Spec Ops William H. McRaven
1996-06-01 Vice Adm. William H. McRaven helped to devise the strategy for how to bring down Osama bin Laden, and commanded the courageous U.S. military unit that carried it out on May 1, 2011, ending one

of the greatest manhunts in history. In *Spec Ops*, a well-organized and deeply researched study, McRaven analyzes eight classic special operations. Six are from WWII: the German commando raid on the Belgian fort Eben Emael (1940); the Italian torpedo

attack on the Alexandria harbor (1941); the British commando raid on Nazaire, France (1942); the German glider rescue of Benito Mussolini (1943); the British midget-submarine attack on the Tirpitz (1943); and the U.S. Ranger rescue mission at the Cabanatuan POW camp in the Philippines (1945). The two post-WWII examples are the U.S. Army raid on the Son Tay POW camp in North Vietnam (1970) and the Israeli rescue of the skyjacked hostages in Entebbe, Uganda (1976). McRaven—who commands a U.S. Navy SEAL team—pinpoints six essential principles of “spec ops” success: simplicity, security, repetition, surprise, speed and purpose. For each of the case studies, he provides political and military context, a meticulous reconstruction of the mission itself and an analysis of the operation in relation to his six principles. McRaven deems the Son Tay raid “the best modern example of a successful spec op [which] should be considered textbook

material for future missions.”

His own book is an instructive textbook that will be closely studied by students of the military arts. Facing defeat, the Coalition waged a hidden war within a war. Major-General Stan McChrystal devised a campaign fusing special forces, aircraft, and the latest surveillance technology with the aim of taking down the enemy faster than it could regenerate. (1939-1945), the Colt Government Model (1911) pistol remained the standard issue handgun in the US armed forces for nearly 80 years and has continued in service with some units to this day. In fact, the M1911 has seen a resurgence among US Special Operations units, as US Marine MARSOC and MEUSOC personnel are issued current generation 1911-type pistols. In addition, the pistol has seen service with famous law enforcement agencies such as the Shanghai Municipal Police, LAPD Swat and Texas Rangers. Nearly a century after its introduction, the M1911 Pistol remains a popular design and is now produced by virtually every major firearms manufacturer doing business in the USA. In this new volume, handgun expert Leroy Thompson sheds new light on the development, history and use of this revolutionary handgun, complete with specially-commissioned artwork depicting the firing process and cutaway profile of the gun, as well as its use in

Secret and Special Will

Davies 2021-03-02 Soon after the declaration of war on Japan, a secret military reconnaissance unit was established, based on the British Special Operations Executive (known as SOE) and called the Inter-allied Services Department. The unit was tasked with the role to "obtain and report information of the enemy ... weaken the enemy by sabotage and destruction of morale and to lend aid and assistance to local efforts to the same end in enemy occupied territories." In 1943 it became known under the cover name Special Reconnaissance Department (SRD) and included some British officers who had escaped from Singapore. After arriving in Australia, they assembled in Melbourne, forming the nucleus of ISD and together with some Australians

established what became the Z Special Unit. Training began in a number of locations around Australia including on Fraser Island off the Queensland coast, In Broken Bay near Sydney, at Careening Bay in Western Australia, at the "House on the Hill" in Cairns and at East Arm near Darwin. From these training areas and bases, Z Special undertook intelligence gathering and raiding missions throughout Southeast Asia including New Guinea, Singapore, Timor, Malaya, Borneo, Vietnam and the Dutch East Indies. The first operation was Jaywick in September 1943. Led by a 28 year old officer from the Gordon Highlanders, Captain Ivan Lyon. Using an old Japanese fishing boat renamed Krait this captured vessel was re-fitted and provisioned for a voyage from Australia to just south of Singapore where it released six commandos in three folding kayaks to attack Japanese shipping in the harbour. They placed limpet mines on several Japanese ships sinking 40,000 tons of

shipping. After the successful attack, they paddled south, were picked up by the Krait and successfully returned to Australia. This was followed by Operation Rimau again led by Lyon but this time things went very wrong very early. Identified, they made a fighting withdrawal but all of the raiding party were shot or captured, with the last ten being executed just before the end of the war. Important in Z Special operations were a number of vessels designated "snake boats". Four 66' modified trawlers were constructed as well as a range of Asian vessels that allowed their operation in South East Asian areas of operation. One Z Special, the last in PNG, set out on the night of the 11 April 1945. Eight operatives were landed on the Japanese held island of Muschu about five kilometres off the coast near Wewak to determine the status of two 140mm Japanese naval guns that had been placed there. These guns would prove dangerous to planned naval landings at Wewak, and allied

command needed to know if these were operational. The operatives were launched in four double folding kayaks from a HTML fast crash boat but the current carried them away from their landing position and the surf capsized their boats. The men swam ashore but both their radio and their signal torches had been destroyed and the men had no way of connecting with the return crash boat. Soon their lost equipment was found by the Japanese and a massive search with 1,000 troops scoured the island. Quite soon seven of the eight men had been captured, killed or died trying to swim to the mainland and only one man, Sergeant 'Mick' Dennis remained. Over the next three days he continued a one man war, fighting off Japanese patrols and living off the land. Unable to do this for long, he took to the dangerous shark and crocodile infested waters and with the aid of a log, paddled to the mainland. Landing on a Japanese controlled beach, he snuck ashore and after further

firefights and a difficult journey travelling west, he finally was found by an Australian patrol. Mick Dennis was able to provide valuable information and for his service and bravery, was awarded a Military Medal. During the course of the war, Z Special Unit carried out 81 covert operations in the Southwest Pacific theatre. While the unit was disbanded after the end of the war, many of its techniques would be modified and used by Australian Special Forces to this day.

Special Forces Berlin James Stejskal 2017-02-15 The previously untold story of a Cold War spy unit, “one of the best examples of applied unconventional warfare in special operations history”

(Small Wars Journal). It is a little-known fact that during the Cold War, two US Army Special Forces detachments were stationed far behind the Iron Curtain in West Berlin. The existence and missions of the two detachments were highly classified secrets. The massive armies of the Soviet Union and its Warsaw Pact allies posed a huge threat to the nations of Western Europe. US military planners decided they needed a plan to slow the expected juggernaut, if and when a war began. This plan was Special Forces Berlin. Their mission—should hostilities commence—was to wreak havoc behind enemy lines and buy time for vastly outnumbered NATO forces to conduct a breakout from the city. In reality, it was an ambitious and extremely dangerous mission, even suicidal. Highly trained and fluent in German, each of these one hundred soldiers and their successors was allocated a specific area. They were skilled in clandestine operations, sabotage, and intelligence

tradecraft, and were able to act, if necessary, as independent operators, blending into the local population and working unseen in a city awash with spies looking for information on their every move. Special Forces Berlin left a legacy of a new type of soldier, expert in unconventional warfare, that was sought after for other deployments, including the attempted rescue of American hostages from Tehran in 1979. With the US government officially acknowledging their existence in 2014, their incredible story can now be told—by one of their own.

The M1 Garand Leroy Thompson 2012-05-22 The M1 Garand gave US infantrymen a marked edge during World War II. It shot faster and further than enemy infantry rifles and hit harder. No less an authority on killing the enemy than General George S. Patton called the Garand, "The greatest battle implement ever devised." At a time when opposing forces were armed with bolt action rifles, US

troops had a highly reliable self-loader. It was the US Army's principal infantry weapon in World War II, beloved of troops for its ability to withstand hard use and be ready when needed. In most battles the Garands speed of fire combined with the powerful .30-06 cartridge gave US troops a distinct advantage. The eight-round clips which were used to load the M1 Garand were, however, viewed with mixed emotions by the troops on the ground. Eight rounds was not much magazine capacity for a self-loading rifle, thus requiring frequent reloading in combat. Some Army and Marine Corps troops allegedly felt that the distinctive "twang" as the Garand's clip was ejected when empty alerted the enemy that the soldiers were reloading and resulted in an attack. But this problem may have been overstated as experienced troops did not all empty their weapons at the same time. It was also a particularly heavy weapon in contrast to the much lighter M1 Carbine. But the

Garand became the defining mankiller of the war, despite its weight and magazine problems, and many US combat veterans consider it one of the key reasons they survived the war, as one veteran succinctly commented, "I let my Garand do the talking."

Unarmed Combat: Hand-to-hand fighting skills from the world's most elite fighting units (SAS and Elite Forces Guide)

Martin J Dougherty 2010 With the aid of superb line artworks, Unarmed Combat

demonstrates to the reader how special forces soldiers are taught to excel in hand-to-hand fighting: how they maximise bodyweight, and the use of various strikes, throws, locks and constrictions to defeat opponents. It explains how different martial arts have been combined by military units to create hand-to-hand combat systems for defence against multiple assailants, for fighting on the ground, for dealing with edged and impact weapons, what works against attackers with firearms and -

more importantly - what doesn't. With tips and techniques from unarmed combat experts, the book is divided into two main sections. The first covers the mental preparation needed to be ready to defend yourself. The second covers the physical techniques needed to defend yourself, and if necessary, strike back to temporarily incapacitate your attacker and escape. With more than 300 easy-to-follow artworks and handy pull-out lists of key information, Unarmed Combat is the definitive guide for anyone wanting to be ready for anything - it could save your life.

Code Name Green 41 George M. James 2016-06-20 No GMJ Book is just written; the topic is carefully chosen to enlighten the reader to current dangers. Here we deal with interdicting drug smuggle routes by using Special Forces and agents only, and the question if hard drugs can be used as a weapon of war as was done in history, apparently, in Vietnam. There is a follow up book, Code Name Celery 50, following this one to complete the story. The two books are known to us as the "Lucy Books" for reasons which will become clear in the story. In fact, everything you are about to read about "Lucy" is true. Angelique Dawson and her team are after an African warlord who captured and tortured one of her agents and is flooding the market with drugs, using the drugs as a weapon of war. She arranges to cut his smuggle routes and sinks his barge, the Inyosi Ubusi, in Lake Malawi on

which the drugs are transported. A classic tale of using Special Forces and undercover agents in combined operations. If you wish to read about Covert and Special Forces Operations in Sub Saharan Africa, the GMJ Books are the place to start. Code Name Green 41 is the twentieth book of the popular GMJ Series.

Elite Forces R M Bennett
2011-08-31 The invincible reputation of specialist military units such as the USA's Delta Force, Israel's IDP, and of course, Britian's SAS has grown steadily in recent years. Thanks to a number of successful campaigns and anti-terror operations, from London's Iranian Embassy siege in 1980 to the second Gulf War, in which they played a crucial role, it's now assumed that special forces are ideal for our world of small, localised conflicts - and especially George W Bush's war on terror. *Elite Forces: The World's Most Formidable Secret Armies:* - Contains over 500 compelling entries that cut through myth

and secrecy. - Details the history, selection and training procedures and orders of battle of every major elite fighting force in the world today. - Is packed with hair-raising examples of individual heroism, endurance and courage in adversity. - Is fully up to date and includes recent coalition operations in Afghanistan and Iraq. - Takes an objective look at what happens when things go wrong, as they did most famously during the Gulf War of 1991 and in America's intervention in Somalia in 1993. - Explores the hidden links between elite forces and governments, intelligence organisations and business, and their controversial lack of accountability. - Examines how new technologies have come to the aid of the elite soldier. This is the first book of its kind to examine all aspects of the overlap between elite forces and the hidden worlds of intelligence and counter-terrorism, and takes an objective look at the secret, controversial role of special forces and 'Freelancers' in

covert, deadly operations around the world. Elite Forces is a compelling, revealing - and occasionally shocking - read, and an authoritative and easy-to-use reference resource.

How effective are they? ...and who controls them? In this chilling analysis James Adams unveils the secret world of the SAS, Delta Force

The M14 Battle Rifle Leroy Thompson 2014-10-21
Featuring specially commissioned full-color artwork and archive and close-up photographs, this engaging study tells the story of the M14, the long-lived battle rifle that remains in front-line service with US forces more than 50 years after its first adoption. The 7.62×51mm M14 select-fire automatic rifle was the primary US service rifle for only a decade from 1957 before being supplanted by the 5.56×45mm M16, yet many familiar with the M14 consider it the best rifle ever to see US service. Based on the well-proven M1 Garand rifle, the M14 addressed the perceived "deficiencies" of the Garand based on the latter's service in World War II and Korea. The M14 incorporated a detachable box magazine and select-fire capability, and used a

shortened version of the .30-06 cartridge - the 7.62×51mm NATO round - better suited to a "battle rifle." Though primarily designed for a war in Europe, where it would take its place alongside the other 7.62×51mm battle rifles (FAL, G3, etc.) in the hands of NATO allies, probably the first combat use of the M14 was with the 82nd Airborne Division in the Dominican Republic in 1965-66. The M14 also saw action during the early days of the escalating US involvement in the Vietnam War, though it proved rather too heavy and lengthy for jungle usage and was supplanted in that theater by the M16 in 1966-67. Even so, some Army engineer units continued to use the M14 as did US Marines, who often retained one or two in each squad. Even after the adoption of the M16, US troops in Europe retained the M14 until 1970 for compatibility with other NATO armies. Although the M14 was intended to replace four weapons, namely the .30-06 M1 Garand, the .30

M1 Carbine, the .45 M3 submachine gun (SMG), and - in its M15 and M14A1 models - the .30-06 Browning Automatic Rifle (BAR), this proved to be an overly optimistic goal. The new weapon was deemed virtually uncontrollable on full-automatic in the SMG role, but its 7.62×51mm round proved too light for the BAR's squad automatic weapon role. Even so, the M14 has remained a Phoenix among US infantry weapons, rising again and again when a more powerful battle rifle has been needed. Its accuracy and reliability led to its modification and adoption in 1975 as a semi-automatic sniping weapon - the M21 - which remained the Army's primary sniper rifle until 1988, although seeing widespread service in Iraq well after that date. Since 2001 the M14 has seen a resurgence as a Designated Marksman Rifle, being employed by all branches of the US military, especially in Afghanistan where the open terrain makes longer-range engagements common. It has remained a viable limited-use

US infantry weapon for over five decades, and appears likely to see action wherever US forces require a longer-range, accurate battle rifle for some years to come.

The Sten Gun Leroy Thompson
2012-09-18 The Sten submachine gun - officially the 'Carbine, Machine, Sten' - was developed to fulfil the pressing British need for large quantities of cheaply produced weapons after Dunkirk, when German invasion was a very real possibility. Over four million were built during World War II, and the Sten was widely used by airborne troops, tankers, and others who needed a compact weapon with substantial firepower. It proved especially popular with Resistance fighters as it was easy to conceal, deadly at close range, and could fire captured German ammunition. Using stamped-metal parts that required minimal welding, the Sten's design was so simple that Resistance fighters were able to produce them in bicycle shops. The Sten influenced the development of other

inexpensive, easy-to-produce submachine guns, such as the Australian Austen and the US M3 'Grease Gun', while copies of the Sten were produced in Argentina, France, Norway, Denmark, Poland, and even Nazi Germany. In the years after World War II, the Sten was used in Korea and in counterinsurgency campaigns in Malaya and Kenya. During the 1948 Palestine War, locally produced Stens were employed by Israeli forces; in 1984 Indira Gandhi was assassinated by one of her Sikh bodyguards using a Sten. Its postwar successor in British service, the Sterling, owed much to the Sten; early examples saw combat at Arnhem in 1944 and it remained in service as late as 1988. Suppressed versions of the Sterling were used by British, Australian and New Zealand SAS forces, and the weapon even saw action with US Special Forces troops until the early days of the Vietnam War. Featuring vivid first-hand accounts, specially commissioned full-colour artwork and close-up

photographs, this is the fascinating story of the mass-produced submachine gun that provided Allied soldiers and Resistance fighters with devastating close-range firepower.

This is the true story of one Operator and of some of the most hair-raising military operations ever conducted on the streets of Britain.

The M1 Carbine Leroy Thompson 2011-11-22 The M1 Carbine was produced in more

numbers than any other US small arm in World War II (1939-1945). In 1938 the US Chief of Infantry requested that the Ordnance Department develop a carbine or light rifle to be used by service and support troops, artillerymen, machinegun crews, tankers, mortar crews and other troops not needing the power of the M1 Garand rifle. The development of this new weapon was given an added impetus by Germany's successful use of airborne and glider troops early on in World War II. This caused a fear amongst US officers that troops normally considered "behind the lines" personnel might have to fight elite German troops and would therefore require a more effective weapon than their standard pistols. The resulting M1 Carbine was a not a shortened version of the standard service rifle but instead a brand-new design chambering a new cartridge. This new weapon would see service in every theater and with all US service arms as

well as American and Allied special units including the OSS, Merrill's Marauders, the SAS and the SBS. Eventually numerous manufacturers would combine to produce over six million M1 Carbines before the end of the war. This new title provides an in-depth analysis on this crucial, trailblazing weapon.
