The Cambridge Star Atlas

Wil Tirion 2001-03-08 The Cambridge Star Atlas covers the entire sky, both northern and southern latitudes, in an attractive format that is suitable for beginners and experienced astronomical observers. There is a series of monthly sky charts, followed by an atlas of the whole sky, arranged in 20 overlapping full colour charts. Each chart shows stars down to magnitude 6.5, together with about 900 non-stellar objects, such as clusters and galaxies, which can be seen with binoculars or a small telescope. There is a comprehensive map of the Moon's surface, showing craters and other named features. Wil Tirion is the world's foremost designer of astronomical maps. For this new edition he has devised improved versions of all the charts, and the text and star

Sky Gazing Meg Thacher 2020-10-13 The sun, moon, stars, and planets have been a source of wonder and fascination for as long as humans have inhabited the earth. In *Sky Gazing*, a highly visual guide to observing the sky with the naked eye, kids aged 9-14 will delve into the science behind what they see, whether they live in a dark rural setting or under the bright lights of the city. Exploring astronomical objects and events, this captivating book takes young readers on a tour of our solar system and deep space beyond, with explanations of how objects like Earth's moon were formed and the "why" behind phenomena such as eclipses, northern lights, and meteor showers. Curious sky gazers

Seeing Stars Shining Star Light 10 Constellation Cards

will discover how to find and observe planets — no binoculars or telescopes required! — and star charts will guide them in spotting constellations throughout the seasons and in both hemispheres while they learn about constellation myths from cultures around the world. Activities include tracking the cycles of the sun and moon and observing the sky during daylight hours or on a cloudy night, while astronomer profiles and sidebars on space technology and current issues such as light pollution help ground kids' discoveries in the ancient and enduring science of studying the sky.
