WE HEREBY REFUSE Frank Abe 2021-07-16 Three voices. Three acts of defiance. One mass injustice. The story of camp as you've never seen it before. Japanese Americans complied when evicted from their homes in World War II -- but many refused to submit to imprisonment in American concentration camps without a fight. In this groundbreaking graphic novel, meet JIM AKUTSU, the inspiration for John Okada's *No-No Boy*, who refuses to be drafted from the camp at Minidoka when classified as a non-citizen, an enemy alien; HIROSHI KASHIWAGI, who resists government pressure to sign a loyalty oath at Tule Lake, but yields to family pressure to renounce his U.S. citizenship; and MITSUYE ENDO, a reluctant recruit to a lawsuit contesting her imprisonment, who refuses a

chance to leave the camp at Topaz so that her case could reach the U.S. Supreme Court. Based upon painstaking research, *We Hereby Refuse* presents an original vision of America's past with disturbing links to the American present.

Minneapolis-St. Paul Then and Now® Bill Lindeke 2018-07-01

Locked together in an affectionate sibling rivalry, Minneapolis and its twin city St. Paul are constantly growing and changing. *Minneapolis-St. Paul Then and Now* shows how Minnesota's two largest cities have expanded along the banks of the Mississippi river and merged over the last 150 years. (Although if St. Paul had stuck with its original name it would be Minneapolis-Pig's Eye Landing, the name came from a notorious whiskey runner.) The long and cold Minnesota winters and humid summers have spawned an architecture to feat the weather with indoor shopping malls, domed stadia, skyways and a whole host of sports and celebrations that thrive in this climate. The St. Paul Winter Carnival is the oldest winter celebration in North America. Using archive photos pairing vintage photos from the nineteenth and twentieth centuries with their modern-day viewpoint, local author Bill Lindeke shows how the Twin Cities have developed from simple trading posts on the banks of the Mississippi in "the land of 10,000 lakes." Sites include: Forum Cafeteria, Lumber Exchange Building, Foshay Tower, City Hall, Pillsbury 'A' Mill, Milwaukee Depot, Metropolitan Building, Huber H. Humphre Metrodome, Triangle Bar, Loring Park, Basilica of St. Mary, University of Minnesota, Northrup Auditorium, Swedish Institute, Minneapolis Institute of Art, Hennepin and Lake, Lake Calhoun, Lake Harriet, Minnehaha Falls, Fort Snelling, Seven Corners, Landmark Center, Mickey's Diner, First State Capitol Building, Third State Capitol, Science Museum, St. Paul Union Depot and Castle Royal.

Seattle Clark Humphrey 2011 One of America's youngest big cities, Seattle has already seen a lot of growth and change in 160 years. Stunning buildings came up (and sometimes down). Parks were built on shipping docks, oil terminals, and airspace above a freeway. And despite Seattle's nature-loving reputation, its landscape was raised, lowered, and reshaped. Explore dozens of altered places throughout the Jet City with

Clark Humphrey, author of *Arcadia's* popular *Vanishing Seattle* and *Seattle's Belltown*.

Drawdown Paul Hawken 2017-04-18 • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world "At this point in time, the *Drawdown* book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope." —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* "There's been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom." —David Roberts, *Vox* "This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook." —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable

world.

House Lessons Erica Bauermeister 2020-03-24 A Real Simple Best Book of the Year from the New York Times bestselling author of *The Scent Keeper* A satisfying memoir about the power of home and the transformative act of restoring one Port Townsend, Washington house in particular "I think anyone who saves an old house has to be a caretaker at heart, a believer in underdogs, someone whose imagination is inspired by limitations, not endless options." In this mesmerizing memoir-in-essays, Erica Bauermeister renovates a trash-filled house in eccentric Port Townsend, Washington, and in the process takes readers on a journey to discover the ways our spaces subliminally affect us. A personal, accessible, and literary exploration of the psychology of architecture, as well as a loving tribute to the connections we forge with the homes we care for and live in, this book is designed for anyone who's ever fallen head over heels for a house. It is also a story of a marriage, of family, and of the kind of roots that settle deep into your heart. Discover what happens when a house has its own lessons to teach in this moving

and insightful memoir that ultimately shows us how to make our own homes (and lives) better.

Never Done Susan Strasser 2000-11 Finally back in print, with a new Preface by the author, this lively, authoritative, and pathbreaking study considers the history of material advances and domestic service, the "women's separate sphere," and the respective influences of advertising, home economics, and women's entry into the workforce. *Never Done* begins by describing the household chores of nineteenth-century America: cooking at fireplaces and on cast-iron stoves, laundry done with boilers and flatirons, endless water-hauling and fire-tending, and so on. Strasser goes on to explain and explore how industrialization transformed the nature of women's work. Easing some tasks and eliminating others, new commercial processes inexorably altered women's daily lives and relationships—with each other and with those they served.

Wetlands in a Dry Land Emily O'Gorman 2021-07-13 In the name of agriculture, urban growth, and disease control, humans have drained, filled, or otherwise destroyed nearly 87 percent of the world's wetlands over the past three centuries. Unintended consequences include biodiversity loss, poor water quality, and the erosion of cultural sites, and only in the past few decades have wetlands been widely recognized as worth preserving. Emily O'Gorman asks, What has counted as a wetland, for whom, and with what consequences? Using the Murray-Darling Basin—a massive river system in eastern Australia that includes over 30,000 wetland areas—as a case study and drawing on archival research and original interviews, O'Gorman examines how people and animals have shaped wetlands from the late nineteenth century to today. She illuminates deeper dynamics by relating how Aboriginal peoples acted then and now as custodians of the landscape, despite the policies of the Australian government; how the movements of water birds affected farmers; and how mosquitoes have defied efforts to fully understand, let

alone control, them. Situating the region's history within global environmental humanities conversations, O'Gorman argues that we need to understand wetlands as socioecological landscapes in order to create new kinds of relationships with and futures for these places.

Permanent Supportive Housing National Academies of Sciences, Engineering, and Medicine 2018-07-11 Chronic homelessness is a highly complex social problem of national importance. The problem has elicited a variety of societal and public policy responses over the years, concomitant with fluctuations in the economy and changes in the demographics of and attitudes toward poor and disenfranchised citizens. In recent decades, federal agencies, nonprofit organizations, and the philanthropic community have worked hard to develop and implement programs to solve the challenges of homelessness, and progress has been made. However, much more remains to be done. Importantly, the results of various efforts, and especially the efforts to reduce homelessness among veterans in recent years, have shown that the problem of homelessness can be successfully addressed. Although a number of programs have been developed to meet the needs of persons experiencing homelessness, this report focuses on one particular type of intervention: permanent supportive housing (PSH). Permanent Supportive Housing focuses on the impact of PSH on health care outcomes and its cost-effectiveness. The report also addresses policy and program barriers that affect the ability to bring the PSH and other housing models to scale to address housing and health care needs.

My Unforgotten Seattle RON. CHEW 2020-10 Third-generation Seattleite, historian, journalist, and museum visionary Ron Chew spent more than five decades fighting for Asian American and social justice causes in Seattle. In this deeply personal memoir, he documents the tight-knit community he remembers, describing small family shops, chop suey restaurants, and sewing factories now vanished. He untangles the mystery of his extended family's journey to America during the era of the Chinese Exclusion Act. Intimate profiles of his parents--a waiter and garment worker--and leaders like Bob Santos, Ruth Woo, Al Sugiyama, Roberto Maestas, and Kip Tokuda are set against the familiar backdrop

of local landmarks such as Sick's Stadium, Kokusai Theatre, Shorey's Bookstore, Higo Variety Store, Hong Kong Restaurant, and Chubby & Tubby. He highlights Seattle's unsung champions in the fight for racial inclusion, political empowerment, American ethnic studies, Asian American arts, Japanese American redress, and revitalization of the Chinatown-International District. Chew himself led a successful campaign to transform a historic hotel into the Wing Luke Museum's permanent home.

The City Is More Than Human Frederick L. Brown 2017-05-01 Winner of the 2017 Virginia Marie Folkins Award, Association of King County Historical Organizations (AKCHO) Winner of the 2017 Hal K. Rothman Book Prize, Western History Association Seattle would not exist without animals. Animals have played a vital role in shaping the city from its founding amid existing indigenous towns in the mid-nineteenth century to the livestock-friendly town of the late nineteenth century to the pet-friendly, livestock-averse modern city. When newcomers first arrived in the 1850s, they hastened to assemble the familiar cohort of cattle, horses, pigs, chickens, and other animals that defined European agriculture. This, in turn, contributed to the dispossession of the Native residents of the area. However, just as various animals were used to create a Euro-American city, the elimination of these same animals from Seattle was key to the creation of the new middle-class neighborhoods of the twentieth century. As dogs and cats came to symbolize home and family, Seattleites' relationship with livestock became distant and exploitative, demonstrating the deep social contradictions that characterize the modern American metropolis. Throughout Seattle's history, people have sorted animals into categories and into places as a way of asserting power over animals, other people, and property. In *The City Is More Than Human*, Frederick Brown explores the dynamic, troubled relationship humans have with animals. In so doing he challenges us to acknowledge the role of animals of all sorts in the making and remaking of cities.

Emerald Street Daudi J. Abe 2020 From the first rap battles in Seattle's Central District to the Grammy stage, hip hop has shaped urban life and the music scene of the Pacific Northwest for more than four decades. In the early 1980s, Seattle's hip-hop artists developed a community-based culture of stylistic experimentation and multiethnic collaboration.

Emerging at a distance from the hip-hop centers of New York City and Los Angeles, Seattle's most famous hip-hop figures, Sir Mix-A-Lot and Macklemore, found mainstream success twenty years apart by going directly against the grain of their respective eras. In addition, Seattle has produced a two-time world-champion breaking crew, globally renowned urban clothing designers, an international hip-hop magazine, and influential record producers. In *Emerald Street*, Daudi Abe chronicles the development of Seattle hip hop from its earliest days, drawing on interviews with artists and journalists to trace how the elements of hip hop--rapping, DJing, breaking, and graffiti--flourished in the Seattle scene. He shows how Seattle hip-hop culture goes beyond art and music, influencing politics, the relationships between communities of color and law enforcement, the changing media scene, and youth outreach and educational programs. The result is a rich narrative of a dynamic and influential force in Seattle music history and beyond. *Emerald Street* was made possible in part by a grant from 4Culture's Heritage Program.

The Sweet Hereafter Russell Banks 2011-09-27 In *The Sweet Hereafter*, Russell Banks tells a story that begins with a school bus accident. Using four different narrators, Banks creates a small-town morality play that addresses one of life's most agonizing questions: when the worst thing happens, who do you blame?

Seattleness Tera Hatfield 2018 This visually rich cultural atlas of Seattle

explores the mercurial nature of place through the lens of one of the fastest growing cities in America. Through both experiential and data-driven cartography, Seattleness lends itself to longtime residents, newcomers to the city, and those curious about the moody borough that has brought us airplanes, grunge, gourmet coffee, and e-commerce. Compelling infographic visuals emerge from deep dives into data, unraveling over 50 real and strange narratives about the green metropolis perched at the edge of the Salish Sea.

Lost Seattle Rob Ketcherside 2013-12-01 *Lost Seattle* traces the cherished places in a city that time, progress and fashion have swept aside before concerned citizens or the National Register of Historic Places could save them from the wrecker's ball or the graveyard of history. Organised chronologically starting with the earliest losses and ending with the latest, the book features much-loved insitutions that failed to stand the test of time, along with old-fashioned hotels and sports facilities that needed to be updated or built over. Buildings erected for the World's Fair Exposition are included in the book, along with movie theaters that the age of television made redundant. Losses include: Cable cars, Denny Hill, the Washington Hotel, the Fox Theater, Golden Potlatch, the losses of the Great Seattle Fire, Hotel Seattle, Jackson Ridge, Japantown, Joseph Mayer clock factory, Kalakala (Ferry), Kingdome, Carnegie Central Library, Longacres Racetrack, Luna Park,

Moran Brothers' Shipyards, Yesler Mansion, mud flats, the Waterfront Streetcar, and the Wawona (Schooner).

The River That Made Seattle BJ Cummings 2020-07-15 With bountiful salmon and fertile plains, the Duwamish River has drawn people to its shores over the centuries for trading, transport, and sustenance. Chief Se'alth and his allies fished and lived in villages here and white settlers established their first settlements nearby. Industrialists later straightened the river's natural turns and built factories on its banks, floating in raw materials and shipping out airplane parts, cement, and steel. Unfortunately, the very utility of the river has been its undoing, as decades of dumping led to the river being declared a Superfund cleanup site. Using previously unpublished accounts by Indigenous people and settlers, BJ Cummings's compelling narrative restores the Duwamish River to its central place in Seattle and Pacific Northwest history.

Writing from the perspective of environmental justice—and herself a key figure in river restoration efforts—Cummings vividly portrays the people and conflicts that shaped the region's culture and natural environment. She conducted research with members of the Duwamish Tribe, with whom she has long worked as an advocate. Cummings shares the river's story as a call for action in aligning decisions about the river and its future with values of collaboration, respect, and justice.

Washington Then & Now 2007 Despite the often astonishing changes in the landscape, authors Paul Dorpat and Jean Sherrard searched high and low, determined to find the same locations and angles as their predecessors. The result is a portrait that reflects not only the amazing changes brought on by time, but also a record of what has remained in this most scenic western state.

Seattle Then and Now Benjamin Lukoff 2015-05-01 Putting archive and contemporary photographs of the same landmark side-by-side, *Seattle Then and Now* charts the city's spectacular rise from a small lumber town to a booming international business center. Seattle's growth from a small lumber town to one of the world's most influential urban centers has been spectacular. Little more than a century ago, the city was made up of dirt roads and timber buildings. The arrival of the Great

Northern Railroad in 1893 and the start of the Klondike gold rush in 1897 changed all that. By 1914, just 25 years after the city suffered a devastating fire that burned the central business district to cinders, Seattle would have been almost unrecognizable to its early inhabitants. Streets had been raised, canals had been dug, and hills had been leveled, with the spoils going to create land out of the Elliott Bay mudflats. And the Smith Tower—the tallest building west of the Mississippi at the time—stood as a symbol of Seattle's new economic confidence.

Businesses in Seattle are still booming today, but they are now less dependent on location and more on inspiration. One can see the city as it looked when Denny Hill still rose above downtown, when the University of Washington occupied a mere city block, when Duwamish canoes still put in at Ballast Island, and when missiles were based in Magnolia and naval aircraft at Sand Point. Sites include Hooverville Docks, Elliott Bay, Front Street, Westlake Boulevard, Boeing, Union Station, Ferry Kalakala, Smith Tower, Pioneer Square, Madison Street, Fremont Bridge, and the Rainier Brewery.

Nisei Daughter Monica Itoi Sone 1979 A Japanese-American's personal account of growing up in Seattle in the 1930s and of being subjected to relocation during World War II.

Concrete Ghost. Seattle's Vanished Viaduct and Emerging Waterfront in the Paintings of Laura Hamje Mark Hinshaw 2020 Painter Laura Hamje's new book, 'Concrete Ghost: Seattle's Vanished Viaduct and Emerging Waterfront in the Paintings of Laura Hamje', brings the nostalgia and legacy of Seattle's now demolished Alaskan Way Viaduct rushing back. Hamje's paintings offer a vivid reminder of impermanence, Seattle's scrappy pioneering spirit then and now, and of miraculous ingenuity, and in a body of new work, explore the beginnings of the new waterfront-to-be. Nearly a year after the final column of this 70-year fixture of the Seattle waterfront was hauled out of the ground and cast heavily aside, a wild season of change locally and nationally has pushed memories of this once anchoring presence even farther away. Hamje's stunning paintings of the exhilaration, grit, unexpected beauty, and rumbling intensity of the Viaduct bring a simpler time to mind. In

iterations of oil paint, pastel, and gouache that have spanned years, Hamje has captured something of the past with a thoughtful eye on the future. The Viaduct, and the symbolism it held for many residents of old Seattle? the grungy art-fueled days of Seattle-past, with this hulking roadway sprawled alongside and overtop art galleries and recording studios, long-gone music venues and taverns? becomes a more distant memory with each passing day. But much of the determination and ingenuity it symbolized is more present now than ever, as residents slowly emerge from the city-wide shutdown and Seattle's artistic communities fill the streets with murals and color and calls of Seattle's past and continued tenacity. The book includes text by the artist, architect and author Mark Hinshaw, Nathan Vass, Baso Fibonacci, Mike Dumovich, Bryan Ohno, and editor Phil Bevis.

Native Seattle Coll Thrush 2017-05-01 This updated edition of Native Seattle brings the indigenous story to the present day and puts the movement of recognizing Seattle's Native past into a broader context. Native Seattle focuses on the experiences of local indigenous communities on whose land Seattle grew, accounts of Native migrants to the city and the development of a multi-tribal urban community, as well as the role Native Americans have played in the narrative of Seattle.

Homewaters David B. Williams 2021-04-24 Not far from Seattle skyscrapers live 150-year-old clams, more than 250 species of fish, and underwater kelp forests as complex as any terrestrial ecosystem. For millennia, vibrant Coast Salish communities have lived beside these waters dense with nutrient-rich foods, with cultures intertwined through exchanges across the waterways. Transformed by settlement and resource extraction, Puget Sound and its future health now depend on a better understanding of the region's ecological complexities. Focusing on the area south of Port Townsend and between the Cascade and Olympic mountains, Williams uncovers human and natural histories in, on, and around the Sound. In conversations with archaeologists, biologists, and tribal authorities, Williams traces how generations of humans have interacted with such species as geoducks, salmon, orcas, rockfish, and herring. He sheds light on how warfare shaped development and how

people have moved across this maritime highway, in canoes, the mosquito fleet, and today's ferry system. The book also takes an unflinching look at how the Sound's ecosystems have suffered from human behavior, including pollution, habitat destruction, and the effects of climate change. Witty, graceful, and deeply informed, Homewaters weaves history and science into a fascinating and hopeful narrative, one that will introduce newcomers to the astonishing life that inhabits the Sound and offers longtime residents new insight into and appreciation of the waters they call home. Seattle Then and Now James Madison Collins 2000 Readers can view Seattle before the futuristic Space Needle shot toward the heavens for the 1962 World's Fair in this book which places 70 modern photos of Seattle landmarks side by side with 70 archival shots from the 1850s to the 1950s.

Seattle in Black and White Joan Singler 2011-10-17 Seattle was a very different city in 1960 than it is today. There were no black bus drivers, sales clerks, or bank tellers. Black children rarely attended the same schools as white children. And few black people lived outside of the Central District. In 1960, Seattle was effectively a segregated town. Energized by the national civil rights movement, an interracial group of Seattle residents joined together to form the Seattle chapter of the Congress of Racial Equality (CORE). Operational from 1961 through 1968, CORE had a brief but powerful effect on Seattle. The chapter began by challenging one of the more blatant forms of discrimination in the city, local supermarkets. Located within the black community and dependent on black customers, these supermarkets refused to hire black employees. CORE took the supermarkets to task by organizing hundreds of volunteers into shifts of continuous picketers until stores desegregated their staffs. From this initial effort CORE, in partnership with the NAACP and other groups, launched campaigns to increase employment and housing opportunities for black Seattleites, and to address racial inequalities in Seattle public schools. The members of Seattle CORE were committed to transforming Seattle into a more integrated and just society. Seattle was one of more than one hundred cities to support an

active CORE chapter. *Seattle in Black and White* tells the local, Seattle story about this national movement. Authored by four active members of Seattle CORE, this book not only recounts the actions of Seattle CORE but, through their memories, also captures the emotion and intensity of this pivotal and highly charged time in America's history. Skid Road Murray Morgan 2018-03-15 *Skid Road* tells the story of Seattle from the bottom up, offering an informal and engaging portrait of the Emerald City's first century, as seen through the lives of some of its most colorful citizens. With his trademark combination of deep local knowledge, precision, and wit, Murray Morgan traces the city's history from its earliest days as a hacked-from-the-wilderness timber town, touching on local tribes, settlers, the lumber and railroad industries, the great fire of 1889, the Alaska gold rush, flourishing dens of vice, general strikes, the 1962 World's Fair, and the stuttering growth of the 1970s and '80s. Through it all, Morgan shows us that Seattle's one constant is change and that its penchant for reinvention has always been fueled by creative, if sometimes unorthodox, residents. With a new introduction by Pulitzer Prize-winning book critic Mary Ann Gwinn, this redesigned edition of Murray Morgan's classic work is a must for those interested in how Seattle got to where it is today.

The Lines That Make Us Nathan Vass 2021-07-16 Nathan Vass has been driving a Seattle city bus at night for the last decade. He began writing a popular blog, *The View from Nathan's Bus*, about his encounters with the riders of the No. 7 bus, which cuts through the heart of the city's Rainier Valley, one of the most racially and ethnically diverse zip codes in the US. Nathan's blog entries grew into this book. His stories and photography illuminate an overlooked part of urban life and highlight the simple connections people make on a daily basis. His depictions of

interactions on the city bus range from heartbreaking to hilarious to inspiring.

Hollow Kingdom Kira Jane Buxton 2019-08-06 A finalist for the 2020 Thurber Prize for American Humor! "The Secret Life of Pets meets The Walking Dead" in this big-hearted, boundlessly beautiful romp through the Apocalypse, where a foul-mouthed crow is humanity's only chance to survive Seattle's zombie problem (Karen Joy Fowler, PEN/Faulkner Award-winning author). S.T., a domesticated crow, is a bird of simple pleasures: hanging out with his owner Big Jim, trading insults with Seattle's wild crows (i.e. "those idiots"), and enjoying the finest food humankind has to offer: Cheetos ®. But when Big Jim's eyeball falls out of his head, S.T. starts to think something's not quite right. His tried-and-true remedies—from beak-delivered beer to the slobbering affection of Big Jim's loyal but dim-witted dog, Dennis—fail to cure Big Jim's debilitating malady. S.T. is left with no choice but to abandon his old life and venture out into a wild and frightening new world with his trusty steed Dennis, where he suddenly discovers that the neighbors are devouring one other. Local wildlife is abuzz with rumors of Seattle's dangerous new predators. Humanity's extinction has seemingly arrived, and the only one determined to save it is a cowardly crow whose only knowledge of the world comes from TV. What could possibly go wrong?
