Force Multiplying Technologies for Logistics Support to Military Operations National Research Council 2014-12-15 The mission of the United States Army is to fight and win our nation's wars by providing prompt, sustained land dominance across the full range of military operations and spectrum of conflict in support of combatant commanders. Accomplishing this mission rests on the ability of the Army to equip and move its forces to the battle and sustain them while they are engaged. Logistics provides the backbone for Army combat operations. Without fuel, ammunition, rations, and other supplies, the Army would grind to a halt. The U.S. military must be prepared to fight anywhere on the globe and, in an era of coalition warfare, to logistically support its allies. While aircraft can move large amounts of supplies, the vast majority must be carried on ocean going vessels and unloaded at ports that may be at a great distance from the battlefield. As the wars in Afghanistan and Iraq have shown, the costs of conveying vast quantities of supplies is tallied not only in economic terms but also in terms of lives lost in the movement of the materiel. As the ability of potential enemies to interdict movement to the battlefield and interdict movements in the battlespace increases, the challenge of logistics grows even larger. No matter how the nature of battle develops, logistics will remain a key factor. Force Multiplying Technologies for Logistics Support to Military Operations explores Army logistics in a global, complex environment that includes the increasing use of antiaccess and area-denial tactics and technologies by potential adversaries. This report describes new technologies and systems that would reduce the demand for logistics and meet the demand at the point of need, make maintenance more efficient, improve inter- and intratheater mobility, and improve near-real-

time, in-transit visibility. Force Multiplying Technologies also explores options for the Army to operate with the other services and improve its support of Special Operations Forces. This report provides a logistics-centric research and development investment strategy and illustrative examples of how improved logistics could look in the future.

Advances in Protective Structures Research Hong Hao 2012-08-17 The International Association of Protective Structures (IAPS) was launched on 1 October 2010 in Manchester, UK during the first International Conference of Protective Structures. The primary purpose of IAPS is to bring researchers and engineers working in the area of protective structures together, and to promote research and development work for better life and structure protection against shock and impact loads. More information can be found at <http://www.protectivestructures.org/contact.html>. Advances in Protective Structures Research is the first publication in a series of planned publications by IAPS. It contains 13 chapters prepared by active and prominent researchers around the world in the area of protective structures. It covers the dynamic material model and material properties, structural response analysis, structural reliability analysis, impact loads and ground shock. The contents of the book reflect well the current research achievements and practice in structural protection against blast and impact loads. They represent the advanced international research status in theoretical derivations, numerical simulations, and laboratory and field tests for structure protections.

Contemporary Terrorism Studies Diego Muro 2022 'Contemporary Terrorism Studies' is a comprehensive and accessible introduction to terrorism studies, examining key issues and debates, and featuring dedicated sections on terrorism and counter-terrorism. - When do individuals radicalise? - Can terrorism be rational? - How can we define terrorism? - What is the role of women in terrorism? - Can states be terrorist? World leading experts answer these questions in Contemporary Terrorism Studies, the first textbook to provide a multi-disciplinary, methodologically plural, and richly diverse introduction to terrorism studies. Contemporary Terrorism Studies covers the main approaches in terrorism studies, and is structured into three comprehensive sections. The first on 'The State of Terrorism Studies' maps the development and historical context of the discipline, and looks to the future of terrorism studies. Part two on 'Issues and Debates in Terrorism Studies' examines key contentious questions and debates such as the role of women, technology, and the media in terrorism. The final part, part three on 'Countering Terrorism' focuses specifically on counterterrorism: it's instruments, foreign policy, legal frameworks, and organisations. Overall, text will engage students, and establish a confident understanding of the subject.

The textbook has been developed with pedagogical features to help enhance student learning. Each chapter contains case studies to highlight real world examples of political violence, questions for reflection to encourage critical thinking, and suggestions for further reading which provide useful sources for further reading, essays, and exam preparation. Furthermore, a consistent, accessible tone, and jargon-free writing style makes Contemporary Terrorism Studies the clearest guide to understanding terrorism. Digital formats and resources Contemporary Terrorism Studies is available for students and institutions to purchase in a variety of formats, and is supported by online resources. - The e-book offers a mobile experience and convenient access along with hyperlinks to question pointers, and a library of web links, helping you to broaden your knowledge and understanding terrorism studies: www.oxfordtextbooks.co.uk/ebooks - Student resources: additional case studies, guidance on accessing databases, pointers for tackling the questions for reflection, and suggested web links organised by chapter are available online. - Lecturer resources: customisable PowerPoint slides to adapt and use in teaching

Evaluation of Alternative Technologies for Disposal of Liquid Wastes from the Explosive Destruction System

National Research Council 2002-01-20 Chemical warfare materiel (CWM) encompasses diverse items that were used during 60 years of efforts by the United States to develop a capability for conducting chemical warfare. Non-Stockpile CWM (NSCWM) is materiel not included in the current U.S. inventory of chemical munitions and includes buried materiel, recovered materiel, components of binary chemical weapons, former production facilities, and miscellaneous materiel. Because NSCWM is stored or buried at many locations, the Army is developing transportable treatment systems that can be moved from site to site as needed. Originally, the Army planned to develop three transportable treatment systems for nonstockpile chemical materiel: the rapid response system (RRS), the munitions management device (MMD), and the explosive destruction system (EDS). This report supplements an earlier report that evaluated eight alternative technologies for destruction of the liquid waste streams from two of the U.S. Army's transportable treatment systems for nonstockpile chemical materiel: the RRS and the MMD. This report evaluates the same technologies for the destruction of liquid waste streams produced by the EDS and discusses the regulatory approval issues and obstacles for the combined use of the EDS and the alternative technologies that treat the EDS secondary waste streams. Although it focuses on the destruction of EDS neutralent, it also takes into consideration the ability of posttreatment technologies to process the more dilute water rinses that are used in the EDS following treatment with a reagent.

Unmanned Combat Air Systems in Future Warfare C. Wills 2016-04-29 Control of the air is the foundation for all conventional military operations against an adversary with an air defence capability. In future warfare, will it be possible for Unmanned Combat Air Systems to undertake the tasks and accept most of the risks that, until now, have been the lot of military aviators?

Global Warming Could Have a Chilling Effect on the Military Richard F. Pittenger 2003 Most debates and studies addressing potential climate change have focused on the buildup of industrial greenhouse gases in the atmosphere and a gradual increase in global temperatures. But this "slow ramp" climate change scenario ignores recent and rapidly advancing evidence that Earth's climate repeatedly has become much colder, warmer, wetter, or drier-in time spans as short as three to 10 years. Earth's climate system appears to have sensitive thresholds, the crossing of which shifts the system into different modes of operation and triggers rapid, non-linear, and not necessarily global changes. This new paradigm of abrupt climate change does not appear to be on the radar screens of military planners, who treat climate change as a long term, low-level threat, with mostly sociological, not national security, implications. But intense and abrupt climate changes could escalate environmental issues into unanticipated security threats, and could compromise an unprepared military. The global ocean circulation system, often called the Ocean Conveyor, can change rapidly and shift the distribution patterns of heat and rainfall over large areas of the globe. The North Atlantic region is particularly vulnerable to abrupt regional coolings linked to ocean circulation changes. Global warming and ocean circulation changes also threaten the Arctic Ocean's sea ice cover. Beyond the abrupt climatic impacts, fundamental changes in ocean circulation also have immediate naval implications. Recent evidence suggests that the oceans already may be experiencing large-scale changes that could affect Earth's climate. Military planners should begin to consider potential abrupt climate change scenarios and their impacts on national defense.

Military Quantitative Physiology: Problems and Concepts in Military Operational Medicine The Borden Institute, U.S. Army Medical Department 2017-07-26 Few human activities demand or deserve as much attention of the citizens of a nation as the array of man-made and natural "environmental" threats faced by the soldiers and other warriors defending the nation - those that pose the risk of disease, injury, combat wounds, and even death. This book is the Army's first detailing research in computational physiology models and highlighting pivotal research. It outlines the extent to which basic and applied biomedical scientists, clinicians, modelers, and others strive to understand the extent of these threats, and provide intellectual and materiel options to mitigate these risks. This book summarizes major Army research efforts to quantify and model military relevant physiology. These chapters highlight the translation of this research into useful predictive tools. The tools are of importance to medical planners, materiel developers, commanders, and in many cases, every soldier. These chapters detail the experimental basis for many of the predictive tools that are currently in use. This book is written for military clinicians, and medical researchers who may be reasonably expected to explain some of the background, as well as those who will extend the research. Many people will find this book interesting because it details research on topics that affect everyone in everyday life, including how we sleep, eat, and exercise, as well as more specific topics such as the effects of caffeine on performance, risks associated with laser pointers, and even Army blast models that have influenced safety thresholds for car airbag deployments.

Helmand Mission Richard Doherty 2010-03-10 After celebrating St. Patrick's Day 2008, 1st Royal Irish Battlegroup deployed to Afghanistans Helmand province as part of 16 Air Assault Brigade. For six months the Royal Irish fought the Taliban in Helmand in some of the most difficult country on earth. At the same time the Battlegroup was training the nascent Afghan National Army (ANA) and many of its engagements were alongside Afghan soldiers. Well trained and with an operational maturity gained from deployments in every year but one since 1998, they were considered the unit in 16 Air Assault Brigade best suited to the

critical task of mentoring the ANA. One company deployed with 2 PARA Battlegroup in the Sangin valley. Its soldiers saw intense action against the Taliban, especially through the latter's use of IEDs (Improvised Explosive Devices). Another company was given the task of ensuring the safe passage of an additional generator for the Kajaki dam and was involved in heavy fighting while so doing. TA soldiers from 2 R Irish formed Imjin Company which provided security but also deployed on wider tasks. Professionalism, high levels of trust and the unique humor of Irish soldiers ensured that they had a successful tour and accomplished their missions. This is the stirring story of a regimental family at war and of those who sustained them, including their remarkable chaplain, Padre Albert Jackson, and the rear party which supported the families, especially those whose fathers or sons suffered injury or death. Above all, it is the story of a highly professional unit demonstrating its skills to the world and helping make Afghanistan a better place for its people.

The American Culture of War Adrian R. Lewis 2014-10-24 The American Culture of War presents a sweeping, critical examination of every major American war of the late 20th century: World War II, Korea, Vietnam, the First and Second Persian Gulf Wars, through to Operation Enduring Freedom. Lewis deftly

traces the evolution of US military strategy, offering an original and provocative look at the motives people and governments used to wage war, the debates among military personnel, the flawed political policies that guided military strategy, and the civilian perceptions that characterized each conflict. Now in its second edition, *The American Culture of War* has been completely revised and updated. New features include: Completely revised and updated chapters structured to facilitate students' ability to compare conflicts New chapters on Operation Iraqi Freedom and the current conflict in Afghanistan New conclusion discussing the American culture of war and the future of warfare Over fifty maps, photographs, and images to help students visualize material Expanded companion website with additional pedagogical material for both students and researchers. *The American Culture of War* is a unique and invaluable survey of over seventy years of American military history, perfect for any student of America's modern wars.
