Within the depths of this moving analysis, we shall discover the book is key harmonies, analyze its enthralling publishing design, and submit ourselves to the profound resonance that echoes in the depths of readers souls.

Consilience E. O. Wilson 2014-11-26 "A dazzling journey across the sciences and humanities in search of deep laws to unite them." --The Wall Street Journal One of our greatest living scientists--and the winner of two Pulitzer Prizes for *On Human Nature* and *The Ants*--gives us a work of visionary importance that may be the crowning achievement of his career. In *Consilience* (a word that originally meant "jumping together"), Edward O. Wilson renews the Enlightenment's search for a unified theory of knowledge in disciplines that range from physics to biology, the social sciences and the humanities. Using the natural sciences as his model, Wilson forges dramatic links between fields. He explores the chemistry of the mind and the genetic bases of culture. He postulates the biological principles underlying works of art from cave-drawings to *Lolita*. Presenting the latest findings in prose of wonderful clarity and oratorical eloquence, and synthesizing it into a dazzling whole, *Consilience* is science in the path-clearing traditions of Newton, Einstein, and Richard Feynman.

The Gale Encyclopedia of Psychology Bonnie B. Strickland 2001 Covers the entire spectrum of psychology, including: notable people, theories and terms; landmark case studies and experiments; applications of psychology in advertising, medicine and sports; and career information.

Why Evolution is True Jerry A. Coyne 2010-01-14 For all the discussion in the media about creationism and 'Intelligent Design', virtually nothing has been said about the evidence in question - the evidence for evolution by natural selection. Yet, as this succinct and important book shows, that evidence is vast, varied, and magnificent, and drawn from many disparate fields of science. The very latest research is uncovering a stream of evidence revealing evolution in action - from the actual observation of a species splitting into two, to new fossil discoveries, to the deciphering of the evidence stored in our genome. *Why Evolution is True* weaves together the many threads of modern work in genetics, palaeontology, geology, molecular biology, anatomy, and development to demonstrate the 'indelible stamp' of the processes first proposed by Darwin. It is a crisp, lucid, and accessible statement that will leave no one with an open mind in any doubt about the truth of evolution.

The Routledge Companion to Postmodernism Stuart Sim 2012-05-23 This fully revised third edition of *The Routledge Companion to Postmodernism* provides the ideal introduction to postmodernist thought. Featuring contributions from a cast of international scholars, the Companion contains 19 detailed essays on major themes and topics along with an A-Z of key terms and concepts. As well as revised essays on

philosophy, politics, literature, and more, the first section now contains brand new essays on critical theory, business, gender and the performing arts. The concepts section, too, has been enhanced with new topics ranging from hypermedia to global warming. Students interested in any aspect of postmodernism will continue to find this an indispensable resource.

Crossing the Rubicon Michael C. Ruppert 2004-09-15 The acclaimed investigative reporter and author of *Confronting Collapse* examines the global forces that led to 9/11 in this provocative exposé. The attacks of September 11, 2001 were accomplished through an amazing orchestration of logistics and personnel. *Crossing the Rubicon* examines how such a conspiracy was possible through an interdisciplinary analysis of petroleum, geopolitics, narco-traffic, intelligence and militarism—without which 9/11 cannot be understood. In reality, 9/11 and the resulting "War on Terror" are parts of a massive authoritarian response to an emerging economic crisis of unprecedented scale. Peak Oil—the beginning of the end for our industrial civilization—is driving the elites of American power to implement unthinkably draconian measures of repression, warfare and population control. *Crossing the Rubicon* is more than a story of corruption and greed. It is a map of the perilous terrain through which we are all now making our way.

Moving Beyond Prozac, DSM, and the New Psychiatry Bradley Lewis 2010-02-05 "Interesting and fresh--represents an important and vigorous challenge to a discipline that at the moment is stuck in its own devices and needs a radical critique to begin to move ahead." --Paul McHugh, Johns Hopkins University School of Medicine "Remarkable in its breadth--an interesting and valuable contribution to the burgeoning literature of the philosophy of psychiatry." --Christian Perring, Dowling College *Moving Beyond Prozac, DSM, and the New Psychiatry* looks at contemporary psychiatric practice from a variety of critical perspectives ranging from Michel Foucault to Donna Haraway. This contribution to the burgeoning field of medical humanities contends that psychiatry's move away from a theory-based model (one favoring psychoanalysis and other talk therapies) to a more scientific model (based on new breakthroughs in neuroscience and pharmacology) has been detrimental to both the profession and its clients. This shift toward a science-based model includes the codification of the Diagnostic and Statistical Manual of Mental Disorders to the status of standard scientific reference, enabling mental-health practitioners to assign a tidy classification for any mental disturbance or deviation. Psychiatrist and cultural studies scholar Bradley Lewis argues for "postpsychiatry," a new psychiatric practice informed by the insights of poststructuralist theory.

At War with Metaphor Erin Steuter 2009-07-15 When photographs documenting the torture and humiliation of prisoners at Abu Ghraib came to the attention of a horrified public, national and international voices were raised in shock, asking how this happened. *At War with Metaphor* offers an answer, arguing that the abuses of Abu Ghraib were part of a systemic continuum of dehumanization. This continuum has its roots in our public discussions of the war on terror and the metaphors through which they are repeatedly framed. Arguing earnestly and incisively that these metaphors, if left unexamined, bind us into a cycle of violence that will only be intensified by a responsive violence of metaphor, Steuter and Wills examine compelling examples of the images of animal, insect, and disease that inform, shape, and limit our understanding of the war on terror. Tying these images to historical and contemporary uses of propaganda through a readable, accessible analysis of media filters, *At War with Metaphor* vividly explores how news media, including

political cartoons and talk radio, are enmeshed in these damaging, dehumanizing metaphors. Analyzing media through the lenses of race and Orientalism, it invites us to hold our media and ourselves accountable for the choices we make in talking war and making enemies.

Beyond Jesus Patricia A. Pearce 2018-07-03 In the crucible of grief following a friend's death, Presbyterian pastor Patricia Pearce sensed a dimension of existence beneath her ordinary perception-and became resolved to discover it. She soon found herself in a vortex of revelatory dreams, synchronicities, energy openings, and insights that shattered her worldview, exposed a unified Reality of Love, and unveiled the illusory nature of the ego and the world it has created. Faced with these discoveries, she struggled to remain in a religion that, she now realized, has been shaped by the very ego consciousness Jesus transcended and urged others to abandon. Enlightening, revelatory, and bold, *Beyond Jesus* reveals how our political and religious institutions are an outward manifestation of the inner beliefs we hold about who we are, and that beneath the layers of dogma about Jesus lies a key to our spiritual evolution and the astonishing possibility it holds for the future.

Dark Ecology Timothy Morton 2016-04-12 Timothy Morton argues that ecological awareness in the present Anthropocene era takes the form of a strange loop or Möbius strip, twisted to have only one side. Deckard travels this oedipal path in *Blade Runner* (1982) when he learns that he might be the enemy he has been ordered to pursue. Ecological awareness takes this shape because ecological phenomena have a loop form that is also fundamental to the structure of how things are. The logistics of agricultural society resulted in global warming and hardwired dangerous ideas about life-forms into the human mind. Dark ecology puts us in an uncanny position of radical self-knowledge, illuminating our place in the biosphere and our belonging to a species in a sense that is far less obvious than we like to think. Morton explores the logical foundations of the ecological crisis, which is suffused with the melancholy and negativity of coexistence yet evolving, as we explore its loop form, into something playful, anarchic, and comedic. His work is a skilled fusion of humanities and scientific scholarship, incorporating the theories and findings of philosophy, anthropology, literature, ecology, biology, and physics. Morton hopes to reestablish our ties to nonhuman beings and to help us rediscover the playfulness and joy that can brighten the dark, strange loop we traverse.

How Are We to Live? Peter Singer 2010-03-19 Is there still anything worth living for? Is anything worth pursuing, apart from money, love, and caring for one's own family? Internationally known social philosopher and ethicist Peter Singer has an answer to these and other questions in this compelling new volume. If we can detach ourselves from our own immediate preoccupations and look at the world as a whole and our place in it, there is something absurd about the idea that people should have trouble finding something to live for. Singer suggests that people who take an ethical approach to life often avoid the trap of meaninglessness, finding a deeper satisfaction in what they are doing than those people whose goals are narrower and more self-centered. He spells out what he means by an ethical approach to life, and shows that it can bring about significant and far-reaching changes to one's life. After completing each section, the reader will be compelled to stop and ponder for a while. -San Antonio Current. . . extremely well written. -Mind (UK) Imagine that you could choose a book that everyone in the world would read. My choice would be this book by Peter Singer. It is a good philosophy book, which covers many historical, social, and biological issues with command and verve, but I would choose it because its persuasive power could change many people's lives for the better, both from their own point of view and from that of the world as a whole. -Ethics

Mirrors Eduardo Galeano 2009-05-26 Throughout his career, Eduardo Galeano has turned our understanding of history and reality on its head. Isabelle Allende said his works "invade the reader's mind, to persuade him or her to surrender to the charm of his writing and power of his idealism." *Mirrors*, Galeano's most ambitious project since *Memory of Fire*, is an unofficial history of the world seen through history's unseen, unheard, and forgotten. As Galeano notes: "Official history has it that Vasco Núñez Balboa was the first man to see, from a summit in Panama, the two oceans at once. Were the people who lived

there blind??" Recalling the lives of artists, writers, gods, and visionaries, from the Garden of Eden to twenty-first-century New York, of the black slaves who built the White House and the women erased by men's fears, and told in hundreds of kaleidoscopic vignettes, *Mirrors* is a magic mosaic of our humanity.

My Many Selves Wayne C. Booth 2006-01-31 "Wayne C. Booth's memoir, *My Many Selves*, is both an incisive self-examination and a creative approach to retelling his life. Writing his autobiography became a quest to harmonize the diverse, discordant parts of his identity and resolve the conflicts in what he thought and believed. To see himself clearly and whole, he broke his self down, personified the fragments, uncovered their roots in his life, and engaged his multiple identities and experiences in dialogue. Basic to his story and to its lifelong concern with ethics and rhetoric was his youth in rural Utah. He valued that background, while acknowledging its ambiguous influence on him, and continued to identify himself as Mormon, though he renounced most Latter-day Saint doctrines. Wayne Booth died in October 2005, soon after completing work on his autobiography."--BOOK JACKET.

King Leopold's Ghost Adam Hochschild 2019-05-14 With an introduction by award-winning novelist Barbara Kingsolver In the late nineteenth century, when the great powers in Europe were tearing Africa apart and seizing ownership of land for themselves, King Leopold of Belgium took hold of the vast and mostly unexplored territory surrounding the Congo River. In his devastatingly barbarous colonization of this area, Leopold stole its rubber and ivory, pummelled its people and set up a ruthless regime that would reduce the population by half. . While he did all this, he carefully constructed an image of himself as a deeply feeling humanitarian. Winner of the Duff Cooper Prize in 1999, *King Leopold's Ghost* is the true and haunting account of this man's brutal regime and its lasting effect on a ruined nation. It is also the inspiring and deeply moving account of a handful of missionaries and other idealists who travelled to Africa and unwittingly found themselves in the middle of a gruesome holocaust. Instead of turning away, these brave few chose to stand up against Leopold. Adam Hochschild brings life to this largely untold story and, crucially, casts blame on those responsible for this atrocity.

Murder in Amsterdam Ian Buruma 2007-08-28 A revelatory look at what happens when political Islam collides with the secular West Ian Buruma's *Murder in Amsterdam* is a masterpiece of investigative journalism, a book with the intimacy and narrative control of a crime novel and the analytical brilliance for which Buruma is renowned. On a cold November day in Amsterdam in 2004, the celebrated and controversial Dutch filmmaker Theo van Gogh was shot and killed by an Islamic extremist for making a movie that "insulted the prophet Mohammed." The murder sent shock waves across Europe and around the world. Shortly thereafter, Ian Buruma returned to his native land to investigate the event and its larger meaning as part of the great dilemma of our time.

No Sense of Obligation Matt Young 2001-10-31 Some of the Praise for *No Sense of Obligation* . . . fascinating analysis of religious belief -- Steve Allen, author, composer, entertainer [A] tour de force of science and religion, reason and faith, denoting in clear and unmistakable language and rhetoric what science really reveals about the cosmos, the world, and ourselves. Michael Shermer, Publisher, *Skeptic Magazine*; Author, *How We Believe: The Search for God in an Age of Science About the Book Rejecting*

belief without evidence, a scientist searches the scientific, theological, and philosophical literature for a sign from God--and finds him to be an allegory. This remarkable book, written in the laypersons language, leaves no room for unproven ideas and instead seeks hard evidence for the existence of God. The author, a sympathetic critic and observer of religion, finds instead a physical universe that exists reasonlessly. He attributes good and evil to biology, not to God. In place of theism, the author gives us the knowledge that the universe is intelligible and that we are grownups, responsible for ourselves. He finds salvation in the here and now, and no ultimate purpose in life, except as we define it.

The Un-Americans Joseph Litvak 2009-11-04 In a bold rethinking of the Hollywood blacklist and McCarthyite America, Joseph Litvak reveals a political regime that did not end with the 1950s or even with the Cold War: a regime of compulsory sycophancy, in which the good citizen is an informer, ready to denounce anyone who will not play the part of the earnest, patriotic American. While many scholars have noted the anti-Semitism underlying the House Un-American Activities Committee's (HUAC's) anti-Communism, Litvak draws on the work of Theodor W. Adorno, Hannah Arendt, Alain Badiou, and Max Horkheimer to show how the committee conflated Jewishness with what he calls "comic cosmopolitanism," an intolerably seductive happiness, centered in Hollywood and New York, in show business and intellectual circles. He maintains that HUAC took the comic irreverence of the "uncooperative" witnesses as a crime against an American identity based on self-repudiation and the willingness to "name names." Litvak proposes that sycophancy was (and continues to be) the price exacted for assimilation into mainstream American culture, not just for Jews, but also for homosexuals, immigrants, and other groups deemed threatening to American rectitude. Litvak traces the outlines of comic cosmopolitanism in a series of performances in film and theater and before HUAC, performances by Jewish artists and intellectuals such as Zero Mostel, Judy Holliday, and Abraham Polonsky. At the same time, through an uncompromising analysis of work by informers including Jerome Robbins, Elia Kazan, and Budd Schulberg, he explains the triumph of a stoolpigeon culture that still thrives in the America of the early twenty-first century.

The Center Cannot Hold Elyn R. Saks 2007-08-14 A much-praised memoir of living and surviving mental illness as well as "a stereotype-shattering look at a tenacious woman whose brain is her best friend and her worst enemy" (Time). Elyn R. Saks is an esteemed professor, lawyer, and psychiatrist and is the Orrin B. Evans Professor of Law, Psychology, Psychiatry, and the Behavioral Sciences at the University of Southern California Law School, yet she has suffered from schizophrenia for most of her life, and still has ongoing major episodes of the illness. The Center Cannot Hold is the eloquent, moving story of Elyn's life, from the first time that she heard voices speaking to her as a young teenager, to attempted suicides in college, through learning to live on her own as an adult in an often terrifying world. Saks discusses frankly the paranoia, the inability to tell imaginary fears from real ones, the voices in her head telling her to kill herself (and to harm others), as well as the incredibly difficult obstacles she overcame to become a highly respected professional. This beautifully written memoir is destined to become a classic in its genre.

Asymmetric Labors Tahl Kaminer 2018-10 The scenes are familiar ones: the scribe of the gallery plaque, the bespectacled figure hurrying from the archive to the classroom, the designer reluctantly forced to write to make her tenure case, the turtlenecked critic summoned to embellish the panel at a biennale. As in many professions, the architectural historian or theorist comes in many forms. Unlike most professions, though, the figure must be made to explain herself. Not at all wed to art historical methodologies, nor interested in drawing connections between his intellectual project and built offerings, all the while refusing to identify as either a scientist or humanist. Who is this person? What is their work?

The Optical Unconscious Rosalind E. Krauss 1994-07-25 The Optical Unconscious is a pointed protest against the official story of modernism and against the critical tradition that attempted to define modern art according to certain sacred commandments and self-fulfilling truths. The account of modernism presented here challenges the vaunted principle of "vision itself." And it is a very different story than we have ever read, not only because its insurgent plot and characters rise from below the calm surface of the known and law-like field of modernist painting, but because the voice is unlike anything we have heard before. Just as the artists of the optical unconscious assaulted the idea of autonomy and visual mastery, Rosalind Krauss abandons the historian's voice of objective detachment and forges a new style of writing in this book: art history that insinuates diary and art theory, and that has the gait and tone of fiction. The Optical Unconscious will be deeply vexing to modernism's standard-bearers, and to readers who have accepted the foundational principles on which their aesthetic is based. Krauss also gives us the story that Alfred Barr, Meyer Shapiro, and Clement Greenberg repressed, the story of a small, disparate group of artists who defied modernism's most cherished self-descriptions, giving rise to an unruly, disruptive force that persistently haunted the field of modernism from the 1920s to the 1950s and continues to disrupt it today. In order to understand why modernism had to repress the optical unconscious, Krauss eavesdrops on Roger Fry in the salons of Bloomsbury, and spies on the toddler John Ruskin as he amuses himself with the patterns of a rug; we find her in the living room of Clement Greenberg as he complains about "smart Jewish girls with their typewriters" in the 1960s, and in colloquy with Michael Fried about Frank Stella's love of baseball. Along the way, there are also narrative encounters with Freud, Jacques Lacan, Georges Bataille, Roger Caillois, Gilles Deleuze, and Jean-François Lyotard. To embody this optical unconscious, Krauss turns to the pages of Max Ernst's collage novels, to Marcel Duchamp's hypnotic Rotoreliefs, to Eva Hesse's luminous sculptures, and to Cy Twombly's, Andy Warhol's, and Robert Morris's scandalous decoding of Jackson Pollock's drip pictures as "Anti-Form." These artists introduced a new set of values into the field of twentieth-century art, offering ready-made images of obsessional fantasy in place of modernism's intentionality and unexamined compulsions.

Postpsychiatry Patrick Bracken 2005-12-22 For most of us the words madness and psychosis conjure up fear and images of violence. Using short stories, the authors consider complex philosophical issues from a fresh perspective. The current debates about mental health policy and practice are placed into their historical and cultural contexts.

The Publishers Weekly 1973

Character Strengths and Virtues Christopher Peterson 2004-04-08 "Character" has become a front-and-center topic in contemporary discourse, but this term does not have a fixed meaning. Character may be simply defined by what someone does not do, but a more active and thorough definition is necessary, one that addresses certain vital questions. Is character a singular characteristic of an individual, or is it composed of different aspects? Does character--however we define it--exist in degrees, or is it simply something one happens to have? How can character be developed? Can it be learned? Relatedly, can it be taught, and who might be the most effective teacher? What roles are played by family, schools, the media, religion, and the larger culture? This groundbreaking handbook of character strengths and virtues is the first progress report from a prestigious group of researchers who have undertaken the systematic classification and measurement of widely valued positive traits. They approach good character in terms of separate strengths--authenticity, persistence, kindness, gratitude, hope, humor, and so on--each of which exists in degrees. Character Strengths and Virtues classifies twenty-four specific strengths under six broad virtues that consistently emerge across history and culture: wisdom, courage, humanity, justice, temperance, and transcendence. Each strength is thoroughly examined in its own chapter, with special attention to its meaning, explanation, measurement, causes, correlates, consequences, and development across the life span, as well as to strategies for its deliberate cultivation. This book demands the attention of anyone interested in psychology and what it can teach about the good life.
