternatives in the light of changes that have taken place and which are taking place in Europe today. The authors offer their views on the nature of political change, changing military doctrines and changes in technology. NATO's future role in the new Europe which is beginning to emerge in the post-Cold War period is analyzed.

Security challenges after the cold war Czesław Mesjasz 1993

Ten Years After Helsinki Kari Mottola 2019-07-11 Divided between two military alliances, Europe has maintained stability based on political status quo and military power balance. However, European states—including neutral and nonaligned countries—have felt a need for a common policy to guarantee their security, and the Conference on Security and Cooperation in Europe (CSCE) was convened to address this concern. Ten years later, the authors of this study find that the outlines of a European security regime are indeed discernible. The conference in Helsinki initiated efforts for negotiated and controlled change in Europe. Contributors to this volume analyze the

achievements of CSCE, consider more recent models of collective or common security systems, and deal with political and military processes at work in Europe as well as relationships with great powers and the Third World. The role of Western Europe, and particularly Finland's role as an initiator of the CSCE process, receives special attention. Documentation of the tenth anniversary meeting and the CSCE process in general are also included.

Post-war Policy Issues in the Persian Gulf United States. Congress. House. Committee on Foreign Affairs. Subcommittee on Arms Control, International Security, and Science 1991
Russia and Europe Vladimir Georgievich Baranovskii 1997 Covering the historical background, domestic developments, the role of military factors, and Russia's immediate security environment, Russia and Europe provides a comprehensive analysis of the increasingly important security relationship between Russia and Europe. Particular attention is paid to Russia's relations with its Slavic neighbours, the Baltic and nordic countries, and the Caucasus. It concludes with an examination of Russia's present and potential relations with all the existing European security structures.

A Violent Peace Paul Rogers 1992 "What does the end of the Cold War mean for world peace? What kind of new world is being constructed out of the former East-West confrontation? The opportunities now exist to create a genuinely peaceful and just new world order. Paul Rogers and Malcolm Dando, widely respected defence analysts, show how this can be achieved." "A Violent Peace begins by examining threats to global stability in the post Cold War era. It looks at the transformation of the nuclear arms race in the 1980s. Do the current arms control processes really curb the development and deployment of the new weapons or will the armaments momentum built up in the last four decades result in more pressure for proliferation throughout the world?" "Recent events have focussed on the spread of nuclear, chemical and biological weapons, ballistic missiles and area-impact munitions. As the East-West rivalries appear to diminish, will the industrialised countries of the North slip into a new pattern of confrontation, with the development of military

force projection capabilities designed to 'keep the violent peace' in the Middle East and other parts of the Third World?" "Above all, in a world of finite resources and increased environmental limitations on economic growth, will conflict between the haves and the have-nots usher in a new world disorder just as the ending of the Cold War appeared to be offering a chance of international peace?" "The agenda set by the authors for coping with the challenges now facing the world community includes not only traditional security issues such as arms control but also the wider issues of poverty, the destruction of the environment and the North-South axis of conflict. The intense East-West confrontation over the past 40 years has dominated strategic thinking and excluded large sections of the world's population from consideration. It is now time to develop new thinking on international security to deal effectively with a changing but not necessarily a less dangerous world."--BOOK JACKET. The Art of War in the Age of Peace Michael O'Hanlon 1992-08-24 This study begins with a set of strategic assumptions--most notably that the risks of U.S.-Russian war are and will remain extremely low and that the U.S. military remains a stabilizing influence in many geographic theaters. O'Hanlon then shows that the United States' interests in the Third World, while nowhere truly vital, are sufficiently important to justify a measured degree of global military presence and engagement. Historical, political, and military analysis suggests that these interests can be protected efficiently and effectively with a U.S. military reduced in size by roughly 40 to 50 percent in most types of major combat forces, and by 95 percent in nuclear forces. In the realm of conventional forces, these cuts would be about twice as deep as those planned by Secretary of Defense Richard Cheney; in the nuclear realm they would be much deeper than those approved by the Bush administration. By contrast, analysis suggests that U.S. capabilities should be largely held constant--or in some cases even expanded--in logistics, intelligence and communications, R&D, and special forces. The resulting force posture would cost about \$200 billion in 1991 dollars

through the early years of the next century, and perhaps \$230 billion annually thereafter. O'Hanlon's is one of the first in-depth studies of how the U.S. military might be reconfigured for the post-Cold War world. This study will prove useful for defense policy makers at the specialized levels and for students of the guns vs. butter policy issues and debates.

Security and Arms Control in Post-confrontation Europe Jenonne Walker 1994 The new dangers and challenges to international security in Europe after the Cold War are examined in this book. The changing nature of Europe's security problems has necessitated new thinking among both civilians and the military about arms control, the problems it should address, the purposes it should serve, and even what should be called 'arms control' today. Arms control should be seen as encompassing all aspects of the military dimension of the endeavours to mitigate or mediate tensions within states and to keep them from turning violent. It entails joint management of the cold war legacy of nuclear and conventional weapons.

Security and Arms Control in Post-Confrontation Europe examines in particular the role which could and should be played by the Conference on Security and Co-operation in Europe (CSCE) for the prevention of intra-state armed conflicts.

Confidence- and Security-building Measures in the New Europe Zdzisław Lachowski 2004

A New Approach to Conventional Arms Control in Europe Samuel Charap 2021-09-30 Over 30 years after the end of the Cold War, military tensions have returned to Europe. Both the North Atlantic Treaty Organization (NATO) and Russia are boosting their deployments in close proximity to one another and in multiple domains. At the same time, a host of new or dramatically improved conventional capabilities have been fielded, introducing a significant level of uncertainty into the security environment. Meanwhile, political and military-to-military relations are at a post-Cold War low, with communication as the exception, not the norm, and the structure of interaction created by arms control and confidence and security-building measures almost entirely collapsed. Through a combination of interviews, workshops, and structured analysis on the causes of potential conflict, the authors of this report outline new

conventional arms control (CAC) measures to lower the risk of conflict in Europe. Although it once served as a cornerstone of European security, the current regional CAC regime is outdated and largely irrelevant to today's challenges. Rather than starting with the existing agreements, the authors begin with an investigation of the catalysts of possible conflict and build arms control policy options on that basis. How might specific changes in behavior, posture, presence, technology, or capabilities—and varying perceptions thereof—drive conflict? What capabilities or combination of capabilities are destabilizing, and why? And what CAC measures could be used to address these risks? The authors use the answers to these questions to suggest a menu of options for a new CAC regime that could address the regional security challenges of the 21st century.

SIPRI Yearbook 2015 Stockholm International Peace Research Institute 2015-10 The SIPRI Yearbook is known worldwide as an authoritative and independent source of data and analysis for politicians, diplomats, journalists, scholars, students and citizens on armaments, disarmament and international security. It provides an overview of developments in international security, weapons and technology, military expenditure, the arms trade and arms production, and armed conflicts, along with efforts to control conventional, nuclear, chemical and biological weapons. The first edition of the SIPRI Yearbook was released in 1969, with the aim of producing 'a factual and balanced account of a controversial subject—the arms race and attempts to stop it'. This 46th edition of the SIPRI Yearbook covers developments during 2014 including: DT Essays on the conflicts in Syria, Iraq and Ukraine, as well as studies on the relationship of gender equality to peace and armed conflict, and the diversity of peace and war in Africa DT East Asian and European security, as well as global and regional trends in peace operations, and development challenges in fragile states DT Military expenditure, arms production and international arms transfers DT World nuclear forces, with an overview of each of the nine nuclear-armed states DT Iran's nuclear programme and multilateral arms control and disarmament DT Implications of the Ebola

outbreak and the challenge of addressing CBW issues in conflict zones DT The Arms Trade Treaty, multilateral arms embargoes and export control regimes as well as a 10-year overview of patterns of armed violence, a summary of the Global Peace Index, and extensive annexes on arms control and disarmament agreements, international security bodies and events in 2014. **Conflict After the Cold War** Richard K. Betts 2017-03-27 Edited by one of the most renowned scholars in the field, Richard Betts' *Conflict After the Cold War* assembles classic and contemporary readings on enduring problems of international security. Offering broad historical and philosophical breadth, the carefully chosen and excerpted selections in this popular reader help students engage key debates over the future of war and the new forms that violent conflict will take. *Conflict After the Cold War* encourages closer scrutiny of the political, economic, social, and military factors that drive war and peace. New to the Fifth Edition: Original introductions to each of 10 major parts as well as to the book as a whole have been updated by the author. An entirely new section (Part IX) on "Threat Assessment and Misjudgment" explores fundamental problems in diagnosing danger, understanding strategic choices, and measuring costs against benefits in wars over limited stakes. 12 new readings have been added or revised: Fred C. Iklé, "The Dark Side of Progress" G. John Ikenberry, "China's Choice" Kenneth N. Waltz, "Why Nuclear Proliferation May Be Good" Daniel Byman, "Drones: Technology Serves Strategy" Audrey Kurth Cronin, "Drones: Tactics Undermine Strategy" Eyre Crowe and Thomas Sanderson, "The German Threat? 1907" Neville Henderson, "The German Threat? 1938" Vladimir Putin, "The Threat to Ukraine from the West" Eliot A. Cohen, "The Russian Threat" James C. Thomson, Jr., "How Could Vietnam Happen? An Autopsy" Stephen Biddle, "Afghanistan's Legacy" Martin C. Libicki, "Why Cyberdeterrence is Different" **European Security** Andrew M. Dorman 1995 Although the end of the Cold War cannot clearly be dated, there are certain points in recent history that constitute markers in its final stages. This book, taking the final date as 1989, offers a longer historical analysis in order to trace elements of continuity, as well as

discontinuity, across the Cold War and post-cold War periods.

European Security and Transatlantic Relations after 9/11 and the Iraq War H. Gärtner

2005-06-14 At a time of unprecedented turmoil in the transatlantic relationship, as America asserts its right to act unilaterally to defend itself against terrorism and Europeans are increasingly aggressive in promoting a multilateralist approach to security issues, this book examines the post-9/11 and Iraqi war security environment, especially the impact on NATO and transatlantic relations as the European Union seeks to build a unified foreign and defence policy that will enable Europeans to play a fuller role in the international system.

The CFE Treaty: a Cold War Anachronism?

Jeffrey D. McCausland 2013-01-28 On November 19, 1990 the Conventional Armed Forces in Europe (CFE) Treaty was signed in Paris following the successful completion of 20 months of negotiations between the members of NATO and the Warsaw Treaty Organization (WTO). At its completion, President Bush hailed the agreement as ending the ". . . military confrontation that has cursed Europe for decades." Despite the dramatic nature of this document, the large scale reduction required of all signatories, and the complex inspection regime it established, the completion of the treaty was overshadowed by the ongoing deterioration of the Warsaw Pact, end of the Berlin Wall, and impending conflict in the Persian Gulf between Iraq and the coalition headed by the United States. Even these events paled to insignificance in comparison to the dissolution of the Soviet Union roughly one year later. Consequently, many observers announced the imminent demise of the CFE Treaty. The London Times, for example, sounded a particularly distressing note when it announced: "Europe's most ambitious arms control treaty risks becoming unworkable because of the Soviet Union's disintegration." Almost paradoxically, the CFE Treaty has survived the early reports of its demise. This is perhaps testimony to its value and the relative importance participating states attach to it. Ongoing changes did slow its entry into force as it was not provisionally applied until July 17, 1992. It became legally binding on all parties 10

days after the last country deposited its instruments of ratification which was not until November 9, 1992. 3The purpose of this study is to examine the future viability of the CFE Treaty for the United States. This suggests two additional queries: Will the treaty be fully implemented within the 40 months allocated? If so, what are the prospects for future conventional arms control in Europe? The rapid pace of the CFE negotiations, the ability of participating states to deal with extraordinary change, and the steady progress towards full implementation illustrate many of the primary aspects of arms control in general and conventional arms control specifically. First, arms control only serves as a part of any nation's overall national security strategy. As such it is a "method" to be used in seeking the overall "objective" of improved security. It is not an objective in isolation. Consequently, though the focus of any negotiation is the details of the prospective agreement, the arms control process must always be consistent with the overall direction of national security strategy. Second, "arms control" differs significantly from "disarmament." While this may seem self-evident to most people, the terms are misused so frequently that it deserves emphasis. "Arms control" is a policy method whereby states seek through negotiations to improve their security. It can not change ideologies and may not reduce hostilities. Normally objectives are to improve predictability, diminish the possibility of miscalculation (particularly in a crisis), and reduce confrontation. "Disarmament," however, is either unilateral or imposed on states normally by the victors in war such as Germany and Japan after World War II or Iraq (to some degree) following the Gulf War. Third, arms control is a political process and can not be divorced from other aspects of a nation's security or foreign policy.

SIPRI Yearbook 2021 Institut international de recherches pour la paix 2021-09-21 The 51st edition of the SIPRI Yearbook analyses developments in 2019 in security and conflicts; military spending and armaments; non-proliferation; arms control; and disarmament. Managing Conflict in the New Europe F. Carr 2002-06-19 Since the end of the Cold War, international institutions have had to rise to

challenges of instability and insecurity in Europe. Fergus Carr and Theresa Callan examine the changing nature of European security, cooperation and conflict. A key theme is the development of the new European security architecture and the roles of NATO, the Organization for Security and Cooperation in Europe, the European Union and the United Nations as security providers in contemporary Europe.

The Rise and Fall of Cooperative Arms Control in Europe Ulrich Kuhn 2020-01-28 Thirty years after the fall of the Berlin Wall, America and Russia have again returned to conflict. But this renewed confrontation did not come out of the blue. Rather, it was preceded by a long period of stagnation and a final crisis in the realm of arms control. In particular, the agreements of cooperative arms control in Europe eroded after the turn of the millennium. Why did that neatly established network of security agreements collapse? In this volume, Ulrich Kuhn traces the rise and fall of cooperative arms control in Europe from the early Helsinki days to the Russian annexation of the Crimea in 2014. Applying a multi-theory approach in order to assess the foreign and security policies of the United States and Russia, the author not only answers who is to blame for the sorry state of arms control, but he also uncovers a regime complex that has so far remained unknown and that spans across various organisations and institutions.

The Rise and Decline of the Post-Cold War International Order Hanns W. Maull 2018-11 This book takes a bird's-eye view of what has been happening with the international order over the last quarter century. Looking at a number of its components, such as the regional orders of Europe, the Middle East, and East Asia, and international regimes dealing with nuclear weapons, climate change, and world trade, it maps the rise and decline of what is called the liberal international order, identifies causes of progress and failure, and draws this comparative analysis together in a comprehensive assessment and evaluation of the state and prospects of international order. Two chapters each are dedicated to analysing the two most important 'ordering powers', the United States and the People's Republic of China,

offering two different perspectives on the policies and strategies Washington and Beijing have pursued in the international order.

A New Approach to Conventional Arms Control in Europe Samuel Charap 2020 Over 30 years after the end of the Cold War, military tensions have returned to Europe. Both the North Atlantic Treaty Organization (NATO) and Russia are boosting their deployments in close proximity to one another and in multiple domains. At the same time, a host of new or dramatically improved conventional capabilities have been fielded, introducing a significant level of uncertainty into the security environment. Meanwhile, political and military-to-military relations are at a post-Cold War low, with communication as the exception, not the norm, and the structure of interaction created by arms control and confidence and security-building measures almost entirely collapsed. Through a combination of interviews, workshops, and structured analysis on the causes of potential conflict, the authors of this report outline new conventional arms control (CAC) measures to lower the risk of conflict in Europe. Although it once served as a cornerstone of European security, the current regional CAC regime is outdated and largely irrelevant to today's challenges. Rather than starting with the existing agreements, the authors begin with an investigation of the catalysts of possible conflict and build arms control policy options on that basis. How might specific changes in behavior, posture, presence, technology, or capabilities—and varying perceptions thereof—drive conflict? What capabilities or combination of capabilities are destabilizing, and why? And what CAC measures could be used to address these risks? The authors use the answers to these questions to suggest a menu of options for a new CAC regime that could address the regional security challenges of the 21st century.
