On the Logic of the Social Sciences Jürgen Habermas 2015-10-07 In this wide-ranging work, now available in paperback, Habermas presents his views on the nature of the social sciences and their distinctive methodology and concerns. He examines, among other things, the traditional division between the natural sciences and the social sciences; the characteristics of social action and the implications of theories of language for social enquiry; and the nature, tasks and limitations of hermeneutics.

Habermas' analysis of these and other themes is, as always, rigorous, perceptive and constructive. This brilliant study succeeds in highlighting the distinctive characteristics of the social sciences and in outlining the nature of, and prospects for, critical theory today.

History in Management and Organization Studies Behlül Üsdiken 2020-10-25 There has, in recent times, been an increasing interest in history, broadly defined, among management scholars. But what specifically a historical approach or perspective can contribute to research on organizational fields, organizations, strategy etc. and how exactly such historical research should be carried out remain questions that have been answered only partially, if at all. Building on the authors' prior and ongoing work, *History in Management and Organization Studies: From Margins to Mainstream* is unique

in presenting a comprehensive and integrated view of how history has informed management research with a focus on organization theory and strategy. More specifically, the volume provides an overview of how the relationship between history and management scholarship has evolved from the 19th century until today, focusing mainly on the post-World War II period; and systematically surveys the kind of research programs within organization theory and strategy that have used historical data and/or history as a theoretical construct, while also identifying the remaining "blind spots". As a whole, it offers a kind of roadmap for management scholars and historians to situate their research and, hopefully, find new roads for others to travel. The book is intended for anybody conducting or planning to conduct historical research within management and organization studies, and aims, in particular, at becoming a standard feature of research methods courses in business schools and departments of management.

Crossroads of Social Science Heinz Eulau

2007 The essays in this collection analyze the successes and failures of the social sciences over the last few decades as well as on their future.

The focus of the book is on generic problems, difficulties, and dilemmas in the social sciences that the contributors are uniquely qualified to articulate. Each of them has been intimately involved in the development of one or another discipline in the last thirty years or so; each has made significant contributions to that development in many ways; each has a personal perspective on accomplishments and failures, promises and needs, continuities to be cultivated and opportunities to be seized. . . anyone

concerned with the state of social science disciplines should find these essays of interest." - Journal of Politics

Historical Knowledge, Historical Error Allan Megill 2007-02 In the past thirty years, historians have broadened the scope of their discipline to include many previously neglected topics and perspectives. They have chronicled language, madness, gender, and sexuality and have experimented with new forms of presentation. They have turned to the histories

of non-Western peoples and to the troubled relations between “the West” and the rest. Allan Megill welcomes these developments, but he also suggests that there is now confusion among historians about what counts as a justified account of the past. In *Historical Knowledge, Historical Error*, Megill dispels some of the confusion. Here, he discusses issues of narrative, objectivity, and memory. He attacks what he sees as irresponsible uses of evidence while accepting the art of speculation, which incomplete evidence forces upon historians. Along the way, he offers succinct accounts of the epistemological road historians have traveled from Herodotus and Thucydides through Leopold von Ranke and Alexis de Tocqueville, and on to Hayden White, Natalie Zemon Davis, and Lynn Hunt.

The Social Sciences in Historical Study. A Report of the Committee on Historiography.

[Forew. by P. Herring]. P. Herring 1954

Being a Historian James M. Banner, Jr

2012-04-30 Based on the author's more than 50 years of experience as a professional historian in academic and other capacities, *Being a Historian* is addressed to both aspiring and mature historians. It offers an overview of the state of the discipline of history today and the problems that confront it and its practitioners in many professions. James M. Banner, Jr argues that historians remain inadequately prepared for their rapidly changing professional world and that the discipline as a whole has yet to confront many of its deficiencies. He also argues that, no longer needing to conform automatically to the academic ideal, historians can now more safely and productively than ever before adapt to their own visions, temperaments and goals as they take up their responsibilities as scholars, teachers and public practitioners. Critical while also optimistic, this work suggests many topics for further scholarly and professional exploration, research and debate.
