Maritime Psychology Malcolm MacLachlan
2017-01-21 This first-of-its-kind volume assembles current research on psychosocial issues and behavioral and safety concerns inherent in life and careers at sea. Focusing mainly on the commercial maritime transport sector, it sets out the basic concepts of maritime psychology in the contexts of health and occupational psychology and illustrates more expansive applications across nautical domains. A systems perspective and detailed case studies spotlight unique challenges to mariners' work performance, personal and environmental health and safety; it also provides support for psychometric assessment of seafarers, and describes emerging uses for the healing properties of the sea and sailing. The book is a springboard for continued research and practice development, further interaction between

psychology and the maritime world, and the continued broadening and deepening of the field. Among the topics covered: · Positive psychology and wellbeing at sea. · Transferring learning across safety critical industries. · Occupational stress in seafarers. · The psychology of ship architecture and design. · Motion sickness susceptibility and management at sea. · Risk communication during a maritime disaster. Written with clarity and nuance reflecting the vastness of marine experience, Maritime Psychology will be of interest to lecturers, researchers, and students of occupational and health psychology and maritime science, and to social and health scientists and practitioners in these and related fields.

Projecting Resilience Across the Mediterranean

Eugenio Cusumano 2019-08-06 This book examines the strategies pursued by the North Atlantic Treaty Organization (NATO) and the European Union (EU) to foster resilience in the Middle East, Maghreb and Sahel regions, ranging from military operations to humanitarian assistance. Thanks to its constructive ambiguity, resilience can bring together policy communities and connect sponsors of reform with local societies, but also bridge rifts between and within the EU and NATO. However, existing resilience-based policies are fraught with policy, theoretical and normative dilemmas. This volume examines these dilemmas by including international relations, European politics and area studies scholars, as well as practitioners from armed forces, international organisations, humanitarian NGOs and think tanks.

The Complete Sailing Manual Steve Sleight 2021-06-01 The only sailing manual you will ever need, covering everything from sailing basics to

making repairs and mastering navigation. The undisputed market leader in sailing guides, this fully revised and updated sailing manual, with a foreword by quadruple Olympic gold medallist Sir Ben Ainslie, answers questions about any sailing situation, with thorough coverage of all aspects of sailing and boat ownership. In DK's *The Complete Sailing Manual*, former British national champion Steve Sleight offers a wealth of expert advice and guidance in the form of a complete course on seamanship, which is brought to life with breathtaking action photography and clear instructions. Fully revised, this new edition features all of the latest developments in sailing--including foiling, long-distance cruising, and high-speed apparent-wind sailing--and navigation, with technology such as modern performance systems and electronic navigation. It also highlights the latest rules, regulations, and best practices necessary for every avid sailor, from the novice to the seasoned seaperson. Includes essential

information, handy diagrams, and step-by-step illustrations, The Complete Sailing Manual is the ultimate sailing ebook to keep by your side when you're out on the waves.

The Benthic Boundary Layer I. McCave

2012-12-06 The Conference on the Benthic Boundary Layer was held under the auspices of the NATO Science Committee as part of its continuing effort to promote the useful progress of science through international cooperation. Science Committee Conferences are deliberately designed to focus attention on unsolved problems, with carefully selected participants invited to provide complementary expertise from a variety of relevant disciplines. Through intensive discussion in small groups they seek to reach a consensus on assessments and recommendations for future research emphasis, which it is hoped will be of value to the larger scientific community. The subjects treated over the past few years have been as varied as science itself-e.g., computer software

engineering, chemical catalysis, and materials and energy research. The present effort evolved from informal discussions between marine geologists, chemists, and biologists which underlined the desirability of improved communication among those concerned with the benthic layer. In both scientific and technological terms this is an exciting frontier, rich in promise but poorly understood at present. It is particularly striking to realize that there are at least as many definitions of the benthic layer as there are disciplines involved, and it seemed clear that there was much to be gained by a detailed exchange of views on research capabilities, trends, and priorities. The results of the meeting appear to have confirmed the hopes of the sponsors.

The Duty of the Shipmaster to Render Assistance at Sea under International Law

Felicity G. Attard 2020-08-25 This study examines the shipmaster's duty to render assistance at sea under international law. This duty is assessed in the light of contemporary challenges posed by the phenomenon of irregular migration by sea, a problem which has intensified in recent years. The approach undertaken gives special emphasis to the shipmaster's responsibilities in rescue operations, and his role in the fulfilment of States' international obligations in the rendering of assistance.

Bibliography of Nautical Books Alan Obin 1999
Time Restored Jonathan Betts 2011-05-19 This is the story of Rupert T. Gould (1890-1948), the polymath and horologist. A remarkable man, Lt Cmdr Gould made important contributions in an extraordinary range of subject areas throughout his relatively short and dramatically troubled life. From antique clocks to scientific mysteries, from typewriters to the first systematic study of the Loch Ness Monster, Gould studied and

published on them all. With the title *The Stargazer*, Gould was an early broadcaster on the BBC's Children's Hour when, with his encyclopaedic knowledge, he became known as *The Man Who Knew Everything*. Not surprisingly, he was also part of that elite group on BBC radio who formed *The Brains Trust*, giving on-the-spot answers to all manner of wide ranging and difficult questions. With his wide learning and photographic memory, Gould awed a national audience, becoming one of the era's radio celebrities. During the 1920s Gould restored the complex and highly significant marine timekeepers constructed by John Harrison (1693-1776), and wrote the unsurpassed classic, *The Marine Chronometer, its History and Development*. Today he is virtually unknown, his horological contributions scarcely mentioned in Dava Sobel's bestseller *Longitude*. The TV version of *Longitude*, in which Jeremy Irons played Rupert Gould, did at least introduce Gould's name to a wider public.

Gould suffered terrible bouts of depression, resulting in a number of nervous breakdowns. These, coupled with his obsessive and pedantic nature, led to a scandalously-reported separation from his wife and cost him his family, his home, his job, and his closest friends. In this first-ever biography of Rupert Gould, Jonathan Betts, the Royal Observatory Greenwich's Senior Horologist, has given us a compelling account of a talented but flawed individual. Using hitherto unknown personal journals, the family's extensive collection of photographs, and the polymath's surviving records and notes, Betts tells the story of how Gould's early life, his naval career, and his celebrity status came together as this talented Englishman restored part of Britain's - and the world's - most important technical heritage: John Harrison's marine timekeepers.

Diversity in Coastal Marine Sciences Charles W. Finkl 2017-09-19 This book integrates a wide range of subjects into a coherent purview of the status of coastal marine science. Designed for the professional or specialist in coastal science, oceanography, and related disciplines, this work will appeal to workers in multidisciplinary fields that strive for practical solutions to environmental problems in coastal marine settings around the world. Examples are drawn from many different geographic areas, including the Black Sea region. Subject areas covered include aspects of coastal marine geology, physics, chemistry, biology, and history. These subject areas were selected because they form the basis for integrative investigation of salient

environmental problems or perspective solutions or interpretation of historical context.

The Broadview Anthology of British Literature: Concise Volume A - Second Edition Joseph Black

2011-09-08 In all six of its volumes The Broadview Anthology of British Literature presents British literature in a truly distinctive light. Fully grounded in sound literary and historical scholarship, the anthology takes a fresh approach to many canonical authors, and includes a wide selection of work by lesser-known writers. The anthology also provides wide-ranging coverage of the worldwide connections of British literature, and it pays attention throughout to issues of race, gender, class, and sexual orientation. It includes comprehensive introductions to each period, providing in each case an overview of the historical and cultural as well as the literary background. It features accessible and engaging headnotes for all authors, extensive explanatory annotations, and an unparalleled number of illustrations and contextual materials. Innovative, authoritative and comprehensive, The Broadview Anthology of British Literature has established itself as a leader in the field. The

full anthology comprises six bound volumes, together with an extensive website component; the latter has been edited, annotated, and designed according to the same high standards as the bound book component of the anthology, and is accessible by using the passcode obtained with the purchase of one or more of the bound volumes. The two-volume Broadview Anthology of British Literature, Concise Edition provides an attractive alternative to the full six-volume anthology. Though much more compact, the concise edition nevertheless provides instructors with substantial choice, offering both a strong selection of canonical authors and a sampling of lesser-known works. With an unparalleled number of illustrations and contextual materials, accessible and engaging introductions, and full explanatory annotations, the concise edition of this acclaimed Broadview anthology provides focused yet wide-ranging coverage for British literature survey courses. The second edition of this volume includes Chaucer's "To Rosamond,"

an expanded selection from Sidney's *Astrophil and Stella*, and additional material from Elizabeth I. The new edition also offers an expanded selection from *Paradise Lost* as well as Pope's *Essay on Criticism* and a new Contexts section on transatlantic literary currents. *Small Boats, Weak States, Dirty Money* Martin N. Murphy 2009 Many believe that pirates and other water-bound terrorists present a significant threat to international maritime security. Testing the validity of this claim, Martin N. Murphy scrutinizes recent incidents of maritime terrorism and locates the commonalities between pirates and maritime terrorists that enable them to commit their extensive crimes. Murphy's research opens up surprising sites of contact between pirates and wider criminal networks, organizations that pursue their corrupt agendas not only on sea but also on land. It is these relationships, Murphy argues, that bring about the destabilization of states and regions in which piracy occurs.

Murphy's most significant revelation is the way in which maritime criminality may disguise insurgent and terrorist activity, allowing such actors greater freedom to maneuver. Although these acts currently rank as a low-level threat, piracy feeds off of political upheaval. Before they can evolve into a truly powerful and dangerous force, however, maritime terrorists and insurgents will have to overcome significant operational and technical issues. They must also capture the attention of an international audience by committing atrocities at sea that are as devastating as those committed on land.

Yearbook of International Organizations

2014-2015 (Volume 4) Union of International Associations 2014-09-17 The Yearbook of International Organizations provides the most extensive coverage of non-profit international organizations currently available. Detailed profiles of international non-governmental and intergovernmental organizations (IGO), collected and documented by the Union of International

Associations, can be found here. In addition to the history, aims and activities of international organizations, with their events, publications and contact details, the volumes of the Yearbook include networks between associations, biographies of key people involved and extensive statistical data. Providing both an international organizations and research bibliography, Volume 4 cites over 46,000 publications and information resources supplied by international organizations, and provides nearly 18,000 research citations under 40 subject headings. This volume also includes a research bibliography on international organizations and transnational associations.

The Broadview Anthology of British Literature: Volume 1: The Medieval Period - Second Edition Joseph Black 2009-08-21 In all six of its volumes The Broadview Anthology of British Literature presents British literature in a truly distinctive light. Fully grounded in sound literary and historical scholarship, the anthology takes a

fresh approach to many canonical authors, and includes a wide selection of work by lesser-known writers. The anthology also provides wide-ranging coverage of the worldwide connections of British literature, and it pays attention throughout to issues of race, gender, class, and sexual orientation. It includes comprehensive introductions to each period, providing in each case an overview of the historical and cultural as well as the literary background. It features accessible and engaging headnotes for all authors, extensive explanatory annotations throughout, and an unparalleled number of illustrations and contextual materials, offering additional perspectives both on individual texts and on larger social and cultural developments. Innovative, authoritative, and comprehensive, The Broadview Anthology of British Literature embodies a consistently fresh approach to the study of literature and literary history. The second edition of volume one of The Broadview Anthology of British Literature

includes considerably more of Langland's *Pier's Plowman* than appears in the first edition, and includes for the first time the work of John Gower. Also new to the bound book component of the anthology is the York Crucifixion Play, and additional work by Chaucer. With this volume as with the others, material continues to be added on an ongoing basis to the website component of the anthology.

International Medical Guide for Ships World Health Organization 2007 This publication shows designated first-aid providers how to diagnose, treat, and prevent the health problems of seafarers on board ship. The New Humanitarians in International Practice Zeynep Sezgin 2015-12-14 As

humanitarian needs continue to grow rapidly, humanitarian action has become more contested, with new actors entering the field to address unmet needs, but also challenging long-held principles and precepts. This volume provides detailed empirical comparisons between emerging and traditional humanitarian actors. It sheds light on why and how the emerging actors engage in humanitarian crises and how their activities are carried out and perceived in their transnational organizational environment. It develops and applies a conceptual framework that fosters research on humanitarian actors and the humanitarian principles. In particular, it simultaneously refers to theories of organizational sociology and international relations to identify both the structural and the situational factors that influence the motivations, aims and activities of these actors, and their different levels of commitment to the traditional humanitarian principles. It thus elucidates the role of the

humanitarian principles in promoting coherence and coordination in the crowded and diverse world of humanitarian action, and discusses whether alternative principles and parallel humanitarian systems are in the making. This volume will be of great interest to postgraduate students and scholars in humanitarian studies, globalization and transnationalism research, organizational sociology, international relations, development studies, and migration and diaspora studies, as well as policy makers and practitioners engaged in humanitarian action, development cooperation and migration issues.

Mediated Bordering Sabrina Ellebrecht 2020

The external border of the EU remains under permanent construction. Sabrina Ellebrecht engages with two of its primary building sites - the European Border Surveillance System (Eurosur) and the Refugee Boat. She analyzes how the function and quality of the EU's current political border is crafted, shaped, produced and eventually stabilized through these two mediators. Eurosur and the Refugee Boat mediate a level of Europeanization which has hitherto - and would otherwise have - been impossible. While Eurosur mobilizes the limits of border policing in various ways, the Refugee Boat functions as the vacillating European Other to legitimize both control and humanitarian

interventions. The study shows the specific, if not constitutive, ambivalences of EU border policies, and explores the emergence of viapolitics.

Global Challenges in Maritime Security Lisa

Otto 2020-04-21 From pirates to smugglers, migrants to hackers, from stolen fish to smuggled drugs, the sea is becoming a place of increasing importance on the global agenda as criminals use it as a theatre to conduct their crimes unfettered. This volume sets out to provide an introduction to the key issues of pertinence in Maritime Security today. It demonstrates why the sea is a space of great strategic importance, and how threats to security at sea have a real impact for people around the world. It examines an array of challenges and threats to security playing out at

sea, including illegal, unreported and unregulated fishing, irregular migration, piracy, smuggling of illicit goods, and cyber security, while also looking at some of the mechanism and role-players involved in addressing these perils. Each chapter provides an overview of the issue it discusses and provides a brief case study to illustrate how this issue is playing out in real-life. This book thus allows readers an insight into this evolving multidisciplinary field of study. As such, it makes for an informative read for academics and practitioners alike, as well as policymakers and students, offering a well-rounded introduction of the main issues in current Maritime Security.
