**Routledge Library Editions: Metaphysics** Various Authors 2013-01-11 Reissuing works originally published between 1937 and 1992, this collection of original texts addresses the philosophical realm of metaphysics, not only ontology but the philosophy of science, religion and morals. The theory of values and the theory of absolutes are the subject of more than one volume, while others take a broader spectrum and outlay the history of the philosophical arguments. The nature of objects and questions of being and identity are addressed from very different perspectives. With some

volumes by very eminent thinkers, this is a great addition to any collection on philosophy.

**Routledge Library Editions: Historiography** Various 2021-06-23 The greatest problem in historical scholarship, theoretically and practically, is the relation between historians and their subject matter. The past is gone and historians can only study its remnants. On what basis do scholars select certain facts from the mass of data left from the past? How do they explain the interrelationship of the facts they select? What criteria do they use to evaluate their subject? The 35 volumes in this set, originally published between 1926 and 1990 discuss and answer these essential questions faced by historians. The development of historical understanding during the 18th and 19th centuries was one of the most striking features of Western culture. Both historiography and historical thinking advanced as never before. The historical movement of the 19th century

was perhaps second only to the scientific revolution of the seventeenth century in transforming Western thought. One consequence was extensive organisation and professionalization of research, which the volumes in this set reflect.
