Startup Your Life Anna Akbari 2016-12-27 As an entrepreneur, Anna Akbari learned that one of the best things about startups is their ability to “pivot” quickly—basically a euphemism for failing and starting over. And she quickly found that personal success is no different. It’s not just about developing and following the right process but also having a good idea. And that demands rigor and daily maintenance—far beyond a few positive affirmations. Like any Silicon Valley startup, the business of life is not as glamorous as its Instagram account would make it seem. What do you do when planning is not an option? When control is out of your reach? You isolate the small stuff, experiment constantly, and use the results to lay a more sustainable foundation for the future. You validate your idealized vision by testing it out in bite-sized increments.

~~You see what sticks, integrate, and move forward. And inevitably, you experience a series of failures along the way, but those failures are key to your next success. Living a start up life is about maximizing flexibility and measuring on-going results, not avoiding failure or reaching one particular end goal. It's about embracing defeat, analyzing it, and failing up. In *Startup Your Life*, Akbari shows that after all, it's often the stumbles that pave the way for real happiness.~~

1956, two Bell Labs scientists discovered the scientific formula for getting rich. One was mathematician Claude Shannon, neurotic father of our digital age, whose genius is ranked with Einstein's. The other was John L. Kelly Jr., a Texas-born, gun-toting physicist. Together they applied the science of information theory—the basis of computers and the Internet—to the problem of making as much money as possible, as fast as possible. Shannon and MIT mathematician Edward O. Thorp took the "Kelly formula" to Las Vegas. It worked. They realized that there was even more money to be made in the stock market. Thorp used the Kelly system with his phenomenally successful hedge fund, Princeton-Newport Partners. Shannon became a successful investor, too, topping even Warren Buffett's rate of return. Fortune's Formula traces how the Kelly formula sparked controversy even as it made fortunes at racetracks, casinos, and

trading desks. It reveals the dark side of this alluring scheme, which is founded on exploiting an insider's edge. Shannon believed it was possible for a smart investor to beat the market—and William Poundstone's Fortune's Formula will convince you that he was right.
