Smog Check Douglas S. Eisinger 2012-08-21

When federal and state governments battle over environmental regulations, whose approach should prevail? Shortly after passage of the 1990 Clean Air Act Amendments, a controversial U.S. EPA mandate led to an intense conflict between

federal regulators and California politicians. The disagreement pitted EPA's required overhaul of auto inspections against California's desire to self-govern its test program - popularly called 'Smog Check.' The conflict nearly upended the Clean Air Act, and triggered dramatic policy shifts throughout the United States. Smog Check presents these struggles in first-hand detail.

Eisinger, an EPA official at the time of this conflict, probes deeply into the issues and explores broader questions including: when does it become imperative for agencies to bargain with one another, when should regulatory flexibility and performance-based regulations be favored over command and control approaches, and what should be done when decisions need to be made in the face of scientific disagreement? The book also includes insightful commentary from other EPA participants in the Smog Check controversy. Smog Check's lessons will be relevant to climate change, air pollution control, and numerous other policy challenges.

Proposal for a "smog Tax" 1959 The Smog Tax is designed to give the individual the widest possible latitude in choosing those anti-smog actions most appropriate to his personal circumstances. It affords the fairest possible treatment of individuals in different circumstances, with different types of cars, different transportation needs, different driving

habits, and different viewpoints. Each individual is penalized according to his output of pollutants. In a program aimed at the significant reduction of air pollutant output, this formula, is as fair and effective as any that can be derived.

The Smog of Chongqing Andrew Snape 2015-04-23 The Smog of Chongqing is the true story of how one man fulfilled one of his dreams and left his safe life and safe, corporate job, to move to another country to pursue a more worthwhile line of work. After a month in Poland suffering four weeks of mega-humidity and insane intensity, he qualifies as a teacher of English as a foreign language and, after a couple of trips around Europe, lands a job with EF, in the little-known mega city of Chongqing. Over the following year he grows from being a nervous rookie terrified at the thought of teaching kids, to a seasoned veteran wondering why he ever thought adults would be a doddle.

Along the way he finds his niche in karaoke, eats a brain, get the trots, develops thick skin, gets mild alcohol poisoning, learns to love shrimp and oysters, screams at Didier Drogba and quickly gives up learning a musical instrument. Along the way he visits a plethora of countries - Poland, Germany, Luxembourg, Finland, Norway, Sweden, Denmark, Netherlands, France, China, Thailand, Malaysia, Hong Kong, Singapore, Vietnam and Cambodia - and enjoys some amazing experiences, such as New Year in Bangkok, cycling round Angkor Wat, listening to protesters at the Earth Summit and genuine German Christmas markets. This is the story of risking it all to follow one's dream, and never looking back.

The Smog David Longhorn 2016-08-10 On the eve of Queen Elizabeth II's coronation in 1952, the future is bright with promise for England

and American reporter, Rachel Beaumont. Life couldn't be sweeter; her book is a smash hit, her husband has settled into his job at the ministry and their young daughter, Emily, is growing like the proverbial weed. But when Emily has a nightmare about the "Raggedy Men", Rachel knows - without a doubt - the Sentinels are back. Her days as a seer are far from over. More ghosts than ever need her assistance to cross over. Ghost sightings are popping up all over London. Police officer Jack Warner's patrol is riddled with nightly visits of Jack the Ripper and his victims re-enacting their macabre dance of death over and over again before disappearing as quickly as they appear. Deadly smog is claiming more lives than anyone can imagine. Churchill wants the Witchcraft Act abolished but little does he know that England is on a collision course with the ghost world and the smog deaths are just the beginning. It isn't until Rachel meets famed radio celebrity and host of The Ghost Mans series that everything starts to

make sense and she figures out the true danger lies within her own family. Rachel is no stranger to murder, mayhem and monsters, but this time, the stakes are too high and the losses are too deep. They seem to be adding up like casualties during the war. Rachel soon realizes she has much more to lose than her own life!

Smog is in today's headlines regularly, with vivid photographs of hoards of people wearing masks as they commute. There aren't many things that acutely threaten the human ecosystem like smog, as the death tolls of the London, Donora, Shanghai, and Meuse Valley disasters show. This is an unfortunately topical book, chronicling several historic episodes—some lasting days, some years—through both focused text and powerful sidebars showing real statistics. Each spread has a fact box discussing what legal changes were made—and not made—following these events. The final chapter cites specific ways readers can help.

The Smog John Creasey 2013-11-04 In an English Village and an American City life goes on as normal. Then a choking, yellowish smog begins to creep along the ground. It is an eye-stinging, killing miasma. Dr. Palfrey and Z5 deploy to head off the threat. One mystery follows another and a fantastic, yet disturbing light is shined on a problem that is all too real ...
Smogtown Chip Jacobs 2008-10-02 “A zany and provocative cultural history” of LA’s infamous air pollution and the struggle to combat it from the 1940s to today (Kirkus). The smog beast wafted into downtown Los Angeles on July 26, 1943. Nobody knew what it was. Secretaries rubbed

their eyes. Traffic cops seemed to disappear in the mysterious haze. Were Japanese saboteurs responsible? A reckless factory? The truth was much worse—it came from within, from Southern California’s burgeoning car-addicted, suburban lifestyle. Smogtown is the story of pollution, progress, and how an optimistic people confronted the epic struggle against airborne poisons barraging their hometowns. There are scofflaws and dirty deals aplenty, plus murders, suicides, and an ever-present paranoia about mass disaster. California based journalists Chip Jacobs and William J. Kelly highlight the bold personalities involved, the corporate-tainted science, the terrifying health costs, the attempts at cleanup, and how the smog battle helped mold the modern-day culture of Los Angeles.

Death in the Air Kate Winkler Dawson

2017-10-17 A real-life thriller in the vein of *The Devil in the White City*, Kate Winkler Dawson's debut *Death in the Air* is a gripping, historical narrative of a serial killer, an environmental disaster, and an iconic city struggling to regain its footing. London was still recovering from the devastation of World War II when another disaster hit: for five long days in December 1952, a killer smog held the city firmly in its grip and refused to let go. Day became night, mass transit ground to a halt, criminals roamed the streets, and some 12,000 people died from the poisonous air. But in the chaotic aftermath, another killer was stalking the streets, using the fog as a cloak for his crimes. All across London, women were going missing--poor women, forgotten women. Their disappearances caused little alarm, but each of them had one thing in common: they had the misfortune of meeting a

quiet, unassuming man, John Reginald Christie, who invited them back to his decrepit Notting Hill flat during that dark winter. They never left. The eventual arrest of the "Beast of Rillington Place" caused a media frenzy: were there more bodies buried in the walls, under the floorboards, in the back garden of this house of horrors? Was it the fog that had caused Christie to suddenly snap? And what role had he played in the notorious double murder that had happened in that same apartment building not three years before--a murder for which another, possibly innocent, man was sent to the gallows? The Great Smog of 1952 remains the deadliest air pollution disaster in world history, and John Reginald Christie is still one of the most unfathomable serial killers of modern times. Journalist Kate Winkler Dawson braids these strands together into a taut, compulsively readable true crime thriller about a man who changed the fate of the death penalty in the UK, and an environmental catastrophe with

implications that still echo today.
