Doris Lessing and Sufi Equilibrium S. Fahim 1994-07-12 The purpose of this study is to examine the rationale of Doris Lessing's development from Classical Realism to mysticism and forms of science fiction and to consider the unifying motifs that appear throughout her novels in her consistent search for Sufi Equilibrium. The four novels selected in this study represent significant stages in Lessing's work. Chapter one focuses on *The Grass is Singing*, which represents the author's early traditionally realistic writing, to show how far the preoccupations of Lessing's later novels find expression in this early work. Chapter two studies *The Golden Notebook*, which marks a turning point in formal structure in Lessing's canon and is selected as evidence of her interest in Sufism at that early stage. Chapter three concentrates on the study of *The Memoirs of a Survivor*, which has elicited a comparatively limited amount of criticism but which proves to be a major achievement when brought into line with Sufi methods of writing. Chapter four considers Lessing's science fiction series, 'Canopus in Argos', tracing sources from Oriental literature - a key which unlocks many areas of obscurity.

Evolution-Revolution Ervin Laszlo 2019-07-18 Originally published in 1971 Evolution - Revolution is an interdisciplinary volume examining inquiry around the central topic of evolution and revolution. Containing contributions from a number of eminent academics of the time, the book addresses the meaning and application of evolution and revolution in the context, not of what things are, or even how they behave, but how they become. The broad interdisciplinary range of essays explores this concept through the idea of development and change and argues that both change, and development must be measured against concepts of flux and that which endures. The editors of the book suggest that these are the 'invariants' which contemporary thinkers are beginning to accept as the process-counterparts of Platonic 'immutables'. Thus this volume examines the two 'immutables' of evolution and revolution. The book covers the concept through essays in science, philosophic concepts of rationalism and existentialism, art and religion.

Screening Space Vivian Carol Sobchack 1997 Screening Space deserves the attention of everyone in our field. It is an important book, a groundbreaking book, an indispensable book for critics of SF film, SF, or contemporary mass culture. Read it and you will never view SF film in quite the same way again. Science Fiction Studies A brilliant book, the best book yet on the American SF film.-Fantasy Review A closely reasoned, finely observed, entirely admirable piece of work. The best examination so far of the visual and aural iconography of SF film, and likely to remain the best for a long time. Journal of Film & TV Sobchack builds up her arguments meticulously. . . . she continually prods the reader to review his or her assumptions. Film Quarterly Her writing style is clear, witty, and concise as she shapes new definitions of the SF film. . . and ultimately rescues it from the benign neglect of film theorists and from the camp admiration of Trekkies and Trolls. Film Bulletin The first serious work to study the surprisingly close connection between science fiction films and social preconceptions. Los Angeles Times Book Review This history of American SF movies, which includes lots of stills, covers virtually all the classic films and discusses their import intelligently. . . . All in all, a valuable and fascinating book for film buff and SF fan alike.

The Animal Fable in Science Fiction and Fantasy Bruce Shaw 2010-04-23 Though animal stories and fables stretch back into the antiquity of ancient India, Persia, Greece and Rome, the reasons for writing them and their resonance for readers (and listeners) remain consistent to the present. This work argues that they were essential sources of amusement and instruction—and were also often profoundly unsettling. Such authors in the realm of the animal fable as Tolkien, Freud, Voltaire, Bakhtin, Cordwainer Smith, Karel Čapek, Vladimir Propp, and many more are discussed.

The Utopian Novel in America, 1886-1896 Jean Pfaelzer 1985-02-15 In the late 1800s, Americans flocked to cities, immigration, slums, and unemployment burgeoned, and America's role in foreign affairs grew. This period also spawned a number of fictional glimpses into the future. After the publication of Edward Bellamy's *Looking Backward* in 1888, there was an outpouring of utopian fantasy, many of which promoted socialism, while others presented refined versions of capitalism. Jean Pfaelzer's study traces the impact of the utopian novel and the narrative structures of these sentimental romances. She discusses progressive, pastoral, feminist, and apocalyptic utopias, as well as the genre's parodic counterpart, the dystopia.

Modern Mystery, Fantasy, and Science Fiction Writers Bruce Cassiday 1993 Perfect for reference or browsing, this volume includes some 80 authors and explores in excerpts of criticism (from books, essays, and reviews) their work and influence. Throughout, the coverage is international and the emphasis is on the many rare and insightful comments that are made on these authors who are increasingly accorded literary status and regarded in the critical mainstream.

The Last Frontier Karl S. Guthke 2019-05-15 The existence of intelligent extraterrestrial life has been a subject of debate since the dawn of recorded history. *The Last Frontier*, originally published in German in 1983 and now available in Helen Atkins's sensitive English translation, traces the development of the idea that Earth is not the only planet inhabited by intelligent beings, but that there might be a plurality or even an infinity of "worlds" with human or humanoid life. Focusing on the seventeenth to the twentieth century and taking into account theological, philosophical, scientific, popular, and literary writings from American, British, French, and German sources, Karl S. Guthke demonstrates the continuing importance of this question to the process of human self-definition.

J. G. Ballard D. Harlan Wilson 2017-11-10 Prophetic short stories and apocalyptic novels like *The Crystal*

World made J. G. Ballard a foundational figure in the British New Wave. Rejecting the science fiction of rockets and aliens, he explored an inner space of humanity informed by psychiatry and biology and shaped by Surrealism. Later in his career, Ballard's combustible plots and violent imagery spurred controversy--even legal action--while his autobiographical 1984 war novel *Empire of the Sun* brought him fame. D. Harlan Wilson offers the first career-spanning analysis of an author who helped steer SF in new, if startling, directions. Here was a writer committed to moral ambiguity, one who drowned the world and erected a London high-rise doomed to descend into savagery--and coolly picked apart the characters trapped within each story. Wilson also examines Ballard's methods, his influence on cyberpunk, and the ways his fiction operates within the sphere of our larger culture and within SF itself.
