Bad News for Outlaws Vaunda Micheaux Nelson 2013-11-01 Coretta Scott King Author Award Read about the fascinating life of Bass Reeves, who escaped slavery to become the first African American Deputy U.S. Marshal west of the Mississippi. Sitting tall in the saddle, with a wide-brimmed black hat and twin Colt pistols on his belt, Bass Reeves seemed bigger than life. Outlaws feared him. Law-abiding citizens respected him. As a peace officer, he was cunning and fearless. When a lawbreaker heard Bass Reeves had his warrant, he knew it was the end of the trail, because Bass always got his man, dead or alive. He achieved all this in spite of whites who didn't like the notion of a black lawman. Born into slavery in 1838, Bass had a hard and violent life, but he also had a strong sense of right and wrong that others admired. When Judge Isaac Parker tried to bring law and order to the lawless Indian Territories, he chose Bass to be a Deputy US Marshal. Bass would quickly prove a smart choice. For three decades, Bass was the most feared and respected lawman in the territories. He made more than 3,000 arrests, and though he was a crack shot and a quick draw, he only killed fourteen men in the line of duty. The story of Bass Reeves is the story of a remarkable African American and a remarkable hero of the Old West.

Ten Mile Day and the Building of Transcontinental Railroad Mary Ann Fraser 2009-07-01 One amazing day the East and West were linked for train travel in an event in which hundreds of Chinese and Irish workers raced to lay ten miles of track on the Transcontinental Railroad. --Valerie & Walter's Best Books for Children

The Chinese in America Iris Chang 2004-03-30 A quintessentially American story chronicling Chinese American achievement in the face of institutionalized racism by the New York Times bestselling author of *The Rape of Nanking* In an epic story that spans 150 years and continues to the present day, Iris Chang tells of a people's search for a better life—the determination of the Chinese to forge an identity and a destiny in a strange land and, often against great obstacles, to find success. She chronicles the many accomplishments in America of Chinese immigrants and their descendents: building the infrastructure of their adopted country, fighting racist and exclusionary laws and anti-Asian violence, contributing to major scientific and technological advances, expanding the literary canon, and influencing the way we think about racial and ethnic groups. Interweaving political, social, economic, and cultural history, as well as the stories of individuals, Chang offers a bracing view not only of what it means to be Chinese American, but also of what it is to be American.

Iron Women Chris Enss 2021-03-01 **2022 Will Rogers Medallion Award

Silver Winner for Western Non-Fiction** When the last spike was hammered into the steel track of the Transcontinental Railroad on May 10, 1869, at Promontory Point, Utah, Western Union lines sounded the glorious news of the railroad's completion from New York to San Francisco. For more than five years an estimated four thousand men mostly Irish working west from Omaha and Chinese working east from Sacramento, moved like a vast assembly line toward the end of the track. Editorials in newspapers and magazines praised the accomplishment and some boasted that the work that "was begun, carried on, and completed solely by men." The August edition of Godey's Lady's Book even reported "No woman had laid a rail and no woman had made a survey." Although the physical task of building the railroad had been achieved by men, women made significant and lasting contributions to the historic operation. However, the female connection with railroading dates as far back as 1838 when women were hired as registered nurses/stewardesses in passenger cars. Those ladies attended to the medical needs of travelers and also acted as hostesses of sorts helping passengers have a comfortable journey. Beyond nursing and service roles, however, women played a larger part in the actual creation of the rail lines than they have been given credit for. Miss E. F. Sawyer became the first female telegraph operator when she was hired by the Burlington Railroad in Montgomery, Illinois, in 1872. Eliza Murfey focused on the mechanics of the railroad, creating devices for improving the way bearings on a rail wheel attached to train cars responded to the axles. Murfey held sixteen patents for her 1870 invention. In 1879, another woman inventor named Mary Elizabeth Walton developed a system that deflected emissions from the smoke stacks on railroad locomotives. She was awarded two patents for her pollution reducing device. Their stories and many more are included in this illustrated volume celebrating women and the railroad.

Iron Muse Glenn Willumson 2013-04-12 The construction of the transcontinental railroad (1865-1869) marked a milestone in United States history, symbolizing both the joining of the country's two coasts and the taming of its frontier wilderness by modern technology. But it was through the power of images—and especially the photograph—that the railroad attained its iconic status. Iron Muse provides a unique look at the production, distribution, and publication of images of the transcontinental railroad: from their use as an official record by the railroad corporations, to their reproduction in the illustrated press and travel guides, and finally to their adaptation to direct sales and albums in the late nineteenth and twentieth centuries. Tracing the complex relationships and occasional conflicts between photographer, publisher, and curator as they crafted the photographs—different meanings over time, Willumson provides a comprehensive portrayal of the creation and evolution of an important slice of American visual culture.

Locomotive Brian Floca 2013-09-03 The Caldecott Medal Winner, Sibert Honor Book, and New York Times bestseller *Locomotive* is a rich and detailed sensory exploration of America's early railroads, from the creator of the "stunning" (Booklist) *Moonshot*. It is the summer of 1869, and trains, crews, and family are traveling together, riding America's brand-new transcontinental railroad. These pages come alive with descriptive details of the journey: the sounds, speed, and strength of the mighty locomotives; the work that keeps them moving; and the thrill of travel from plains to mountain to ocean. Come sit inside the caboose, feel

the heat of the engine, watch the landscape race by. Come ride the rails, come cross the young country!

Alice Across America Sarah Glenn Marsh 2020-02-04 Writer Sarah Glenn Marsh and illustrator Gilbert Ford's *Alice Across America* is a nonfiction picture book account of maverick Alice Ramsey, the first woman to drive a car across America in 1909. When Alice Ramsey was little, she loved to ride horses. As she grew up, more people were driving cars. From the moment Alice slid behind the wheel, she was crazy about cars. So when the Maxwell-Briscoe Company challenged her to drive one of their new cars across the country as a promotional ploy to prove that even a lady could do it, Alice daringly accepted. With several women by her side, these brazen drivers sustained many hardships over the course of a remarkable two-month journey and far surpassed all expectations. With a clever blend of women's history, technological history, and American roading geography, this is a celebration of unstoppable women making strides in twentieth-century America. The Age of Gold H. W. Brands 2008-12-10 From the two-time Pulitzer Prize finalist, bestselling historian, and author of *Our First Civil War*—the epic story of the California Gold Rush, “a fine, robust telling of one of the greatest adventure stories in history” (David McCullough, Pulitzer Prize-winning author of *John Adams*). The California Gold Rush inspired a new American dream—the “dream of instant wealth, won by audacity and good luck.” The discovery of gold on the American River in 1848 triggered the most astonishing mass movement of peoples since the Crusades. It drew fortune-seekers from the ends of the earth, accelerated America's imperial expansion, and exacerbated the tensions that exploded in the Civil War. H.W. Brands tells his epic story from multiple perspectives: of adventurers John and Jessie Fremont, entrepreneur Leland Stanford, and the wry observer Samuel Clemens—side by side with prospectors, soldiers, and scoundrels. He imparts a visceral sense of the distances they traveled, the suffering they endured, and the fortunes they made and lost. Impressive in its scholarship and overflowing with life, *The Age of Gold* is history in the grand traditions of Stephen Ambrose and David McCullough.

Chinese American Voices Judy Yung 2006 Offering a textured history of the Chinese in America since their arrival during the California Gold Rush, this work includes letters, speeches, testimonies, oral histories, personal memoirs, poems, essays, and folk songs. It provides an insight into immigration, work, family and social life, and the longstanding fight for equality and inclusion.

A Nation of Steel Thomas J. Misa 1998-09-04 From the age of railroads through the building of the first battleships, from the first skyscrapers to the dawning of the age of the automobile, steelmakers proved central to American industry, building, and transportation. In *A Nation of Steel* Thomas Misa explores the complex interactions between steelmaking and the rise of the industries that have characterized modern America. *A Nation of Steel* offers a detailed and fascinating look at an industry that has had a profound impact on American life.

The Chinese and the Iron Road Gordon H. Chang 2019 This landmark volume sheds light on the lives and experiences of the Chinese workers who made up 90% of the workforce that built the Central Pacific Railroad—but who have been little understood and largely invisible in traditional accounts of the building of the First Transcontinental Railroad.

Ghosts of Gold Mountain Gordon H. Chang 2019 A groundbreaking, breathtaking history of the Chinese workers who built the Transcontinental Railroad, helping to forge modern America only to disappear into the shadows of history until now.

Literature Connections to American History K6 Lynda G. Adamson 1997-09-15 Identifying thousands of historical fiction novels, biographies, history trade books, CD-ROMs, and videotapes, this book helps you locate resources on American history for students. Each book presents information in two sections. In the first part, titles are listed according to grade levels within eras and further organized according to product type. The books cover American history from North America Before 1600 and The American Colonies, 1600-1774 to The Mid-Twentieth Century, 1946-1975 and Since 1975. The second section has annotated bibliographies that describe each title and includes publication information and awards won. The focus is on books published since 1990, and all have received at least one favorable review. Some books with more illustration than text will be valuable for enticing slow or reticent readers. An index helps users find resources by author, title, or biographical subject.

Connecting the Coasts Norma Lewis 2014-07-01 "Examines the Transcontinental Railroad by discussing why it was needed and the immediate and lasting effects it had on the nation as well as the people and places involved."--

My Grandfather's War Glyn Harper 2018-06-12 The award-winning team of Glyn Harper and Jenny Cooper share this poignant story about a Vietnam veteran and his relationship with his granddaughter. While the relationship is a positive one, the young girl senses her grandfather's pain and is curious to find out the cause of it. As she innocently seeks answers, she unknowingly opens old wounds and discovers her grandfather's sadness is a legacy of the Vietnam War and his experiences there. This is a sensitive exploration of the lingering cost of war and of the PTSD so many returned servicemen experience. Released to coincide with the 50th anniversary of the Battle of Khe Sanh (the Vietnam War's longest battle), *My Grandfather's War* also sheds light on a war that is not always remembered in the same way that the world wars and other conflicts are. Many who served experience a sense of betrayal at the treatment they received on their return, as the conflict came to be regarded as the 'unpopular' war, and this is covered in a child-friendly way in a note at the back of the book.

Hell on Wheels Dick Kreck 2016-03-23 Overnight settlements, better known as "Hell on Wheels," sprang up as the transcontinental railroad crossed Nebraska and Wyoming. They brought opportunity not only for legitimate business but also for gamblers, land speculators, prostitutes, and thugs. Dick Kreck tells their stories along with the heroic individuals who managed, finally, to create permanent towns in the interior West.

Integrative Strategies for the K-12 Social Studies Classroom

Timothy Lintner 2013-03-01 While the concept of integration or an interdisciplinary curriculum has been around for decades, the purposeful practice of integration is a relatively new educational endeavor. Though classroom teachers often say they “integrate,” there generally seems to be a lack of understanding of what this thing called integration is (theory) and what it is supposed to look like in the classroom (practice). Arguably, no other discipline has felt the pressure to integrate more than social studies. Marginalized by federal initiatives such as No Child Left Behind and suffering from a general crisis of credibility, social studies has been pushed further and further to the proverbial back burner of educational importance. Yet regardless of perspective or position, social studies remains ripe for integration. The crux of this book is to provide educators insights and strategies into how to integrate social studies with other discipline areas. Calling upon national experts in their respective fields, each chapter chronicles the broad relationship between individual content areas and social studies. Multiple examples of integrative opportunities are included. At the end of each chapter is a series of grade-specific integrative lesson plans ready for implementation. This book was purposefully designed as a how-to, hands-on, ready-reference guide for educators at all stages and all levels of teaching.

Railroaded: The Transcontinentals and the Making of Modern America Richard White 2011-05-31 A Finalist for the Pulitzer Prize: "A powerful book, crowded with telling details and shrewd observations." —Michael Kazin, *New York Times Book Review* This original, deeply researched history shows the transcontinentals to be pivotal actors in the making of modern America. But the triumphal myths of the golden spike, robber barons larger than life, and an innovative capitalism all die here. Instead we have a new vision of the Gilded Age, often darkly funny, that shows history to be rooted in failure as well as success.

Ten Mile Day and the Building of the Transcontinental Railroad Mary Ann Fraser 1993 Chronicles the race to build the first railroad to cross the North American continent.

Travels in Siberia Ian Frazier 2010-10-12 A Dazzling Russian travelogue from the bestselling author of *Great Plains* In his astonishing new work, Ian Frazier, one of our greatest and most entertaining storytellers, trains his perceptive, generous eye on Siberia, the storied expanse of Asiatic Russia whose grim renown is but one explanation among hundreds for the region's fascinating, enduring appeal. In *Travels in Siberia*, Frazier reveals Siberia's role in history—its science, economics, and politics—with great passion and enthusiasm, ensuring that we'll never think about it in the same way again. With great empathy and epic sweep, Frazier tells the stories of Siberia's most famous exiles, from the well-known—Dostoyevsky, Lenin (twice), Stalin (numerous times)—to the lesser known (like Natalie Lopukhin, banished by the empress for copying her dresses) to those who experienced unimaginable suffering in Siberian camps under the Soviet regime, forever

immortalized by Aleksandr Solzhenitsyn in *The Gulag Archipelago*. *Travels in Siberia* is also a unique chronicle of Russia since the end of the Soviet Union, a personal account of adventures among Russian friends and acquaintances, and, above all, a unique, captivating, totally Frazierian take on what he calls the "amazingness" of Russia—a country that, for all its tragic history, somehow still manages to be funny. *Travels in Siberia* will undoubtedly take its place as one of the twenty-first century's indispensable contributions to the travel-writing genre.

Ten Mile Day Mary Ann Fraser 2016-08-02 On May 10, 1869, the final spike in North America's first transcontinental railroad was driven home at Promontory Summit, Utah. Illustrated with the author's carefully researched, evocative paintings, here is a great adventure story in the history of the American West—the day Charles Crocker staked \$10,000 on the crews' ability to lay a world record ten miles of track in a single, Ten Mile Day.

The Last River Stuart Waldman 2005 Learn about the famous explorer and his adventures.

Railroad Fever Monica Halpern 2004 Presents a history of the building of the transcontinental railroad and its effects on American life. By the 1840s, daring Americans were trickling westward to begin a new life in the great wide open. When gold was discovered in 1848, the promise of riches drew people by the thousands out to California. But the journey was slow and dangerous, since the best ways of travelling were by wagon and on foot. During the "railroad fever" of the 1830s, thousands of miles of track were laid, mostly throughout the Northeast and the South. Few had dreamt of extending this new travel westward—but all it takes is a few. Abraham Lincoln signed the Pacific Railroad Act in 1862, allowing for the start of the first transcontinental railroad. Though construction problems and hard times confronted them, American workers, Chinese immigrants, and former slaves pounded away through the rough geography of the western U.S., paving a path for the new train. A day in the life of a railroad worker was not an easy one. The work was backbreaking; the conditions were terrible; and workers were often faced with attack from Native Americans. The building of the railroad turned into a great race between two companies, the Central Pacific and the Union Pacific, to see who could finish their part of the railroad faster. The company that got farthest stood to make the most money. The "great race" turned into a national pastime—with reports of progress dominating the news. *Railroad Fever* illuminates the struggles of the railroad worker, the anger of the Plains Indians, and the many changes in both American life and geography that were prompted by the railroad. The completion of the transcontinental railroad left empty boomtowns across the country, changed the ethnic face of America, and, of course, created a new exciting and fast way of travel. Like the other titles in the *Crossroads America* series, *Railroad Fever* is illustrated with period paintings, drawings, and photographs. Also included are a glossary and an index.

Nameless Builders of the Transcontinental Railway William F. Chew 2004 A historical study of the Chinese railroad workers using data from the Central Pacific Railroad Company payroll records dating from 1864 to 1867, correcting the first date of Chinese by the Central Pacific, and the total number of workers employed, with an explanation of how this estimate was calculated. Nearly one thousand workers are named, listing their wages and occupations, dispelling the notion that all Chinese workers were "coolies". A synopsis is extrapolated from previously published works along with arguments for and against the data of some historical events, such as Bloomer Cut and Cape Horn. In addition, the building of the Summit Tunnels, and the laying of ten miles of track in one day are detailed. Particular focus is applied to the little known 1,330 Chinese fatalities which occurred while building the western route of the transcontinental, comparing these numbers to the total lives claimed by other major historical construction projects.

Buffalo Bird Girl S. D. Nelson 2013-01-11 *Buffalo Bird Girl* (ca. 1839-1932) was a member of the Hidatsa, a Native American community that lived in permanent villages along the Missouri River on the Great Plains. Like other girls her age, Buffalo Bird Girl learned the ways of her people through watching and listening, and then by doing. She helped plant crops in the spring, tended the fields through the summer, and in autumn joined in the harvest. She learned to prepare animal skins, dry meat, and perform other duties. There was also time for playing games with friends and training her dog. When her family visited the nearby trading post, there were all sorts of fascinating things to see from the white man's settlements in the East. Award-winning author and artist S. D. Nelson (*Standing Rock Sioux*) captures the spirit of Buffalo Bird Girl

by interweaving the actual words and stories of Buffalo Bird Woman with his artwork and archival photographs. Backmatter includes a history of the Hidatsa and a timeline.

Ten Mile Day Mary Ann Fraser 1996 An inclusive, multicultural portrait of a thrilling day in the completion of America's first transcontinental railroad. In her well-researched text, Fraser incorporates fascinating detail . . . while honestly addressing the prejudice faced by Chinese laborers.--Kirkus. Full color.

Empire Express David Haward Bain 2000-09-01 After the Civil War, the building of the transcontinental railroad was the nineteenth century's most transformative event. Beginning in 1842 with a visionary's dream to span the continent with twin bands of iron, *Empire Express* captures three dramatic decades in which the United States effectively doubled in size, fought three wars, and began to discover a new national identity. From self-made entrepreneurs such as the Union Pacific's Thomas Durant and era-defining figures such as President Lincoln to the thousands of laborers whose backbreaking work made the railroad possible, this extraordinary narrative summons an astonishing array of voices to give new dimension not only to this epic endeavor but also to the culture, political struggles, and social conflicts of an unforgettable period in American history.

Nothing Like It In the World Stephen E. Ambrose 2001-11-06 The story of the men who build the transcontinental railroad in the 1860's.

Developing Arts Loving Readers Nan McDonald 2002-05-21 *Developing Arts Loving Readers* is based on the premise that children can and do learn a great deal about the arts and their own abilities innately. Involvement and immersion, author Nan L. McDonald argues, are the ways in which children may feel welcome to write, move, create, draw, and otherwise express ideas about art and music directly. Teaching suggestions are offered to classroom teachers and other non-specialists, so that classroom-reading activities may be extended into group discussions, co-operative learning-arts projects, and creative performances. Appended are extensive resource lists for further integrated arts teaching in the classroom.

We Were There at the Driving of the Golden Spike David Shepherd 2013-11-06 Travel back to the 1860s to join a family of Irish immigrants on their westward voyage to participate in the dramatic track-laying contest between the Union and Central Pacific Railroads. 35 illustrations.

The Great Railroad Revolution Christian Wolmar 2012-09-25 America was made by the railroads. The opening of the Baltimore & Ohio line -- the first American railroad -- in the 1830s sparked a national revolution in the way that people lived thanks to the speed and convenience of train travel. Promoted by visionaries and built through heroic effort, the American railroad network was bigger in every sense than Europe's, and facilitated everything from long-distance travel to commuting and transporting goods to waging war. It united far-flung parts of the country, boosted economic development, and was the catalyst for America's rise to world-power status. Every American town, great or small, aspired to be connected to a railroad and by the turn of the century, almost every American lived within easy access of a station. By the early 1900s, the United States was covered in a latticework of more than 200,000 miles of railroad track and a series of magisterial termini, all built and controlled by the biggest corporations in the land. The railroads dominated the American landscape for more than a hundred years but by the middle of the twentieth century, the automobile, the truck, and the airplane had eclipsed the railroads and the nation started to forget them. In *The Great Railroad Revolution*, renowned railroad expert Christian Wolmar tells the extraordinary story of the rise and the fall of the greatest of all American endeavors, and argues that the time has come for America to reclaim and celebrate its often-overlooked rail heritage.

Iron Horses Verla Kay 1999 Welcome aboard! Travel back in time to join the workers of the Union Pacific Railroad as they pounded west and those from the Central Pacific Railroad as they charged east to build the first transcontinental rail line in the United States. They were racing to meet in Utah, and it was high drama all the way. Workers had to burst through rocky outcrops while hanging in baskets and sleep in tents on top of railroad cars or in barracks buried in snow. Bouncy, short verse highlights the steps it took to finally bring the tracks together, and powerful illustrations capture the landscape and the labor.

Almost to Freedom Vaunda Micheaux Nelson 2013-11-01 Lindy and her doll Sally are best friends - wherever Lindy goes, Sally stays right by her side. They eat together, sleep together, and even pick cotton together. So, on the night Lindy and her mama run away in search of freedom,

Sally goes too. This young girl's rag doll vividly narrates her enslaved family's courageous escape through the Underground Railroad. At once heart-wrenching and uplifting, this story about friendship and the strength of the human spirit will touch the lives of all readers long after the journey has ended.
