

# The Sirius Crossing

Enjoying the Tune of Appearance: An Emotional Symphony within **The Sirius Crossing**

In a global taken by displays and the ceaseless chatter of fast connection, the melodic splendor and mental symphony developed by the published term usually disappear into the background, eclipsed by the relentless noise and distractions that permeate our lives. Nevertheless, nestled within the pages of **The Sirius Crossing** a charming literary prize filled with organic emotions, lies an immersive symphony waiting to be embraced. Constructed by a wonderful composer of language, that interesting masterpiece conducts readers on an emotional trip, well unraveling the hidden songs and profound affect resonating within each cautiously crafted phrase. Within the depths of the touching review, we can discover the book is central harmonies, analyze their enthralling publishing type, and submit ourselves to the profound resonance that echoes in the depths of readers souls.

## **The Contemporary Irish Detective Novel**

Elizabeth Mannion 2016-05-30 Irish detective fiction has enjoyed an international readership for over a decade, appearing on best-seller lists across the globe. But its breadth of hard-boiled

and amateur detectives, historical fiction, and police procedurals has remained somewhat marginalized in academic scholarship. Exploring the work of some of its leading writers—including Peter Tremayne, John Connolly, Declan Hughes, Ken Bruen, Brian

McGilloway, Stuart Neville, Tana French, Jane Casey, and Benjamin Black—The Contemporary Irish Detective Novel opens new ground in Irish literary criticism and genre studies. It considers the detective genre's position in Irish Studies and the standing of Irish authors within the detective novel tradition. Contributors: Carol Baraniuk, Nancy Marck Cantwell, Brian Cliff, Fiona Coffey, Charlotte J. Headrick, Andrew Kincaid, Audrey McNamara, and Shirley Peterson.

*The Age of Cunard* Daniel Allen Butler 2004 For a century and a half, the single most important sea lane in the world was the transatlantic route linking the Old World with the New. For three hundred years, sailing ships sufficed to carry cargoes and people, but the demands of Steam Age business and commerce demanded more regularity. Just as the steam engine had allowed railroads to replace the unpredictability of stagecoaches on land with dependable schedules, steamships promised to bring this

reliability to crossing the Atlantic. This is where the story of the Cunard Line began. The greatest influence Cunard would ever have on world events would be the leading role during the last half of the 19th century, when the great migration of millions of emigrants transformed the populations of Europe, the United States, and Canada. Wars devastation came to the Cunard Line with WW1 and WW2, as the power of the German submarine fleet -- built with one purpose in mind, to sever the North Atlantic shipping lanes -- threatened Great Britain's very existence. By 1963, more people chose to travel by airplane than by steamship -- and it was the beginning of the end. Sir Winston Churchill observed, "You came into great things by the accident of sea power... By an accident of air power, you will probably cease to exist."

**How Invention Begins** John H. Lienhard 2006-07-14 In *How Invention Begins*, Lienhard reconciles the ends of invention with the individual leaps upon which they are built,

illuminating the vast web of individual inspirations that lie behind whole technologies. He traces, for instance, the way in which thousands of people applied their combined inventive genius to airplanes, railroad engines, and automobiles. As he does so, it becomes clear that a collective desire, an upwelling of fascination, a spirit of the times--a Zeitgeist--laid its hold upon inventors. The thing they all sought to create was speed itself. Likewise, Lienhard shows that when we trace the astonishingly complex technology of printing books, we come at last to that which we desire from books--the knowledge, the learning, that they provide. Can we speak of speed or education as inventions? To do so, he concludes, is certainly no greater a stretch than it is to call radio or the telephone an "invention." Throughout this marvelous volume, Lienhard illuminates these webs of insight or inspiration by weaving a fabric of anecdote, history, and technical detail--all of which come together to provide a full and satisfying portrait

of the true nature of invention.

**Cruising the Latin Tapestry** W.E Welbourne

2013-10-12 Cruising the Latin Tapestry is a travelogue and adventure story of the MV Voyager's circumnavigation of South America in early 2013 as experienced by the author and his partner. It provides an interesting insight into the extraordinary beauty and colourful vigour of Latin America that a traveller can expect by visiting this fascinating continent.

2018-11-30 The Apocalypse of Enoch and Bhuśunda The Apocalypse of Enoch and Bhuśunda challenges the underlying assumptions of the classical roots of civilization by restoring the original context of creation mythology. In this second volume of A Chronology of the Primeval Gods and the Western Sunrise, ancient myths from multiple geographies are correlated to spikes in cosmic rays over the past 120,000 years - as documented in ice core data. The chronology and content of these myths tell us that the primary forces behind these cataclysms were the most ancient gods - hyper-nova at the Galactic

Center associated with Sgr A\*(The Dragon), Sgr West (The Beast) and Sgr East (Hiranyâksha and Hiranyakas'ipu), with secondary supernova seen as the birth of new, destructive gods. Ancient myth has documented the cataclysmic destruction of the world on at least twenty occasions with four major geo-polar migrations, which has resulted in a shift of the earth's equator on at least one occasion. Multiple myths are shown to represent a view of the sky that can only be seen from the Antarctic region. Multiple versions of the myths of Orion are analyzed, showing clear linkages between the Vedic myth of Trisanku, the Book of Genesis, Senmut's Tomb, and the myths of Prajâpati Daksa representing the oldest version of the Orion myth - older than Trishanku and Genesis by 20,000 years! The stunning conclusion explains how the "Watchers" of Enoch were the Vedic descendants of Ila and Ikṣvaku. These descendants of the seventh Manu had been observing and recording the stars as a source of

cataclysm for at least 15,000 years prior to Enoch, thus allowing Enoch to prophesize a 'new heaven.' That prophecy became the foundation for St John's Book of Revelations, which is shown to be a description of a series of cataclysms attributed to Sgr West. The book offers a new theory for explaining geo-polar migration. That theory suggests small shifts in the location of the earth's center of gravity underlie each migration, but that there are multiple causes for the shifts.

**Merchant Sail** William Armstrong Fairburn 1955

*Hidden Cork* Michael Lenihan 2010-02-01 NOW AVAILABLE IN PAPERBACK. In this collection, Michael Lenihan delves into the rich tapestry of Cork's history to reveal some of its most bizarre events and strangest characters. From quack doctor Baron Spolasco, to the outlaw Airt Ó Laoghaire, Cork has seen some eccentric, wonderful and even some downright nasty people. With revelations of mass graves in Bishop

Lucey Park, how Jonathan Swift was awarded the freedom of the city, stories of the Gas Works' strike and the trams of the city, *Hidden Cork* opens the door on history, dumps the boring bits and brings to life the flow of time through the streets of Cork.

**RMS Queen Elizabeth 2** Janette McCutcheon 2008-10-15 The illustrated history of the most famous ocean liner afloat today.

*The Bookseller* 1911

*The Global Imperative* Robert P Clark 2018-02-12 Robert Clark delves into 100 millennia of human history to create a unified and consistent explanation for humankind's inner need to spread itself across the globe. He examines key events from different eras, such as the voyages of the Chinese treasure fleet, the shaping of the Aztec's trade system in MesoAmerica, the role of steam-powered transport in the supply of an English city, the rise of the gas-powered engine, and the digitization of information in the computer age,

melding them together to form a framework for understanding the process of globalization. Drawing on a variety of academic disciplines including the physical sciences, biology, anthropology, geography, economics, political science, sociology, and demography, Clark reveals the spread of humans and their cultures to be part of an ongoing struggle to supply the energy needs of an increasingly large and complex society. ?Entropy? and ?thermodynamics,? terms often ignored or misunderstood by social science students, clearly frame a fascinating vision of humans' inherent tendency toward a globalized world. Although human expansion has drawn increasing attention in the last several decades, as this tumultuous century has progressed, Clark shows that the process of globalization is not a recent concept. From the very roots of the species, humankind has been driven by a range of internal and external factors to expand in order to survive the increasing complexity of

human civilization.

Pilsner Tom Acitelli 2020-08-04 Best Book at the North American Guild Beers Writers

"Effervescent and informative . . . This chronicle will intoxicate both beer nerds and history buffs." —Publishers Weekly A book for both the beer geek and the foodie seeking a better understanding of modern food and drink On the night of April 17, 1945, Allied planes dropped more than a hundred bombs on the Burghers' Brewery in Pilsen, Czechoslovakia, destroying much of the birthplace of pilsner, the world's most popular beer style and the bestselling alcoholic beverage of all time. Still, workers at the brewery would rally so they could have beer to toast their American, Canadian, and British liberators the following month. It was another

twist in pilsner's remarkable story, one that started in a supernova of technological, political, and demographic shifts in the mid-1800s and that continues to unfold today anywhere alcohol is sold. Tom Acitelli's *Pilsner: How the Beer of Kings Changed the World* tells that story, shattering myths about pilsner's very birth and about its immediate parentage. A character-driven narrative that shows how pilsner influenced everything from modern-day advertising and marketing to immigration to today's craft beer movement.

**The Sirius Crossing** John Creed 2003-02-17  
"Jack Valentine has been in the intelligence game too long and it is starting to show, but he accepts one more mission. He always does. It seems like a simple task but it throws up deadly questions and he doesn't know the answers. What were American Special Forces doing in Ireland twenty-five years ago and why does it matter now? What is the thread which leads from a deserted mountainside to the offices of

the White House? Valentine no longer knows which threatens him most - the dark alliance of men who want to kill him or his own dangerous cynicism." -back cover.

The Greater Journey David McCullough  
2011-05-24 The #1 bestseller that tells the remarkable story of the generations of American artists, writers, and doctors who traveled to Paris, fell in love with the city and its people, and changed America through what they learned, told by America's master historian, David McCullough. Not all pioneers went west. In *The Greater Journey*, David McCullough tells the enthralling, inspiring—and until now, untold—story of the adventurous American artists, writers, doctors, politicians, and others who set off for Paris in the years between 1830 and 1900, hungry to learn and to excel in their work. What they achieved would profoundly alter American history. Elizabeth Blackwell, the first female doctor in America, was one of this intrepid band. Another was Charles Sumner,

whose encounters with black students at the Sorbonne inspired him to become the most powerful voice for abolition in the US Senate. Friends James Fenimore Cooper and Samuel F. B. Morse worked unrelentingly every day in Paris, Morse not only painting what would be his masterpiece, but also bringing home his momentous idea for the telegraph. Harriet Beecher Stowe traveled to Paris to escape the controversy generated by her book, *Uncle Tom's Cabin*. Three of the greatest American artists ever—sculptor Augustus Saint-Gaudens, painters Mary Cassatt and John Singer Sargent—flourished in Paris, inspired by French masters. Almost forgotten today, the heroic American ambassador Elihu Washburne bravely remained at his post through the Franco-Prussian War, the long Siege of Paris, and the nightmare of the Commune. His vivid diary account of the starvation and suffering endured by the people of Paris is published here for the first time. Telling their stories with power and

intimacy, McCullough brings us into the lives of remarkable men and women who, in Saint-Gaudens' phrase, longed "to soar into the blue." *The Sirius Crossing* John Creed 19??  
**Skyward** Richard Evelyn Byrd Jr. 2015-05-15  
 Skyward is as much the memoir of great American explorer Admiral Richard E. Byrd, Jr. as it is a fascinating narrative of America's early aviation history, much of which Byrd shaped with his explorations as a naval pilot and pioneering scientist. Through the life of Admiral Byrd, we see the seeds of America's aerial military force, commercial airline travel, and our understanding of the planet's most remote geographical locations planted. Byrd's outsized ambition has inspired generations to dare to push technological limits in order to achieve things greater than themselves. Reissued for today's readers, Admiral Byrd's classic explorations by land, air, and sea transport us to the farthest reaches of the globe. As companions on Byrd's journeys, modern audiences

experience the polar landscape through Byrd's own struggles, doubts, revelations, and triumphs and share the excitement of these timeless adventures.

*A Life in the Hills* Katharine Stewart 2018-08-23  
 Katharine Stewart, who died in 2013, was one of Scotland's best-loved writers on rural life in the Highlands. *A Croft in the Hills*, her first book, tells the story of how a couple and their young daughter, fresh from city life, took over a remote hill croft near Loch Ness and made a living from it. Full of warm personal insights, good humour and a love of living things, it has become a classic and has rarely been out of print since it was first published in 1960. This omnibus gathers *A Croft in the Hills* together with some of Katharine's later books: *A Garden in the Hills*, describing a year in the life of her Highland garden; *A School in the Hills*, a vivid history of the school at Abriachan which eventually became the Stewarts' family home; and *The Post in the Hills*, which tells the dramatic story of the

postal service in the Highlands, from the point of view of Katharine's later role as postmistress of the smallest post office in Scotland, run from the porch of her Abriachan schoolhouse. Each of these books glows with what Neil Gunn described as 'its unusual quality, its brightness and its wisdom'. The omnibus will bring the grace, charm and wisdom of Katharine Stewart's writing to a new generation of readers.

**Lost Voyages** Bradley Sheard 1998 In a Tokyo in the not too distant future a young girl studies diligently with ambitions of soon attending space academy. If things work out just right, her future may very well be among the stars as well. And yet, every time she looks up to the stars there is a sense of melancholy in her heart. A sadness surrounds Asumi, as space exploration itself has profoundly impacted her life for as long as she can remember. But she is not alone...A young man wearing a lion's mask is always beside her. He speaks of the constellations and galaxies as if he they were

like home. He knows what it is like to love the stars--slightly bitter and yet always so warm and inviting. Truth is he has gone through much of Asumi is just experiencing. And now in spirit he will forever be with Asumi guiding her on her path to space.

### The World Today 1926

**Crosses of Iron** Nick Pappas 2023-10-01 In October 1913, 261 miners and two rescuers died when a massive explosion ripped through a mine operated by Phelps, Dodge & Company in Dawson, New Mexico. Ten years later, a second blast claimed the lives of another 120 miners. Today, Dawson is a deserted ghost town. All that remains is a sea of white iron crosses memorializing the nearly four hundred miners killed in the two explosions—a death toll unmatched by mine disasters in any other town in America. Now, to mark the centennial of the second disaster, veteran journalist Nick Pappas tells the tragic story of what was once New Mexico’s largest and most modern company

town and of how the strong, determined residents of the community coped with two heartbreaking catastrophes.

*The popular encyclopedia; or, "Conversations lexicon;" being a general dictionary of arts, sciences, literature, biography, and history. With ... illustrations* Encyclopaedias

*Titanic* John Lang 2023-06-14 The sinking of the Titanic on her maiden voyage in April 1912 was one of the defining moments of the twentieth century. Books and films about the disaster that befell the iconic liner are commonplace, and it seems almost inconceivable that anything fresh can emerge. But there is one angle that has not been covered, and *Titanic Revisited* examines the events of April 1912 from that completely new perspective. John Lang brings the standards of a twenty-first-century accident investigation to bear on the events of April 1912, using his expertise and his investigator's instinct to determine exactly what happened a century ago, and what important lessons still need to be

learned.

**Steam-Powered Knowledge** Aileen Fyfe  
2012-02-28 With the overwhelming amount of new information that bombards us each day, it is perhaps difficult to imagine a time when the widespread availability of the printed word was a novelty. In early nineteenth-century Britain, print was not novel—Gutenberg’s printing press had been around for nearly four centuries—but printed matter was still a rare and relatively expensive luxury. All this changed, however, as publishers began employing new technologies to astounding effect, mass-producing instructive and educational books and magazines and revolutionizing how knowledge was disseminated to the general public. In *Steam-Powered Knowledge*, Aileen Fyfe explores the activities of William Chambers and the W. & R. Chambers publishing firm during its formative years, documenting for the first time how new technologies were integrated into existing business systems. Chambers was one of the first

publishers to abandon traditional skills associated with hand printing, instead favoring the latest innovations in printing processes and machinery: machine-made paper, stereotyping, and, especially, printing machines driven by steam power. The mid-nineteenth century also witnessed dramatic advances in transportation, and Chambers used proliferating railway networks and steamship routes to speed up communication and distribution. As a result, his high-tech publishing firm became an exemplar of commercial success by 1850 and outlived all of its rivals in the business of cheap instructive print. Fyfe follows Chambers’s journey from small-time bookseller and self-trained hand-press printer to wealthy and successful publisher of popular educational books on both sides of the Atlantic, demonstrating along the way the profound effects of his and his fellow publishers’ willingness, or unwillingness, to incorporate these technological innovations into their businesses.

**Merchant Vessels** Robert Riegel 1921  
*Mistress of Science* John S. Croucher 2016-08-15  
 The first biography of the remarkable Janet Taylor, a nineteenth-century navigator and mathematician who left an incredible mark on the male-dominated field of sea navigation  
*The Companion to British History* Charles Arnold-Baker 2015-07-30 First published in 1996, this comprehensive guide to the history of Britain and its peoples will be indispensable reading for the general enthusiast, as well as students. It is packed full of fascinating detail on everything from Hadrian's Wall to the Black Death to Tony Blair. The book was assembled over more than thirty years and has seen updates in three editions. "He has done for historical encyclopaedias what Samuel Johnson did for dictionaries." Andrew Roberts, *The Daily Telegraph* "An astonishing synthesis of information." Roger Scruton, *The Times* "An astonishing achievement, a compelling book for dipping into, a splendid work." Simon Hoggart,

*The Guardian* "This marvellous book, which contains tens of thousands of historical facts will enlighten, amuse, and inform. Every home should have one." Simon Heffer, *The Daily Mail* "If you were marooned on that mythical desert island with only one history book, this would be the one to take. Buy three copies - one for the children, one for the grandchildren- and one for yourself." John Charmley, *The Daily Telegraph*  
*The Blue Riband of the Atlantic* Janette McCutcheon 2017-01-19 In 1837, two ships vied for the fastest crossing of the Atlantic. From 9kt of Sirius to the 40kt of the SS United States, 35 ships have won the Blue Riband.
