Meditations with the Navajo Gerald Hausman 2001-10-01 A collection of stories, poems, and meditations that illuminate the spiritual world of the Navajo. • Explores the Navajo's fundamental belief in the importance of harmony and balance in the world. • Shares Navajo healing ways that have been handed down for generations. • Includes meditations following each story or poem. Navajo myths are among the most poetic in the world, full of dazzling word imagery. For the Navajo, who call themselves the Dine (literally, "the People"), the story of emergence--their creation myth--lies at the heart of their beliefs. In it, all the world is created together, both gods and human beings, embodying the idea that change comes from within rather than without. Poet and author Gerald Hausman collects this and other stories with meditations that together capture the essence of the Navajo people's way of life and their understanding of the world. Here are myths of the Holy People, of Changing Woman who teaches the People how to live, and of the trickster Coyote; stories of healings performed by stargazers and hand tremblers; and songs of love, marriage, homecoming, and growing old. These and the meditations that follow each story reveal a world--our world--that thrives only on harmony and balance and shares the Dine belief that the most important point on the circle that has no beginning or end is where we stand at the moment.

On The Margins Of Art Worlds Larry Gross 2019-06-04 During the late 1980s, the near-worship of artistic genius produced auction sales of works by Vincent Van Gogh and Pablo Picasso for tens of millions of dollars, over \$15 million for a painting by Jasper Johns, and record prices for works by many other deceased and even living masters. At the same time, it was no longer controversial in academic and intellectual circles to maintain that art works are the products of what Howard Becker has termed collective activity carried out within loosely defined art worlds: Works of art, from this point of view, are not the products of individual makers, "artists" who possess a rare and special gift. They are, rather, joint products of all the people who cooperate via an art world's

characteristic conventions to bring works like that into existence. Artists are some sub-group of the world's participants who, by common agreement, possess a special gift, therefore make a unique and indispensable contribution to the work, and thereby make it art. (1982: 35) The concept of the art world--with its central focus on the collective, social, and conventional nature of artistic production, distribution, and appreciation--confronts and potentially undermines the romantic ideology of art and artists still dominant in Western societies.

Canyon Dreams Michael Powell 2019-11-19 The moving story of a Navajo high school basketball team, its members struggling with the everyday challenges of high school, adolescence, and family, and the great and unique obstacles facing Native Americans living on reservations. Deep in the heart of northern Arizona, in a small and isolated patch of the vast 17.5-million-acre Navajo reservation, sits Chinle High School. Here, basketball is passion, passed from grandparent to parent to child. Rez Ball is a sport for winters where dark and cold descend fast and there is little else to do but roam mesa tops, work, and wonder what the future holds. The town has 4,500 residents and the high school arena seats 7,000. Fans drive thirty, fifty, even eighty miles to see the fast-paced and highly competitive matchups that are more than just games to players and fans. Celebrated Times journalist Michael Powell brings us a narrative of triumph and hardship, a moving story about a basketball team on a Navajo reservation that shows how important sports can be to youths in struggling communities, and the transcendent magic and painful realities that confront Native Americans living on reservations. This book details his season-long immersion in the team, town, and culture, in which there were exhilarating wins, crushing losses, and conversations on long bus rides across the desert about dreams of leaving home and the fear of the same.

Through Navajo Eyes Sol Worth 1997 "Surveyed in this book are two centuries of struggles over water rights. Most conflicts have occurred when someone suddenly seized and redirected the flow of water away from another user. Usually disputes were resolved through an appeal process, but these often followed ditch-bank fights punctuated by blows from shovels." "Throughout the colonial period, access to water was a local issue and centered on maintaining the community acequia or ditch. Then beginning in the last quarter of the nineteenth century, competition for water intensified. Community-based decision-making gave way to district court hearings and the emergence of new legal principles - all arising out of claims advanced by those seeking large-scale irrigation development. In 1907 control was given to an appointed water engineer in a new legislative code, which still remains the foundation of water law in New Mexico."--BOOK JACKET. Indigenous Aesthetics Steven Leuthold 1998 What happens when a Native or indigenous person turns a video camera on his or her own culture? Are the resulting images different from what a Westernized filmmaker would create, and, if so, in what ways? How does the use of a non-Native art-making medium, specifically video or film, affect the aesthetics of the Native culture? These are some of the questions that underlie this rich study of Native American aesthetics, art, media, and identity. Steven Leuthold opens with a theoretically informed discussion of the core concepts of aesthetics and indigenous culture and then turns to detailed examination of the work of American Indian documentary filmmakers, including George Burdeau and Victor Masayesva, Jr. He shows how Native filmmaking incorporates traditional concepts such as the connection to place, to the sacred, and to the cycles of nature. While these concepts now find expression through Westernized media, they also maintain continuity with earlier aesthetic productions. In this way,

Native filmmaking serves to create and preserve a sense of identity for indigenous people.

By the time the United States joined the Second World War in 1941, the fight against Nazi and Axis powers had already been under way for two years. Seasons of the Enemies Sharon Leslie Gearhart 2014-08-28 Delve into the land of the Dineh, the Navajo, in the turbulent 1860s, in this Season of the Enemies as the Dineh, the People, are attacked and harassed on every side by the Spaniards of New Mexico, the United States Army, and surrounding tribes. Watch them fight for their very survival, for their homeland, and maintain their way of life under the constant duress of the military campaigns led by the famous Kit Carson and others. Experience the burning time and the in-depth and highly researched battles between the Dineh and her enemies. In this Seasons of the Enemies, the author takes us into this extraordinarily descriptive volume that illuminates the history of the Dineh, the grueling and greedy operations of their Anglo enemies, and their despicable and unjust treatment at the hands of the US government. Comparable to the Trail of Tears of the Cherokee experience, Seasons of the Enemies sets itself apart as the must-read and definitive treatment of Navajo history during this period. American Indian Food Linda Murray Berzok 2005-04-30 This, the first, in-depth survey of Native American Indian foodways is an amazing chronicle of both human development over thousands of years and American history after the European invasion. It sheds light not only on this group and their history but on American food culture and history as well. For thousands of years an intimate relationship existed between Native Americans and their food sources. Dependence on nature for subsistence gave rise to a rich spiritual tradition with rituals and feasts marking planting and harvesting seasons. The European invasion forced

a radical transformation of the indigenous food habits. Foodways were one of the first layers of culture attacked. Indians were removed from their homelands, forced to cultivate European crops such as wheat and grapes, new animals were introduced, and the bison, a major staple in the Great Plains and West, was wiped out. Today, American Indians are trying to reclaim many of their food traditions. A number of their foodways have become part of the broader American cookbook, as many dishes eaten today were derived from Native American cooking, including cornbread, clam chowder, succotash, grits, and western barbeque. The story of Native American foodways presented here is an amazing chronicle of both human development over thousands of years and American history after the European invasion. Through cultural evolution, the First Peoples worked out what was edible or could be made edible and what foods could be combined with others, developed unique processing and preparation methods, and learned how to preserve and store foods. An intimate relationship existed between them and their food sources. Dependence on nature for subsistence gave rise to a rich spiritual tradition with rituals and feasts marking planting and harvesting seasons. The foodways were characterized by abundance and variety. Wild plants, fish, meat, and cultivated crops were simply prepared and eaten fresh or smoked, dried, or preserved for lean winters. The European invasion forced a radical transformation of the indigenous food habits. Foodways were one of the first layers of culture attacked. Indians were removed from their homelands, forced to cultivate European crops, such as wheat and grapes, new animals were introduced, and the bison, a major staple in the Great Plains and West, was wiped out. Other traditions have become part of the broader American cookbook, as many dishes eaten today were derived from Native American cooking, including cornbread, clam chowder, succotash, grits, and western barbeque. The scope is comprehensive, covering the six major regions, from prehistory until today. Chapters on the foodways history, foodstuffs, food preparation, preservation, and storage, food customs, food and religion, and diet and nutrition reveal the American

Indians' heritage as no history can do alone. Examples from many individual tribes are used, and quotations from American Indians and white observers provide perspective. Recipes are provided as well, making this a truly indispensable source for student research and general readers.

Code Talker Joseph Bruchac 2005-03-17 Throughout World War II, in the conflict fought against Japan, Navajo code talkers were a crucial part of the U.S. effort, sending messages back and forth in an unbreakable code that used their native language. They braved some of the heaviest fighting of the war, and with their code, they saved countless American lives. Yet their story remained classified for more than twenty years. But now Joseph Bruchac brings their stories to life for young adults through the riveting fictional tale of Ned Begay, a sixteen-year-old Navajo boy who becomes a code talker. His grueling journey is eye-opening and inspiring. This deeply affecting novel honors all of those young men, like Ned, who dared to serve, and it honors the culture and language of the Navajo Indians.
