Applied Research in Primary Care: Improving Citizens' Health and Well-being in the Real World Ana Clavería 2023-05-08
Applied Economics: Public Financial Management and Development John Short 2022-04-29
Applied Economics: Public Financial Management and Development is focused on economics applied to public financial management and development. It charts over 50 years of the author's practical experience of economics and public policy in 60 countries on five continents, from Afghanistan to Zimbabwe. The book's main focal point is on central and local government budgeting, tracing the progress of revenue aspects and expenditure allocation over time from inputs alone to matching these inputs to achieving and measuring service delivery in programmes. It also presents the assessment instruments that measure public financial management strength and weakness, with real-life illustrations of their application. All of these instruments use examples from the countries that the author has worked in, demonstrating the conditions faced – mostly stable economic environments, but at times during periods of conflict and insecurity, as well as neighbouring geopolitical tension. These experiences have been gained from the author's resident assignments and short-term visits (mainly multiple over many

years) as a consultant for the IMF, World Bank, and bilateral development programmes as well as academic research.

Residential Interventions for Children, Adolescents, and Families Gary M. Blau 2014-06-05
Now more than ever there is a need to ensure that best practices are being used in residential programs. As the focus on costs and outcomes increase, residential programs must clearly demonstrate that the interventions provided are efficient and effective. Readers will learn how to: Create strength-based, empowering and healing environments; Better engage and partner with children, adolescents and families, in meaningful ways; Support those who have experienced trauma and loss, and to prevent and eliminate the use of restraint and seclusion; Respect and include cultural indices in practices; Train, mentor, supervise, support and empower staff about how to deliver promising and best practices, and evidence-informed and evidence-based interventions; and Track long-term outcomes, and create funding strategies to better support sustained positive outcomes. This book encourages readers to think strategically about how agencies, communities and systems can identify and implement actions that lead to positive change and how to work more collaboratively to improve the lives of children and adolescents who have experienced emotional and behavioral life challenges and

their families.

Gender Equity in Health Gita Sen 2009-10-16

This volume brings together experts from a variety of disciplines, such as medicine, biology, sociology, epidemiology, anthropology, economics and political science, who focus on three areas: health disparities and inequity due to gender, the specific problems women face in meeting the highest attainable standards of health, and the policies and actions that can address them. Highlighting the importance of intersecting social hierarchies (e.g. gender, class and ethnicity) for understanding health inequities and their implications for health policy, contributors detail and recommend policy approaches and agendas that incorporate, but go beyond commonly acknowledged issues relating to women's health and gender equity in health.

Gender, Women and Primary Health Care

Renewal World Health Organization 2010 This discussion paper brings together evidence and experience from around the world focusing on making health systems more gender responsive. There is a need to examine the various barriers as well as opportunities in order to make health systems work better for women, which has been a special concern for several decades now, by using a gender equality and health equity perspective. The paper uses a framework that combines WHO's six building blocks for health systems and the primary health care reforms propounded in the World Health Report 2008 on primary health care. Furthermore, the paper provides examples of what has worked and how, and ends with an agenda for action to strengthen the work of policy-makers, their advisers and development partners as well as practitioners as they seek to integrate gender equality perspectives into health systems strengthening, including primary health care (PHC) reforms.

Practical Statistics for Nursing Using SPSS

Herschel Knapp 2016-03-24 A friendly and approachable guide to real-world statistics, *Practical Statistics for Nursing Using SPSS* by Herschel Knapp covers the most common statistical functions in nursing science using plain language. Students learn by doing, and an emphasis on this practical approach is seen throughout the book with each chapter

structured to answer key questions: What statistical test should I use for this situation? How do I set up the data? How do I run the test? How do I interpret and document the results? Practice exercises include a vignette, codebook, and data sets ready for processing, enabling students to achieve mastery by carrying out actual statistical analyses.

Public Sector Reform, an Introduction 2009
Communities in Action National Academies of Sciences, Engineering, and Medicine 2017-04-27

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Men in Contemporary Russia Rebecca Kay 2016-12-05 Rebecca Kay assesses how men in post-Soviet Russia are represented through

media and popular discourses. Using case studies she explores the challenges which have arisen for men since 1991 and the ways in which their responses are shaped by and viewed through the prism of widely accepted attitudes towards gender. The lives and concerns of men in provincial Russia are examined through ethnographic fieldwork, combining extensive participant observation with in-depth interviews. The book reveals how individual men strive to maintain a sense of equilibrium between the activities in which they are engaged and the ways in which they are perceived, both by others and by themselves. The findings of the research have produced significant areas of contrast and comparison with the author's earlier work on women. This is drawn out throughout the book, placing the study of Russian men in a broader gendered context. The issues raised by the men mirror concerns discussed in men's studies literature and popular discourse beyond Russia. The book is therefore of interest to a wider international audience as well as contributing to ongoing interdisciplinary debates, in Russian Studies, Anthropology, Sociology and Human Geography, addressing the need for new approaches to understanding post-Socialist change.

Women's Mental Health Joel Rennó Jr. 2020-02-14 There is an increasing focus on medical studies related to differences between men and women, and women's mental health stands out as one of the most important fields where sex-based differences are being investigated. Overall, studies show an existence of important sex-specific differences in several aspects of psychiatric disorders such as etiology, epidemiology, clinical presentation and therapeutics. In this book, recognized experts present the current state of knowledge on this topic, providing a reliable, accurate and comprehensive clinical guide to women's mental health. The book will steer clear of an in-depth discussion of genetics and sex-based differences to focus quickly and narrowly on how best to diagnose and treat psychiatric disorders in women, thereby offering a targeted and practical guide for clinicians. It is intended to serve a broad audience -- including psychiatrists, psychologists, family physicians, obstetricians,

gynecologists, nurses, social workers and other medical and mental health providers with an interest in women's mental health. *Women's Mental Health: A Clinical and Evidence-Based Guide* will be fully evidence-based and will present chapters authored by distinguished leaders with extensive experience and clinical wisdom in this area. It offers psychiatrists, psychologists, family physicians, obstetricians, gynecologists, nurses, social workers and other medical and mental health providers a valuable source of information to enhance their clinical practice.

Daily Graphic Ransford Tetteh 2014-09-26 What Men and Women Want Helen Buhaenko 2004 Based on an actual gendered participatory appraisal in Wales, this guide offers a thorough explanation of why looking at the differences in men's and women's life experiences is an essential part of any participatory work. "What Men and Women Want" guides the user through the stages of a process which is e~gendered throughout -- in other words, which takes account of the different perspectives of women and men. It provides a range of accessible tools, explains how to analyze and collate qualitative information with a gender perspective, and shows how to move from action to bring about real and lasting changes in the lives of men and women.

Sex- and Gender-Based Women's Health Sarah A. Tilstra 2021-01-19 This book provides primary care clinicians, researchers, and educators with a guide that helps facilitate comprehensive, evidenced-based healthcare of women and gender diverse populations. Many primary care training programs in the United States lack formalized training in women's health, or if they do, the allotted time for teaching is sparse. This

book addresses this learning gap with a solid framework for any program or individual interested in learning about or teaching women's health. It can serve as a quick in-the-clinic reference between patients, or be used to steer curricular efforts in medical training programs, particularly tailored to internal medicine, family medicine, gynecology, nursing, and advanced practice provider programs. Organized to cover essential topics in women's health and gender based care, this text is divided into eight sections: Foundations of Women's Health and Gender Based Medicine, Gynecologic Health and Disease, Breast Health and Disease, Common Medical Conditions, Chronic Pain Disorders, Mental Health and Trauma, Care of Selected Populations (care of female veterans and gender diverse patients), and Obstetric Medicine. Using the Maintenance of Certification (MOC) and American Board of Internal Medicine blueprints for examination development, authors provide evidence-based reviews with several challenge questions and annotated answers at the end of each chapter. The epidemiology, pathophysiology, evaluation, diagnosis, treatment, and prognosis of all disease processes are detailed in each chapter. Learning objectives, summary points, certain exam techniques, clinical pearls, diagrams, and images are added to enhance reader's engagement and understanding of the material. Written by experts in the field, *Sex and Gender-Based Women's Health* is designed to guide all providers, regardless of training discipline or seniority, through comprehensive outpatient women's health and gender diverse care.

Supporting Student Diversity in Higher Education

Michelle Morgan 2013-07-03

Supporting Student Diversity in Higher Education is a working manual that is designed to help managers, academics and members of the professional service teams within universities, recruit and support a diverse student body across the student lifecycle at the same time as delivering a quality student experience in a challenging and pressured environment. Using the Student Experience Practitioner Model as a framework, this book helps colleagues responsible for improving the student experience navigate their way through the maze of student diversity across all levels of

study, determining what to deliver, how to deliver it and to whom. It interlinks academic, welfare and support activities at faculty department, school, course and university level to support the student in their university journey. Containing 40 practical and innovative undergraduate UK and international case studies from across 12 countries spanning four continents, this book provides practical examples of recruiting and supporting a diverse student body. It includes initiatives to support: mature students (e.g. academic re-engagement); students with special needs (e.g. dyslexia and other disabilities); international students (e.g. language support requirements); students at risk (e.g. lower socio-economic groups, care leavers, male learners); Transfer and direct entry students (e.g. supporting students through this transition); individual learners and their learning needs (impact of personality on learning); students who support students (e.g. peer support). This book will be of great use to senior and middle administrative managers and academics involved in the recruitment, retention and progression of students; and also to anyone involved in education policy and students aiming to work in higher education.

Men, Masculinities and Poverty in the UK Sandy Ruxton 2002 *Men, Masculinities, and Poverty in the UK* was commissioned by Oxfam's UK Poverty Programme to explore how changing economic, social, and political circumstances are affecting gender relations. Sandy Ruxton draws upon a review of the relevant literature and the experience of a wide range of community-based groups across the UK, in particular those working in the fields of employment training, men's health, gender-based violence, and fatherhood. He highlights the importance of using a coherent gender analysis to assess the nature, scope, and effectiveness of work with men, and concludes with recommendations for developing work with men in the UK in order to address poverty and gender inequality.

Participatory Research and Gender Analysis

Nina Lilja 2013-09-13 Agricultural development research aims to generate new knowledge or to retrieve and apply existing forms of knowledge in ways that can be used to improve the welfare of people who are living in poverty or are otherwise excluded, for instance by gender-based discrimination. Its effective application therefore requires ongoing dialogue with and the strong engagement of men and women from poor marginal farming communities. This book discusses opportunities afforded by effective knowledge pathways linking researchers and farmers, underpinned by participatory research and gender analysis. It sets out practices and debates in gender-sensitive participatory research and technology development, concentrating on the empirical issues of implementation, impact assessment, and institutionalisation of approaches for the wider development and research community. It includes six full-length chapters and eight brief practical notes and is enhanced by an annotated resources list of relevant publications, organisations, and websites adding to the portfolio of approaches and tools discussed by the contributors. Most of the 33 contributing authors work in the specialised agencies that form part of the Consultative Group on International Agricultural Research (CGIAR). This book was published as a special issue of *Development in Practice*.

Gender in Local Government Prabha Khosla 2008 "This sourcebook aims at providing local governments with the tools to better understand the importance of gender in the decision-making process and to reach better solutions for the communities they serve. For this publication the following key issues of local governance have been selected: participation in local government, land rights, urban planning, service provision, local government financing, violence against women and local economic development. Each of these issues is introduced by a brief gender analysis. Numerous case studies illustrate what local governments can do. Reflection questions and training exercises help trainers to develop successful training events. [...] [The manual] is designed as a companion to other UN-HABITAT training tools, providing local government trainers with the background and tested training methods they need to strengthen the gender dimension in their day-to-day training activities. The source book may also be used as a stand-alone tool, introducing local governments to gender issues and their importance for local government policy-making and project implementation." -- P. iv.

Consolidated Guideline on Sexual and Reproductive Health and Rights of Women Living with HIV World Health Organization 2017-02-20 The starting point for this guideline is the point at which a woman has learnt that she is living with HIV and it therefore covers key issues for providing comprehensive sexual and reproductive health and rights-related services and support for women living with HIV. As women living with HIV face unique challenges and human rights violations related to their sexuality and reproduction within their families and communities as well as from the health-care institutions where they seek care particular emphasis is placed on the creation of an enabling environment to support more effective health interventions and better health outcomes. This guideline is meant to help countries to more effectively and efficiently plan, develop and monitor programmes and services that promote gender equality and human rights and hence are more acceptable and appropriate for women living with HIV taking into account the national and local epidemiological context. It discusses implementation issues that health interventions and service delivery must address to achieve gender equality and support human rights. *Gender Manual* Helen Derbyshire 2002 *Rural Nursing, Third Edition* Helen J. A Practical Guide to Trade Policy Analysis Marc Bacchetta 2012 Trade flows and trade policies need to be properly quantified to describe, compare, or follow the evolution of policies between sectors or countries or over time. This is essential to ensure that policy choices are made with an appropriate knowledge of the real conditions. This practical guide introduces the main techniques of trade and trade policy data analysis. It shows how to develop the main indexes used to analyze trade flows, tariff structures, and non-tariff measures. It presents

the databases needed to construct these indexes as well as the challenges faced in collecting and processing these data, such as measurement errors or aggregation bias. Written by experts with practical experience in the field, *A Practical Guide to Trade Policy Analysis* has been developed to contribute to enhance developing countries' capacity to analyze and implement trade policy. It offers a hands-on introduction on how to estimate the distributional effects of trade policies on welfare, in particular on inequality and poverty. The guide is aimed at government experts engaged in trade negotiations, as well as students and researchers involved in trade-related study or research. An accompanying DVD contains data sets and program command files required for the exercises. Copublished by the WTO and the United Nations Conference on Trade and Development
