Advances in Critical Discourse Studies John Richardson 2016-03-16
Advances in Critical Discourse Studies collects ground-breaking scholarship and cutting-edge research which reflects significant shifts in Critical Discourse Studies, exploring the field from theoretical, analytic and methodological perspectives. Innovative chapters analyse a diverse range of discourses including journalism, mass media, political communication, policy documents, interviews, photographic archive and official bodies. The chapters in Part I explore Critical Discourse Studies from the point of view of history, memory, identity politics, and discourse, analysing salient examples of how memory and recollection of the past shapes understandings and narratives of the present, and visions of future societies. Part II explores problem-oriented analysis in Critical Discourse Studies and examines the roles that discourse plays in the formation, perpetuation and transformation of class relations. Finally, Part III explores a methodological issue by looking at the benefits of reinforcing fieldwork and ethnographic analysis in Critical Discourse Studies. The case studies throughout the book demonstrate that analytic research contributes significantly to the in-depth and in-situ research of a variety of increasingly complex social, historical, political and economic contexts. This book was originally published as three special issues of the journal Critical Discourse Studies.

Growing Pains Priscilla Ferguson Clement 1997 In *Growing Pains: Children in the Industrial Age, 1850-1890*, the respected scholar Priscilla Ferguson Clement presents an unparalleled survey of the experience of American childhood during this turbulent era. Approaching her subject thematically, Clement chronicles the situation of American children in the spheres of home life, schooling, employment, and play. Detailed attention is given to distilling and clarifying the historical events shaping children's lives during this period, from the Civil War's impact on the children of freed slaves to urbanization's effect on the children of unskilled immigrant laborers; from the rise of the Boy and Girl Scouts

and the American Federation of Labor to the grave economic downturns of the 1870s and 1880s; and from the child-rearing practices of Victorian times to the social institutions established to address child poverty and delinquency. Throughout, Clement imbues her text with crisp details and an arresting perspective on the ways in which race, sex, geography, and growing class distinctions influenced all facets of children's lives.

Science in the Service of Children, 1893-1935 Alice Smuts

2008-10-01 This book is the first comprehensive history of the development of child study during the early part of the twentieth century. Most nineteenth-century scientists deemed children unsuitable subjects for study, and parents were hostile to the idea. But by 1935, the study of the child was a thriving scientific and professional field. Here, Alice Boardman Smuts shows how interrelated movements—social and scientific—combined to transform the study of the child. Drawing on nationwide archives and extensive interviews with child study pioneers, Smuts recounts the role of social reformers, philanthropists, and progressive scientists who established new institutions with new ways of studying children. Part history of science and part social history, this book describes a fascinating era when the normal child was studied for the first time, a child guidance movement emerged, and the newly created federal Children's Bureau conducted pathbreaking sociological studies of children.

Road Map to Holland Jennifer Graf Groneberg 2008-04-01 An exceptional memoir that provides emotional insight and practical advice. It's like planning a trip to Italy, only to get off the plane and discover you're actually in Holland. You need a new road map, and fast... When Jennifer Groneberg and her husband learned they'd be having twin boys, their main concern was whether they'd need an addition on their house. Then, five days after Avery and Bennett were born, Avery was diagnosed with Down syndrome. Here, Jennifer shares the story of what followed. She dealt with doctors—some who helped, and some who were disrespectful or even dangerous. She saw some relationships in her life grow stronger, while severing ties with people who proved unsupportive. And she continues to struggle to find balance in the hardships and joys of raising a child with special needs. This book is a resource, a companion for parents, and above all, a story of the love between a mother and her son—as she learns that Avery is exactly the child she never knew she wanted.

The Study of Society (RLE Social Theory) F.C. Bartlett 2014-08-21

There is today widespread recognition of the fact that the future of human civilization depends to a high degree upon Man's capacity to understand the forces and factors which control his own behaviour. Such understanding must be achieved, not only as regards individual conduct, but equally as regards the mass phenomena resulting from group contacts, which are becoming increasingly intimate and influential. Until this present volume, nowhere have the three sciences of sociology, psychology and social anthropology been properly mobilized to deal with the social problems which yearly grow more pressing. The essays in this

book aim to address this.

Young Researchers Margaret Mallett 2002-02-07 Informational kinds of reading are crucial in every lesson. This book looks at how we can encourage children from the very beginning to think of themselves as young researchers using skills and strategies for clear purposes. It argues that the creative practitioner nurtures children's sense of wonder and curiosity about the world and all its phenomena. Packed full of advice on how to use the most stimulating and exciting texts and the liveliest approaches, the book celebrates the good practice of teachers and student teachers in a large number of classroom case studies. The content includes: * a summary of the recent developments and a framework of principles to inform good practice in this challenging aspect of literacy * chapters concentrating on particular age groups - beginning with the nursery and ending with the later primary years - and thus taking up an essentially developmental approach * an assessment of recent research and how findings can be put to practical and creative use in the classroom. A central message is that children benefit from collaborating with teachers and peers at every stage of finding out. The spoken language energises informational reading and writing, making the sharing of the fruits of children's research highly enjoyable. This book will inspire you and lead to the very best practice.

Doing Family Photography Gillian Rose 2016-05-13 Family photography, a ubiquitous domestic tradition in the developed world, is now more popular than ever thanks to the development of digital photography. Once uploaded to PCs and other gadgets, photographs may be stored, deleted, put in albums, sent to relatives and friends, retouched, or put on display. Moreover, in recent years family photographs are more frequently appearing in public media: on posters, in newspapers and on the Internet, particularly in the wake of disasters like 9/11, and in cases of missing children. Here, case study material drawn from the UK offers a deeper understanding of both domestic family photographs and their public display. Recent work in material culture studies, geography, and anthropology is used to approach photographs as objects embedded in social practices, which produce specific social positions, relations and effects. Also explored are the complex economies of gifting and exchange amongst families, and the rich geographies of domestic and public spaces into which family photography offers an insight.

In the Name of the Child Roger Cooter 2013-02-01 Recent revelations of child abuse have highlighted the need for understanding the historical background to current attitudes towards child health and welfare. In the Name of the Child explores a variety of professional, social, political and cultural constructions of the child in the decades around the First World War. It describes how medical and welfare initiatives in the name of the child were shaped and how changes in medical and welfare provisions were closely allied to political and ideological interests.
